Philosophic Turnings Essays In Conceptual Appreciation:

Philosophic Turnings Paul Ziff, 1996 *Nature and Landscape* Allen Carlson, 2009 The roots of environmental aesthetics reach back to the ideas of eighteenth century thinkers who found nature an ideal source of aesthetic experience Today having blossomed into a significant subfield of aesthetics environmental aesthetics studies and encourages the appreciation of not just natural environments but also human made and human modified landscapes *Nature and Landscape* is an important introduction to this rapidly growing area of aesthetic understanding and appreciation Allen Carlson begins by tracing the development of the field s historical background and then surveys contemporary positions on the aesthetics of nature such as scientific cognitivism which holds that certain kinds of scientific knowledge are necessary for a full appreciation of natural environments Carlson next turns to environments that have been created or changed by humans and the dilemmas that are posed by the appreciation of such landscapes He examines how to aesthetically appreciate a variety of urban and rural landscapes and concludes with a discussion of whether there is in general a correct way to aesthetically experience the environment *Philosophic Turnings* Joseph Hillis Miller, 1966 **Dictionary Of Modern American Philosophers** John R. Aesthetics and the Environment Allen Carlson, 2005-08-08 First book by the world leading authority on the subject Carlson is respected worldwide by both environmentalists and philosophers The topic has a growing following among geographers planners and environmentalists as well as philosophers of aesthetics crossing over many markets

Kant, God and Metaphysics Edward Kanterian, 2017-11-15 Kant is widely acknowledged as the greatest philosopher of modern times He undertook his famous critical turn to save human freedom and morality from the challenge of determinism and materialism Intertwined with his metaphysical interests however he also had theological commitments

which have received insufficient attention He believed that man is a fallen creature and in need of redemption He intended to provide a fortress protecting religious faith from the failure of rationalist metaphysics from the atheistic strands of the Enlightenment from the new mathematical science of nature and from the dilemmas of Christian theology itself Kant was an epistemologist a philosopher of mind a metaphysician of experience an ethicist and a philosopher of religion But all this was sustained by his religious faith This book aims to recover the focal point and inner contradictions of his thought the secret thorn of his metaphysics as Heidegger once put it It first locates Kant in the tradition of reflection on the human weakness from Luther to Hume and then engages in a critical but charitable manner with Kant's entire pre-critical work including his posthumous fragments Special attention is given to *The Only Possible Ground* 1763 one of the most difficult interesting and underestimated of Kant's works The present book takes its cue from an older approach to Kant but also engages with recent Anglophone and continental scholarship and deploys modern analytical tools to make sense of Kant What emerges is an innovative and thought provoking interpretation of Kant's metaphysics set against the background of forgotten religious aspects of European philosophy *The Referential Structure of Propositional Attitudes* Jack Andrew Cumbee, 1977

The Aesthetics of Natural Environments Allen Carlson, Arnold Berleant, 2004-02-10 *The Aesthetics of Natural Environments* is a collection of essays investigating philosophical and aesthetics issues that arise in our appreciation of natural environments The introduction gives an historical and conceptual overview of the rapidly developing field of study known as environmental aesthetics The essays consist of classic pieces as well as new contributions by some of the most prominent individuals now working in the field and range from theoretical to applied approaches The topics covered include the nature and value of natural beauty the relationship between art appreciation and nature appreciation the role of knowledge in the aesthetic appreciation of nature the importance of environmental participation to the appreciation of environments and the connections between the aesthetic appreciation of nature and our ethical obligations concerning its maintenance and preservation This volume is for scholars and students focussed on nature landscapes and environments individuals in areas such as aesthetics environmental ethics geography environmental studies landscape architecture landscape ecology and the planning and design disciplines It is also for any reader interested in and concerned about the aesthetic quality of the world in which we live *Reading with Feeling* Susan L. Feagin, 2018-10-18 Feelings and other affective responses to a work of fiction are an important part appreciation and the capacity to inspire such responses is part of what is valuable about literary works of art Susan L. Feagin's philosophical exploration of appreciation focusing specifically on its emotional or affective components asks us to consider aesthetic appreciation as getting the value out of the work Appreciation involves exercising abilities Feagin develops a psychological model for understanding how one becomes emotionally engaged with something one knows is fictional She stresses the importance of the role of imagination in producing affective responses Imagination is harnessed by the writer's choice of phrase or depiction of detail Feagin cites the work of Angela Carter Molly Keane Heinrich

B Il Gabriel Gar ia Marquez and draws an extended example from Henry James She notes that not all responses to a work are relevant or appropriate and discusses a variety of ways responses may be assessed Even though assessing responses can stifle imagination and hence threaten spontaneity and the responses themselves the value of having affective responses to fiction depends upon our being able to make such assessments Whatever else we may gain appreciating a work getting the value out of it is one means of extending the capacities of our own imaginations *Philosophy of Art and Aesthetics, from Plato to Wittgenstein* Frank A. Tillman, Steven M. Cahn, 1969 *Institutions of Art* Robert J. Yanal, 2010-11 George Dickie has been one of the most innovative influential and controversial philosophers of art working in the analytical tradition in the past twenty five years Dickie s arguments against the various theories of aesthetic attitude aesthetic perception and aesthetic experience virtually brought classical theories of the aesthetic to a halt His institutional theory of art was perhaps the most discussed proposal in aesthetics during the 1970s and 1980s inspiring both supporters who produced variations on the theory as well as passionate detractors who thought the theory thoroughly wrongheaded Dickie has also written widely on the history of aesthetics and his work ranks among the best examples of analytic aesthetics The philosophy of George Dickie continues to provoke reaction and reflection The essays in this collection pay homage not only to Dickie s ideas but also to his influence A brief biography of George Dickie and a bibliography of his works complete the volume **Natural Beauty** Ronald Moore, 2007-08-28 Natural Beauty was selected for the Choice Outstanding Academic Title list for 2008 Natural Beauty presents a bold new philosophical account of the principles involved in making aesthetic judgments about natural objects It surveys historical and modern accounts of natural beauty and weaves elements derived from those accounts into a syncretic theory that centers on key features of aesthetic experience specifically features that sustain and reward attention In this way Moore s theory sets itself apart from both the purely cognitive and the purely emotive approaches that have dominated natural aesthetics until now Natural Beauty shows why aesthetic appreciation of works of art and aesthetic appreciation of nature can be mutually reinforcing that is how they are cooperative rather than rival enterprises Moore also makes a compelling case for how and why the experience of natural beauty can contribute to the larger project of living a good life
