Lives And Times Of Great Pioneers In Chemistry (Lavoisier To Sanger) C N R Rao, Indumati Rao, 2015-11-18 Chemical science has made major advances in the last few decades and has gradually transformed into a highly multidisciplinary subject that is exciting academically and at the same time beneficial to human kind In this context we owe much to the foundations laid by great pioneers of chemistry who contributed new knowledge and created new directions This book presents the lives and times of 21 great chemists starting from Lavoisier 18th century and ending with Sanger Then there are stories of the great Faraday 19th century and of the 20th century geniuses G N Lewis and Linus Pauling The material in the book is presented in the form of stories describing important aspects of the lives of these great personalities besides highlighting their contributions to chemistry It is hoped that the book will provide enjoyable reading and also inspiration to those who wish to understand the secret of the creativity of these great chemists **A to Z of Physicists,**

**Updated Edition** Darryl Leiter, 2019-11-01 A to Z of Physicists Updated Edition focuses not only on the lives and personalities of those profiled but also on their research and contributions to the field A fascinating and important element of this work is the attention paid to the obstacles that minority physicists had to overcome to reach their personal and professional goals Through incidents quotations and photographs the entries portray something of the human face which is often lost in books on science and scientists A to Z of Physicists Updated Edition features more than 150 entries and 51 black and white photographs Culturally inclusive and spanning the whole range of physicists from ancient times to the present day this is an ideal resource for students and general readers interested in the history of physics or the significant aspects of the personal and professional lives of important physicists People covered include Archimedes ca 285 212 BCE Homi Jehangir Bhabha 1909 1966 Pavel Alekseyevich Cherenkov 1904 1990 Marie Curie 1867 1934 George Gamow 1904 1968 Tsung Dao Lee 1926 present Lise Meitner 1878 1968 Yuval Ne'eman 1925 2006 Johannes Stark 1874 1957 Nikola Tesla 1856 1943

Alessandro Volta 1745 1827 Hideki Yukawa 1907 1981 *Transformations of Electricity in Nineteenth-Century Literature and Science* Stella Pratt-Smith, 2017-05-15 Throughout the nineteenth century practitioners of science writers of fiction and journalists wrote about electricity in ways that defied epistemological and disciplinary boundaries Revealing electricity as a site for intense and imaginative Victorian speculation Stella Pratt Smith traces the synthesis of nineteenth century electricity made possible by the powerful combination of science literature and the popular imagination With electricity resisting clear description even by those such as Michael Faraday and James Clerk Maxwell who knew it best Pratt Smith argues that electricity was both metaphorically suggestive and open to imaginative speculation Her book engages with Victorian

scientific texts popular and specialist periodicals and the work of leading midcentury novelists including Charles Dickens Charlotte Bronte Emily Bronte William Makepeace Thackeray and Wilkie Collins Examining the work of William Harrison Ainsworth and Edward Bulwer Lytton Pratt Smith explores how Victorian novelists attributed magical qualities to electricity imbuing it with both the romance of the past and the thrill of the future She concludes with a case study of Benjamin Lumley's *Another World* which presents an enticing fantasy of electricity's potential based on contemporary developments Ultimately her book contends that writing and reading about electricity appropriated and expanded its imaginative scope transformed its factual origins and applications and contravened the bounds of literary genres and disciplinary constraints

**In the Shadow of the Machine** Jeremy Naydler, 2018-05-29 Contemporary life is so deeply reliant upon digital technology that the computer has come to dominate almost every aspect of our culture What is the philosophical and spiritual significance of this dependence on electronic technology both for our relationship to nature and for the future of humanity And what processes in human perception and awareness have produced the situation we find ourselves in As Jeremy Naydler elucidates in this penetrating study we cannot understand the emergence of the computer without seeing it within the wider context of the evolution of human consciousness which has taken place over millennia Modern consciousness he shows has evolved in conjunction with the development of machines and under their intensifying shadow The computer was the product of a long historical development culminating in the scientific revolution of the 17th century It was during this period that the first mechanical calculators were invented and the project to create more complex thinking machines began in earnest But the seeds were sown many hundreds of years earlier deep in antiquity Naydler paints a vast panorama depicting human development and the emergence of electronic technology His painstaking research illuminates an urgent question that concerns every living person today What does it mean to be human and what if anything distinguishes us from machines

**The Victimization of Women** Michelle L. Meloy, Susan L. Miller, 2011 In *The Victimization of Women* Michelle Meloy and Susan Miller present a balanced comprehensive and objective summary of the most significant research on the victimizations violence and victim politics that disproportionately affect women They examine the history of violence against women the surrounding debates the legal reforms and justice system outcomes the related media and social service responses and the current science on intimate partner violence stalking sexual harassment sexual assault and rape Plus they augment these victimization findings with original research on women convicted of domestic battery and men convicted of sexual abuse and other sex related offenses In these new data the authors explore the unanticipated consequences associated with changes to the laws governing domestic violence and the newer forms of sex offender legislation Both of these investigations are based on qualitative data that involve in depth offender based interviews that probe the circumstances surrounding the arrests and victimizations involved in the cases the significant legal issues and their

experiences with the criminal justice system     The Serious Pleasures of Suspense Caroline Levine,2003 Scholars have long recognized that narrative suspense dominates the formal dynamics of 19th century British fiction This study argues that various 19th century thinkers John Ruskin Michael Faraday Charlotte Bronte saw suspense as a vehicle for a new approach to knowledge called realism     'The Common Purposes of Life' Frank A.J.L. James,2017-07-05 For more than two hundred years the Royal Institution has been at the centre of scientific research and has provided a cultural location for science in Britain Within its walls some of the major scientific figures of the last two centuries such as Humphry Davy Michael Faraday John Tyndall James Dewar Lord Rayleigh William Henry Bragg Henry Dale Eric Rideal William Lawrence Bragg and George Porter carried out much of their research with discoveries from sodium to x ray crystallography The success of the Royal Institution in research and in locating science within general culture led it to being used as a model for other institutions most notably by the founders of the Smithsonian Institution in Washington Much has been written about the scientific work in the Royal Institution but much less about the cultural settings which allowed it to become such a major site for the creation of scientific knowledge The purpose of this book is to examine these aspects of its history     **Portraits of the Great Bible-believing Scientists** Franjo Stvarnik,2018-10-29 More than 60 years ago remembered Mr Stvarnik I read the books From Ancient Philosophy to Modern Science of Atoms by prof dr Ivan Supek and the Images from the Lives of Great Scientists by prof dr Milutin Milankovic and for me these are still the most beautiful scientific texts From that time as a much loving hobby Mr Stvarnik has studied biographies of great scientists I have grown up in an atheistic country he once said and therefore it was a surprise to find that there were very few atheistic or agnostic scientists the majority of them were some kind of believers in God Actually a good number of the greatest scientific minds were or are Bible believing Christians That realization along with discoveries of some deliberate distortions of historical facts that made certain Bible believing scientists look as having an atheistic bent prompted writing a book The Portraits of the Great Bible believing Scientists that was published in Croatian and in Serbian languages Now he has written the same in English but since many years elapsed from the mentioned publications he enriched the text with new findings and added 12 new portraits into the book     Particles, Fields, Space-Time Martin Pohl,2025-06-27 Particles Fields Space Time From Thomson s Electron to Higgs Boson explores the concepts ideas and experimental results that brought us from the discovery of the first elementary particle in the end of the 19th century to the completion of the Standard Model of particle physics in the early 21st century The book concentrates on disruptive events and unexpected results that fundamentally changed our view of particles and how they move through space time It separates the mathematical and technical details from the narrative into focus boxes so that it remains accessible to non scientists yet interesting for those with a scientific background who wish to further their understanding The text presents and explains experiments and their results wherever appropriate This book is of interest to a general audience but also to students studying particle physics physics teachers at all levels and scientists with a recreational curiosity

towards the subject For this second edition the complete text has been thoroughly revised A description of plans for new accelerator facilities has been added as well as new results on cosmic ray physics dark matter and dark energy The usage of natural units has been abandoned in favour of SI units throughout the text Key Features Short comprehensive overview concentrating on major breakthroughs disruptive ideas and unexpected results Accessible to all interested in subatomic physics with little prior knowledge required Contains the latest developments in this exciting field
