

Wahoo! Microsoft will die!

If all computation is available as a Web-based service...

- users have \$10,000 per year desktop systems to work alone
- users want cheap simple devices that let them work together
- working together implies reliable server
- Microsoft doesn't make any product that is simple
- Ergo, Microsoft will die

(but they still own WebTV, the future of the desktop, so the company will live even after Windows the product dies)
