On the Emergence and Understanding of Asian Global Leadership David De Cremer, 2021-07-05 In the twenty first century it is necessary for Asia to step up and assume a larger leadership role on the global stage commensurate with its economic weight and interests Eighty eight percent of the increase in the numbers of the middle class in the next five years will take place in Asia underscoring the reality that global business and leadership will be colored in significant ways by Asian values approaches and strategies This book explores how this may impact our view and conceptual approach to the notion of global leadership The contributors to this collection explore and examine the concept of global Asian leadership and outcome implications at the societal corporate and policy making level They argue that global leaders will increasingly focus on specific needs values and strategies that are uniquely Asian which emphasizes the reality that we most likely will have to redefine our notion of global leadership This comprehensive study of the integration of Asian and global leadership will benefit those employed in the corporate government and educational sectors as well as a broader audience with an interest in leadership policy making and economics To truly understand Asia one needs to grasp not only its cultural dimensions but also the organizational and societal contexts which provide a training ground and unique challenges and opportunities for Asian leaders In this book leading scholars share the latest thinking and scientific research on exactly these topics Highly recommended for both novices and seasoned executives and scholars Donald L Ferrin Ph D Professor of Organisational Behaviour and Human Resources Lee Kong Chian School of Business Singapore Management University While Asia s rapid economic growth has caught the attention of the world the study of the leadership engine behind the growth has been scarce This book fills the void by assembling a coherent group of insightful articles to explore and explicate how Asian business leadership is different yet also similar to Western business leadership The similarity resides in the meaning of leadership that is the capacity to influence others to achieve a common goal whereas the difference manifests in the means or styles to exert such influence With better and deeper understandings of Asian business leadership this book offers invaluable wisdom to bridge the gap between the East and West for a more prosperous future of all mankind Philip M Condit Endowed Chair Professor in Business Administration Editor in Chief of Management Insights and Incoming Editor in Chief of Management and Organization Review Department of Management and Organization Foster School of Business University of Washington

Philosophy and Leadership Łukasz Sułkowski, Zdzisława Dacko-Pikiewicz, Katarzyna Szczepańska-Woszczyńska, 2024-05-13 Philosophy

and Leadership is an ambitious exploration of leadership's philosophical underpinnings from antiquity to the AI driven future. The book journeys through history, gleaned insights from eminent philosophers and contextualizing their teachings to leadership. The book's foundational premise lies in the symbiosis of philosophy and leadership. Philosophy provides the why that drives the practices and decisions in leadership. This intricate connection is unfolded from the teachings of Confucius on virtue and ethics to the contemporary dialogues of Judith Butler on leadership identity. The book also delves into the evolution of leadership concepts through various eras: medieval times highlighting religious and scholastic perspectives, the Renaissance juxtaposing Machiavellian pragmatism with More's utopian ideals and the Enlightenment era underscoring the importance of duty, skepticism and rationality. An exciting aspect of the narrative is the amalgamation of evolution and leadership. By drawing parallels between Darwin's natural selection and leadership dynamics or Bergson's vitalism and intuitive leadership, the authors present a merger of biological evolution with leadership's ever-evolving paradigms. Finally, the concluding chapters reside in envisioning the future and reflect upon the impending synergy between AI and leadership. They emphasize the importance of amalgamating philosophical wisdom with the promises and challenges brought about by AI. The book will guide readers from the philosophical epochs of yore to the AI predicted leadership paradigms of the future. By intertwining the enduring wisdom of philosophers with the dynamic nature of leadership, this book serves as a beacon for anyone aspiring to lead in any era.
