**Philosophy and the New Physics** Jonathan H Powers, 2023-07-14 First Published in 1982 Philosophy and the New Physics is a compact and yet remarkably rich excursion through the history of physics from Newtonian mechanics to quantum physics The theory of relativity quantum mechanics and ideas about the fundamental constituents of matter have attracted a great deal of philosophical comment Indeed the originators of some of these theories thought they were solving philosophical problems as well as scientific ones Classical physics is often portrayed as epitomizing mechanistic materialism and the revolution in modern physics is variously claimed to vindicate logical positivism operationalism organicism dialectical materialism and Buddhist metaphysics In this book Jonathan Powers criticizes all of these claims and argues that such varied and conflicting interpretations are possible because of ineradicable elements of conventionality in scientific theories This is a must read for scholars and researchers of philosophy of science and philosophy in general Journal Tennessee Academy of Science, 1926 **Philosophy of Science, Logic and Mathematics in the 20th Century** Stuart G. **The Social Relations of Physics, Mysticism, and Mathematics** S. Restivo, 2012-12-06 The problems I address in this book are among the least studied in the sociology of science and knowledge Part I is a critique of the claim that there are parallels between ancient mysticism and modern physics and a sociological analysis of this claim as a strategy in intellectual conflict This study must ultimately be rooted more firmly in a type of sociology of knowledge that is just now beginning to crystallize and which I discuss in Chapter 7 and a sociology of religion that is not so much unknown as underground and timid that is a non worshipful materialist sociology of religion My study of physics mysticism parallelism is a vehicle for exploring epistemic strategies I thus conclude Part I by sketching a materialist emancipatory epistemic strategy My conclusion brings together a number of ideas formulated by myself and others over the past several years but stops short of a systematic synthesis A more integrated and coherent model than what I can sketch here must wait on the results of research now in progress in the critical as opposed to apologetic or worshipful sociology of knowledge
