In addition to print sources, The New Walford naturally covers an extensive range of reference sources such as digital databanks, digital reference services, electronic journal collections, meta search engines, networked information services, open archives, resource discovery services and websites of premier organizations in both the public and private sectors. But rather than supplying a list of all available known resources as a web search engine might, The New Walford subject specialists have carefully selected and evaluated available resources to provide a definitive list of the most appropriate and useful. With an emphasis on quality and sustainability, the subject specialists have been careful to assess the differing ways that information is framed and communicated in different subject areas. As a result, the resource evaluations in each subject area are prefaced by an introductory overview of the structure of the relevant literature. This ensures that The New Walford is clear, easy to use and intuitive. Publisher **Rockhounding New England** Peter Cristofono, 2014-04-15.
