## PHILOSOPHERS IN WONDERLAND

### Philosophy and Psychical Research

Can people exist after their bodily death? Can some people see into the future? Is there more than one Space? Can some persons move objects from a distance without touching them or read the mind of a stranger a thousand miles away? The recent investigations of psychical research seem to suggest affirmative answers to at least some of these questions. In their search to understand the powers of the human mind and the vagaries of the world, the psychical researchers have long had an ally in the philosophers who, since the dawn of civilization, have pondered the self-same questions that confront the modern psychical researcher in his quest to expand the frontiers of knowledge.

In this anthology Professor French has brought together for the first time the writings of a handful of classical and contemporary philosophers who have squarely brought to bear their analytical and speculative intelligence on the conceptual implications of the experiments and investigations of psychical research. "This book," Professor French observes, "is not designed to win friends for psychical research or parapsychology but to put into philosophical perspective those issues which lie concealed in all the talk of visitations from the dead, precognitive knowledge of the future, telepathic communications and things that go bump in the night. Undoubtedly many of us feel there must be something to all the reports of ESP, reincarnation, and the strange powers with which certain people are purportedly endowed. This book's central theme is that understanding this world of the psychical researchers necessitates an understanding of the concepts used to describe such a world. This understanding is at base philosophical."

Peter A. French is associate professor of philosophy at the University of Minnesota, Morris. He is the author of *Exploring Philosophy: Individual and Collective Responsibility and Conscientious Actions*.

"By weaving the essays of this superb collection around the traditional problems of philosophy, Professor French gives us a comprehensive portrait of the mind-boggling philosophical puzzles we find in the conceptual turbulence at the frontiers of knowledge. . . . He presents us with a fresh and very promising way to introduce students to vital metaphysical and epistemological issues."

First published in 2002 This is Volume XV of seventeen in the Philosophy of Mind and Psychology series The Muirhead Library of Philosophy was designed as a contribution to the History of Modern Philosophy under the heads first of Different Schools of Thought Sensationalist Realist Idealist Intuitivist secondly of different Subjects Psychology Ethics Aesthetics Political Philosophy Theology Written in 1976 this is a collection of essays by a number of well known philosophers who were invited to write on whichever philosophical issue relating to psychical research interested them most      **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), 1971      **Consciousness Unbound** Edward F. Kelly, Paul Marshall, 2021-03-16 Building on the groundbreaking research of Irreducible Mind and Beyond Physicalism Edward Kelly and Paul Marshall gather a cohort of leading scholars to consider the significance of extraordinary experiences for our understanding of reality Currently emerging as a middle ground between warring fundamentalisms of religion and science an expanded science based understanding of nature finally accommodates empirical realities of spiritual sorts while also rejecting rationally untenable overbeliefs The vision sketched here provides an antidote to the prevailing postmodern disenchantment of the world and demeaning of human possibilities It not only more accurately and fully reflects our human condition but engenders hope and encourages ego surpassing forms of human flourishing It offers reasons for us to believe that freedom is real that our human choices matter and that we have barely scratched the surface of our human potentials It also addresses the urgent need for a greater sense of worldwide community and interdependence a sustainable ethos by demonstrating that under the surface we and the world are much more extensively interconnected than previously recognized      Midwest Studies in Philosophy , 1976      **Channeling** Jon Klimo, 1998-04-17 In this study of channeling earlier called spirit communication or mediumship Klimo who teaches at Rosebridge Graduate School in the San Francisco Bay Area writes with clarity about the communication of information to or through a physically embodied human being from a source on some other level or dimension of reality other than the physical as we know it He profiles recent channels and their sources goes back to preliterate societies and the advent of monotheism and identifies as channels such figures as Moses Solomon Muhammad Merlin Nostradamus Swedenborg and Edgar Cayce He discusses the sorts of people who are channels kinds of information channeled sources of information channeled and varieties of channeling like clairvoyance and automatic writing According to Klimo few people tap into their abilities to perform channeling and for those who think they can he serves as guide      Parapsychology Rhea A. Patrick Grim, 1983-06-30 Philosophy of Science and the Occult has two aims to introduce the philosophy of science through an examination of the occult and to examine the occult rigorously enough to raise central issues in philosophy of science Patrick Grim has compiled selections by authors with divergent views on astrology parapsychology and UFO s to emphasize topics standard to the philosophy of science He discusses issues such as confirmation and selection for testing possibility and a priori probabilities causality and time explanation and the nature of scientific laws the status of theoretical entities the problem of demarcation theory and observation and science and values A sketch of where these arise in the collection accompanies the table of contents The context of the occult serves to make the initial introduction of these issues immediately understandable and forcefully compelling Journal of the Society for Psychical Research Society for Psychical Research (Great Britain), 1989

**Psychokinesis** Stanley Krippner, 1977-11 The history of humankind cannot be charted as a steady linear upward slope but rather as a series of quantum jumps of short duration separated by plateaus of varying duration during which no progress occurred During these periods of no progress the revolutionaries who produced the preceding quantum jump pass from the scene their principles and concepts become concretized as dogma and a new establishment is born whose sacred duty is the protection of the dogma against the new revolutionaries The last quantum jump was the scientific revolution of the nineteenth century which laid the groundwork for our present technological civilization and perhaps more important also shaped our philosophical view of what is a human being Since the basis of this scientific revolution was reason logic measurement and total reliance upon the organized senses the resultant view of the person is that of an automaton functioning in a clockwork world The power of this view is evident in the advances made in medical science up until the 1950s The twin triumphs of sanitation and preventive medicine and the development of the antibiotic concept completely revolutionized the practice of medicine and by 1950 those of us in the profession were anticipating a new golden age of medicine But in fact the reality has been disaster The mechanistic view of humanity has led to more and more technological applications of ever increasing complexity and cost and ever decreasing efficiency **Last Things** Caroline Walker Bynum, Paul Freedman, 2012-10-19 When the medievals spoke of last things they were sometimes referring to events such as the millennium or the appearance of the Antichrist that would come to all of humanity or at the end of time But they also meant the last things that would come to each individual separately not just the place Heaven Hell or Purgatory to which their souls would go but also the accounting the calling to reckoning that would come at the end of life At different periods in the Middle Ages one or the other of these sorts of last things tended to be dominant but both coexisted throughout In Last

Things Caroline Walker Bynum and Paul Freedman bring together eleven essays that focus on the competing eschatologies of the Middle Ages and on the ways in which they expose different sensibilities different theories of the human person and very different understandings of the body of time of the end Exploring such themes as the significance of dying and the afterlife apocalyptic time and the eschatological imagination each essay in the volume enriches our understanding of the eschatological awarenesses of the European Middle Ages      **The Journal of Philosophy** ,1975      *The Philosophical Review* Jacob Gould Schurman,James Edwin Creighton, Frank Thilly, Gustavus Watts Cunningham,1975 An international journal of general philosophy      **Philosophy of Science and the Occult** Patrick Grim,1990-07-17 This book both introduces the philosophy of science through examination of the occult and examines the occult rigorously enough to raise central issues in the philosophy of science Placed in the context of the occult philosophy of science issues become immediately understandable and forcefully compelling Divergent views on astrology parapsychology and quantum mechanics mysticism emphasize topics standard to the philosophy of science Such issues as confirmation and selection for testing causality and time explanation and the nature of scientific laws the status of theoretical entities the problem of demarcation theory and observation and science and values are discussed Significantly revised this second edition presents an entirely new section of quantum mechanics and mysticism including instructions from N David Mermin for constructing a device which dramatically illustrates the genuinely puzzling phenomena of quantum mechanics A more complete and current review of research on astrology has been included in this new edition and the section on the problem of demarcation has been broadened      **Parapsychology Review** ,1976      **A Meta-Psychological Perspective on the Individual Course of Life** Edgar Krau,2003-11-26 At one time or another everyone experiences an occult phenomenon It is not a matter of imagination or faith This book uses scientific knowledge from physics physiology psychology and other domains to both analyze and understand occult phenomena The author s basic position is to accept as real the forebodings and causal occurrences of unknown nature that can be verified in practice      Nature and Civilization Mulford Q.
