This anthology explores how Chinese and Western philosophies could jointly and constructively contribute to a common philosophical enterprise. Philosophers with in-depth knowledge of both traditions present a variety of distinct comparative approaches, offering a refined introduction to the further reaches of Chinese philosophy in the comparative context, especially regarding its three major constituents: Confucianism, philosophical Daoism, and the Yi Jing philosophy. This book examines various issues concerning philosophical methodology, ethics, metaphysics, epistemology, philosophy of language, and logic, and investigates both the living spring source of Chinese philosophy and its contemporary implications and development through contemporary resources. The balanced coverage, accessible content, and breadth of approaches presented in this anthology make it a valuable resource for students of Chinese Philosophy, Comparative Philosophy, and other related courses.
