*Reconceptualizing Confucian Philosophy in the 21st Century* Xinzhong Yao, 2017-05-08. This book comprises 30 chapters representing certain new trends in reconceptualizing Confucian ideas, ideals, values, and ways of thinking by scholars from China and abroad. While divergent in approaches, these chapters are converged on conceptualizing and reconceptualizing Confucianism into something philosophically meaningful and valuable to the people of the 21st century. They are grouped into three parts, and each is dedicated to one of the three major themes this book attempts to address. Part one is mainly on scholarly reviews of Confucian doctrines by which new interpretations will be drawn out. Part two is an assembled attempt to reexamine Confucian concepts in which critiques of traditional views lead to new perspectives for perennial questions. Part three is focused on reinterpreting Confucian virtues and values in the hope that a new sense of being moral can be gained through old normative forms.

*Rethinking Philosophy of Religion with Wittgenstein* Thomas D. Carroll, 2025-05-15. Can Wittgenstein's philosophy help us to see religious diversities? Thomas D. Carroll uses Wittgenstein's thoughts on religion and language to bring a cross-cultural perspective to philosophy of religion. Through a focus on Chinese philosophical and religious traditions and the intertwining of racism and religion in the United States, Carroll highlights two related features of Wittgenstein's philosophy: the relevance of contextual backgrounds to interpreting ways of life and the importance of reflecting on existential purposes in philosophical inquiry. Committed to the essential task of expanding philosophy of religion, Carroll critically studies the term religion and goes beyond the traditional categories of belief to consider diverse religious phenomena such as rituals, practices, institutions, forms of belonging, and pragmatic forms of religious engagement. We see the value of paying close attention to social contexts and refusing to oversimplify interpretation of philosophical arguments. By demonstrating how Wittgenstein's ideas can enrich our understanding of the complex phenomenon of religion and the place it has in our lives, this inclusive and timely study asks us to rethink how we approach philosophy of religion.

**Dao Companion to Chinese Buddhist Philosophy** Youru Wang, Sandra A. Wawrytko, 2019-01-31. Too often Buddhism has been subjected to the Procrustean box of Western thought whereby it is stretched to fit fixed categories or had essential aspects lopped off to accommodate vastly different cultural norms and aims. After several generations of scholarly discussion in English-speaking communities, it is time to move to the next hermeneutical stage. Buddhist philosophy must be liberated from

the confines of a quasi religious stereotype and judged on its own merits Hence this work will approach Chinese Buddhism as a philosophical tradition in its own right not as an historical after thought nor as an occasion for comparative discussions that assume the west alone sets the standards for or is the origin of philosophy and its methodologies Viewed within their own context Chinese Buddhist philosophers have much to contribute to a wide range of philosophical concerns including metaphysics epistemology ethics philosophy of language philosophy of mind and philosophy of religion even though Western divisions of philosophy may not exhaust the rich contents of Chinese Buddhist philosophy

**Consensus Realities** Stefan Wurm,2022-01-05 We perceive the world in which we live through our senses and make sense of it using our minds In this way we construct our very own consensus realities our subjective interpretations of the world as each one of us perceives and understands it What do we know about how we construct our consensus realities How do human body and mind connect as they somehow must to give us the experience of the world that we know we have The first three book chapters invite the reader to explore what the human brain philosophy of mind and psychology can tell us about the relationship between the human body and mind We all are curious about those things and exploring them is possible for all of us We have no other choice than to form our own consensus realities as it is through them that we can make sense of us in this world Many consensus realities only deviate from objective reality in as much as our personal vanity goes to make us more comfortable with who we are Others however can seemingly dissociate themselves to much greater degrees from objective reality endorsing fake news and false narratives creating their own make believe worlds in the process The fourth book chapter looks into some of the implications that has had in the past and might have in the future
