Philosophical Explorations:

On the Edge of Certainty Raymond Tallis, 1999-08-02 Raymond Tallis's *The Explicit Animal* 1991 was a passionate attack on attempts to explain human consciousness in purely biological terms. This ground-breaking book defended the distinctive nature of human consciousness against the misrepresentations of those many philosophers and cognitive scientists who aimed to reduce it to a set of functions understood in evolutionary neurobiological and computational terms. In his laudatory review in *The Times Literary Supplement* Stephen Clark expressed the hope that Tallis would continue his explorations. *On the Edge of Certainty* does precisely that: investigating and clarifying the implications of the highly original view of human nature discussed in his earlier book in order to understand the nature of truth of language of the mind and of the self.

Disjunctivism Marcus Willaschek, 2013-09-13 Does perception provide us with direct and unmediated access to the world around us? The so-called argument from illusion has traditionally been supposed to show otherwise: from the subject's point of view, perceptual illusions are often indistinguishable from veridical perceptions; hence perceptual experience as such cannot provide us with knowledge of the world but only with knowledge of how things appear to us. Disjunctive accounts of perceptual experience, first proposed by John McDowell and Paul Snowdon in the early 1980s and at the centre of current debates in the philosophy of perception, have been proposed to block this argument. According to the traditional view, a case of perception and a subjectively indistinguishable illusion or hallucination can exemplify what is fundamentally the same kind of mental state, even though they differ in how they relate to the non-mental environment. In contrast, according to the disjunctive account, the concept of perceptual experience should be seen as essentially disjunctive, encompassing at least two distinct kinds of mental states: namely, genuinely world-involving perceptions and mere appearances. This book presents seven recent essays on disjunctivism, first published in two special issues of *Philosophical Explorations: An International Journal for the Philosophy of Mind and Action*.

Philosophical Explorations Nicholas Rescher, 2013-05-02 This book continues Rescher's longstanding practice of publishing groups of philosophical essays that originated in occasional lecture and conference presentations. Notwithstanding their topical diversity, they exhibit a uniformity of method in a common attempt to view historically significant philosophical issues in the light of modern perspectives, opened up through conceptual clarification.

Philosophical Explorations Peter A. French, 1975 *Toward New Philosophical Explorations of the Epistemic Desire to Know* Marianna Papastephanou, 2019-03-25 This collection of essays explores curiosity from many philosophical perspectives of relevance to various fields and disciplines such as educational studies, epistemology, political philosophy, and history of thought. It advances and enriches scholarly research on curiosity while critiquing current approaches to the epistemic desire to know. Its interest in contemporary accounts of curiosity does not entail neglect of the conceptual history of this notion from antiquity to the present. Its focus on cultural and scientific appreciations of curiosity is global rather than local and inclusive of standpoints beyond established divisions such as the modern versus postmodern or the analytic versus

continental The book offers fresh and unique engagements with what motivates us to ask questions and how this motivation operates from an ethical cultural and political point of view **Extended Epistemology** J. Adam Carter,Andy Clark,Jesper Kallestrup,S. Orestis Palermos,Duncan Pritchard,2018 Extended Cognition examines the way in which features of a subject s cognitive environment can become constituent parts of the cognitive process itself This volume explores the epistemological ramifications of this idea bringing together academics from a variety of different areas to investigate the very idea of an extended epistemology **Feminist Explorations of Paul Ricoeur's Philosophy** Annemie Halsema,Fernanda

Henriques,2016-05-19 This book for the first time brings together considerations upon the feminine in relation to Paul Ric ur s thinking The collection of renowned scholars who have published extensively on Ricoeur and promising younger scholars together shows the rich potential of his thought for feminist theory without failing to critically scrutinize it and to show its limitations with respect to thinking gender differences In the first part Ric ur Women and Gender Ric ur s work is taken as the starting point for the reflection upon the position of women and the feminine and for rethinking the notion of universalism In the second part Ric ur in Dialogue his work is related to feminist thinkers such as Simone de Beauvoir Judith Butler and Nancy Fraser and to the work of artist Kara Walker These dialogues aim at thinking through socially relevant notions such as discourse recognition and justice In the third part Ric ur and Feminist Theology Ric urian notions and ideas are the starting point for new perspectives upon feminist theology The insights developed in this book will be of particular value to students and scholars of Ric ur feminist theory and the limits of hermeneutics and phenomenology **A**

Reactive Attitudes and Free Will Maureen Sie,Derk Pereboom,2017-10-02 Basic Desert Reactive Attitudes and Free Will addresses the issue of whether we can make sense of the widespread conviction that we are morally responsible beings It focuses on the claim that we deserve to be blamed and punished for our immoral actions and how this claim can be justified given the philosophical and scientific reasons to believe that we lack the sort of free will required for this sort of desert Contributions to the book distinguish between and explore two clusters of questions The first asks what it is to deserve to be

harmful or benefited What are the bases for desert actions good character bad character the omission of good character traits The second cluster explores the disagreement between compatibilists and incompatibilists surrounding the nature of desert Do we deserve to be harmed benefited or judged even if we lack the ability to act differently and if we do not what effect does this have on our everyday actions Taken in full this book sheds light on the notion of desert implicated in our practice of holding each other morally responsible This book was originally published as a special issue of Philosophical Explorations

Disjunctivism Matthew Soteriou, 2016-03-31 It is commonly held that the experiences involved in cases of perception illusion and hallucination all have the same nature Disjunctivists deny this They maintain that the kind of experience you have when you perceive the world isn't one you could be having if you were hallucinating A number of important debates in the philosophy of mind and epistemology turn on the question of whether this disjunctivist view is tenable This is the first book length introduction to this contested issue Matthew Soteriou explains the accounts of perception that disjunctivists seek to defend such as naive realism and the accounts to which they are opposed such as sense datum theories and representationalist theories He goes on to introduce and assess key questions that arise in these debates Is disjunctivism consistent with what has been established by the science of perception Does introspective reflection support naive realism Can disjunctivism be motivated by appeal to the role that perception plays in enabling us to think demonstratively about mind independent objects and qualities in our environment Does disjunctivism offer the best account of perceptual knowledge What can disjunctivists say about the nature of hallucination and illusion Including chapter summaries annotated further reading and a glossary this book is an ideal starting point for anyone studying disjunctivism for the first time as well as for more advanced students and researchers
