Jessop, 2012-12-06 Since the first appearance of this bibliography 1934 Oxford University Press which has long been out of print so much attention has been paid to Berkeley that a mere reprint would be inept Besides bringing it up to date I have added collations of those editions of Berkeley's writings that were published in his lifetime In doing so I have used a form of description simple enough for anyone to follow yet sufficient to enable librarians to check their catalogues and to identify copies in which the titlepage is missing or mutilated As before I have marked with an asterisk throughout the bibliography every book edition and article that has not been seen by me or in a few cases by a competent friend My primary interest not being bibliographical in the present day highly technical sense but philosophical I have aimed chiefly at a providing advanced students and their hard pressed advisers of Berkeley or of the subjects on which he wrote with a guide to the materials for research and by displaying the range in time and place and the direction of the attention which he has attracted These two aims account for the classification of the entries under a few general subject headings and of the philosophical entries under countries and for the arranging of the entries in each section or subsection in chronological order the alphabetical ordering of the authors names being given in the Index To facilitate reference and cross

reference each entry is numbered

**Marx, Engels and the Philosophy of Science** David Bedford, Thomas Workman, 2022-12-31 This book expounds the dialectical conception of science largely implicit in the writings of Marx and Engels offering a sympathetic reconstruction of a philosophy of science commensurate with Marx's thought Drawing on a reading of dialectics found in Plato and Hegel it recasts Marx's implicit ontology in terms of dialectical conceptions of the world as these conceptions have responded to the growing sophistication of modern science It thus deepens our understanding of materialist philosophy as it relates to science and draws out Marx's logic of science in light of continuing discussions As such it will appeal to philosophers with interests in the nature and development of science and Marxist thought

*Indigenous Shona Philosophy* Pascah Mungwini, 2017-12-29 Some of the most provocative questions confronting philosophers in Africa are grounded in the historical memory of conquest and the peripheralisation of the continent Mungwini offers a critical reconstruction of indigenous Shona philosophy as an aspect of the African intellectual heritage held hostage by colonial modernity In this comprehensive work he lays bare the thoughts of the Shona who are credited with the founding of the ancient Great Zimbabwe civilisation Retracing the epistemic thread in the fabric of Shona culture and philosophy he explores the assumptions that inform their thinking The exchange of such knowledge is fundamental to the future of humanity

**Constructive Evolution** Michael Chapman, 1988-06-24 This book represents an attempt to understand the evolution of Jean Piaget's basic ideas in the context of his own intellectual development Piaget sought to elucidate human knowledge by studying its origins and development In this book Michael Chapman applies the same method to Piaget's own thinking Dr Chapman shows that some of the Swiss psychologist's essential ideas originated in adolescent philosophical speculations about the relation between science and value These same ideas were then developed step by step in Piaget's investigations of children's cognitive development Dr Chapman claims that Piaget's use of developmental psychology as a means for addressing questions about the evolution of knowledge has been misunderstood by psychologists approaching his work exclusively from the perspectives of their own discipline Reconstructing Piaget's intellectual biography makes possible a better understanding of the questions he originally posed and the answers he subsequently provided Dr Chapman concludes with an assessment of Piaget's relevance for contemporary psychology and philosophy and suggests ways in which Piagetian theory might be further developed
