## **Philosophers And Pamphleteers:**

*Philosophers and Pamphleteers* Maurice Cranston, 1986 This volume discusses in turn the ideas of six leading thinkers of the French Enlightenment Montesquieu Voltaire Rousseau Diderot Holbach and Condorcet A general introduction surveys the political theories of the Enlightenment setting them in the context of the political realities of 18th century France The first book of its kind on the subject *Philosopher and Pamphleteers* brings a welcome new perspective to the study of French political thought during a fascinating historical era

*The Evolution of Modern Economic Theory* Carl Cone, 2017-09-29 The long paper which gives the title to this collection and which has never before been published as paperback was initially an attempt to promote international academic understanding The Economics Department at the London School of Economics had arranged a colloquy between two groups of Russian and British economists and where the author asked to contribute a general survey of the present state of economic theory as taught in Western centers For reasons which are explained in the opening section the author decided to adopt an historical approach and the notes on which the present paper is based were the result The remainders of the papers have as their common denominator a continuing interest in the history of economic thought Beginning with a lengthy critique of Schumpeter's magisterial *History of Economic Analysis* they range from an appraisal of Bentham's continuing relevance to a review of Robertson's *Lectures on Economic Principles* with some special attention to John Stuart Mill both as a human being and as an economist They have been written at various times in the last thirty five years and minute scrutiny if such were thought to be worthwhile which of course it is not might detect some variations of emphasis particularly perhaps in the implicit valuations of Marshall and his contribution in the papers on Wicksteed and Schumpeter's *History* respectively But in spite of a certain shift of perspective here the author thought it worthwhile to attempt substantial redrafting Apart from the correction of obvious inelegances or actual errors the excision of some duplicating quotations and in a few cases the addition of supplementary material and references the papers are reproduced as originally written In each instance the author has given footnote acknowledgements of the place of original publication

***The Evolution of Modern Economic Theory*** Lord Robbins, 1970-06-18      ***The Evolution of Modern Economic Theory*** Carl Cone, 2017-09-29 The long paper which gives the title to this collection and which has never before been published as paperback was initially an attempt to promote international academic understanding The Economics Department at the London School of Economics had arranged a colloquy between two groups of Russian and British economists and where the author asked to contribute a general survey of the present state of economic theory as taught in Western centers For reasons which are explained in the opening section the author decided to adopt an historical approach and the notes on which the present paper is based were the result The remainders of the papers have as their common denominator a continuing interest in the history of economic thought Beginning with a lengthy critique of Schumpeter's magisterial *History of Economic Analysis* they range from an appraisal of Bentham's continuing relevance to a review of

Robertson's Lectures on Economic Principles with some special attention to John Stuart Mill both as a human being and as an economist. They have been written at various times in the last thirty five years and minute scrutiny if such were thought to be worthwhile which of course it is not might detect some variations of emphasis particularly perhaps in the implicit valuations of Marshall and his contribution in the papers on Wicksteed and Schumpeter's History respectively. But in spite of a certain shift of perspective here the author thought it worthwhile to attempt substantial redrafting. Apart from the correction of obvious inelegances or actual errors the excision of some duplicating quotations and in a few cases the addition of supplementary material and references the papers are reproduced as originally written. In each instance the author has given footnote acknowledgements of the place of original publication.

*The Evolution of Modern Economic theory* Lionel Robbins, 1970

*The Causes of War* Alexander Gillespie, 2021-01-14 This is the fourth volume of a projected six volume series charting the causes of war from 3000 BCE to the present day written by a leading international lawyer and using as its principal materials the documentary history of international law largely in the form of treaties and the negotiations which led up to them. These volumes seek to show why millions of people over thousands of years slew each other. In departing from the various theories put forward by historians, anthropologists and psychologists the author offers a different taxonomy of the causes of war focusing on the broader settings of politics, religion, migrations and empire building. These four contexts were dominant and often overlapping justifications during the first four thousand years of human civilisation for which written records exist.

well as its lasting effects      **National Character and Public Spirit in Britain and France, 1750-1914** Roberto Romani, 2001-12-20 In a work of unusual ambition and rigorous comparison Roberto Romani considers the concept of national character in the intellectual histories of Britain and France Perceptions of collective mentalities influenced a variety of political and economic debates ranging from anti absolutist polemic in eighteenth century France to appraisals of socialism in Edwardian Britain Romani argues that the eighteenth century notion of national character with its stress on climate and government evolved into a concern with the virtues of public spirit irrespective of national traits in parallel with the establishment of representative institutions on the Continent His discussion of contemporary thinkers includes Montesquieu Voltaire Hume Millar Burke Constant de Sta l and Tocqueville After the mid nineteenth century the advent of social scientific approaches including those of Spencer Hobson and Durkheim shifted the focus from the qualities required by political liberty to those needed to operate complex social systems and to bear its psychological pressures      *Western Political Thought* Robert Eccleshall, Michael Kenny, 1995 This is a guide to the vast amount of literature on the history of political thought which has appeared in English since 1945 The editors provide an annotation of the content of many entries and where appropriate indicate their significance controversial nature and readability      **A History of Classical Greek Literature** John Pentland Mahaffy, 1890      **The Enslaved and Their Enslavers** Edward Pearson, 2023-09-19 In *The Enslaved and Their Enslavers* Edward Pearson offers a sweeping history of slavery in South Carolina from British settlement in 1670 to the dawn of the Civil War For enslaved peoples the shape of their daily lives depended primarily on the particular environment in which they lived and worked and Pearson examines three distinctive settings in the province the extensive rice and indigo plantations of the coastal plain the streets workshops and wharves of Charleston and the farms and estates of the upcountry In doing so he provides a fine grained analysis of how enslaved laborers interacted with their enslavers in the workplace and other locations where they encountered one another as plantation agriculture came to dominate the colony *The Enslaved and Their Enslavers* sets this portrait of early South Carolina against broader political events economic developments and social trends that also shaped the development of slavery in the region For example the outbreak of the American Revolution and the subsequent war against the British in the 1770s and early 1780s as well as the French and Haitian revolutions all had a profound impact on the institution s development both in terms of what enslaved people drew from these events and how their enslavers responded to them Throughout South Carolina s long history enslaved people never accepted their enslavement passively and regularly demonstrated their fundamental opposition to the institution by engaging in acts of resistance which ranged from vandalism to arson to escape and on rare occasions organizing collectively against their oppression Their attempts to subvert the institution in which they were held captive not only resulted in slaveowners tightening formal and informal mechanisms of control but also generated new forms of thinking about race and slavery among whites that eventually mutated into pro slavery ideology and the myth of southern exceptionalism      **The**

**Pamphleteer** ,1818      Critique as Critical History Bregham Dalglish,2017-08-22 This book presents the first sustained articulation of a Foucauldian *œuvre* It situates Foucault's critique within the tradition of Kant's call for a philosophical archaeology of reason in parallel it demonstrates the priority in Foucault's thought of Nietzsche over Heidegger and the framing of reason against an ontology of power Bregham Dalglish hereby claims that at the heart of the Foucauldian *œuvre* is the philosophical method of critical history Its task is to make the will to know that drives thought conscious of itself as a problem especially the regimes of truth that define our governmentalities By revealing the contingency of their constituent parts of knowledge power and ethics Dalglish demonstrates that critical history offers an alternative mode of critique to the hitherto singular reading of the intellectual heritage of enlightenment while it fosters an agonistic concept of freedom in respect of our putatively necessary limits      The prose writers (with an index to both vols.)
