How Philosophers Argue Fernando Leal, Hubert Marraud, 2022-02-21 This volume presents a double argumentative analysis of the debate between Bertrand Russell and Frederick Copleston on the existence of God It includes an introduction justifying the choice of text and describing the historical and philosophical

background of the debate It also provides a transcript of the debate based in part on the original recording The argumentative analyses occupy Parts I and II of the book In Part I the argumentative process is analysed by means of the ideal model of critical discussion the workhorse of pragma dialectics Part I shows how the two parties go through the four stages of a critical discussion It highlights the questions raised over and beyond the presiding question of whether God exists and examines almost a hundred questions that are raised Many are left in the air whereas a few others give rise to sundry sub discussions or meta dialogues In Part II the theoretical framework of argument dialectic is put to work argument structures are identified by means of punctuation marks argumentative connectors and operators allowing to see the argumentative exchange as the collaborative construction of a macro argument Such a macro argument is both a joint product of the arguers and a complex structure representing the dialectical relationships between the individual arguments combined in it Finally the complementarity of the two approaches is addressed Thus the book can be described as an exercise in adversarial collaboration

A Theory of Philosophical Fallacies Leonard Nelson, 2015-08-07 Presented as a Vorlesung in the German philosophical tradition this book presents the most detailed account of Nelson's method of argument analysis celebrated by many luminaries such as Karl Popper It was written in 1921 in opposition to the relativistic subjectivistic and nihilistic tendencies of Nelson's time The book contains an exposition of a method that is a further development of Kant's transcendental dialectics followed by an application to the critical analysis of arguments by many famous thinkers including Bentham Mill Poincaré Leibniz Hegel Einstein Bergson Rickert Simmel Brentano Stammler Jellinek Dingler and Meinong The book presents a general theory of philosophical argumentation as seen from the viewpoint of the typical fallacies committed by anybody arguing philosophically whether professional philosophers or philosophical laypeople Although the nature of philosophy and philosophical argumentation is one of the most recurrent objects of reflection for philosophers this book represents the first attempt at a general theory of philosophical fallacy According to Nelson it is in the shape of false dilemmas that errors in reasoning always emerge and false dilemmas are always the result of the same mechanism the unwitting replacement of one concept for another

Buddhism As Philosophy Mark Siderits, 2021-10-06 In *Buddhism As Philosophy* Mark Siderits makes the Buddhist philosophical tradition accessible to a Western audience Offering generous selections from the canonical Buddhist texts and providing an engaging analytical introduction to the fundamental tenets of Buddhist thought this revised expanded and updated edition builds on the success of the first edition in clarifying the basic concepts and arguments of the Buddhist philosophers

Feminist Theory in Diverse Productive Practices Liz Jackson, Michael A. Peters, 2018-12-19 Feminist Theory in Diverse Productive Practices is the second of two volumes examining gender and feminist theory in Educational Philosophy and Theory This collection explores the difference that gender and sexual identities make both to theorizing and working in education and other fields As the articles contained in this text span nearly 40 years of scholarship related to these issues this volume sheds light on how feminist gender and sexuality theory has evolved within and beyond the field of philosophy of education over time Key themes explored in the book include women s ways of knowing the challenges women and girls face in taking up professional employment across diverse fields historically and today and how feminist and related theories can enable women in professional development roles to empower each other The book tells a rich story of how gender and sexuality theory has been brought to bear on discussions of educational practice in diverse fields over decades of publication of Educational Philosophy and Theory Feminist Theory in Diverse Productive Practices will be key reading for academics researchers and postgraduate students in

the fields of philosophy of education philosophy education educational theory post structural theory and the policy and politics of education *Unapologetic* John W. Loftus, 2016-11-01 Just as intelligent design is not a legitimate branch of biology in public educational institutions nor should the philosophy of religion be a legitimate branch of philosophy So argues acclaimed author John W Loftus in this forceful takedown of the very discipline in which he was trained In his call for ending the philosophy of religion he argues that as it is presently being practiced the main reason the discipline exists is to serve the faith claims of Christianity Most of philosophy of religion has become little more than an effort to defend and rationalize preexisting Christian beliefs If subjects such as biology chemistry physics and geology are all taught without reference to faith based supernatural forces as explanations faith based teachings should not be acceptable in this discipline either While the book offers a fascinating study of the fallacies and flaws on which one whole field of study rests it speaks to something much larger in the ongoing culture wars By highlighting the stark differences between faith based reasoning and evidence based reasoning Loftus presents vital arguments and lessons about the importance of critical thinking not only in all aspects of study but also in life His conclusions and recommendations thus resonate far beyond the ivory towers and ivy covered walls of academic institutions **Atheism** Julian Baggini, 2009 Is a life without religion one without values or purpose Julian Baggini emphatically says no He sets out to dispel the myths surrounding atheism and to show how it can be both a meaningful and moral choice He directly confronts the failure of officially atheist states in the twentieth century and presents an intellectual case for atheism that rests as much on reasoned and positive arguments for its truth as on negative arguments against religion
