Philosophical Imagination And Cultural Memory:

Philosophical Imagination and Cultural Memory Patricia Cook, 1993 Does philosophy have a future Postmodern thought with its rejection of claims to absolute truth or moral objectivity would seem to put the philosophical enterprise in jeopardy In this volume some of today's most influential thinkers face the question of philosophy's future and find an answer in its past Their efforts show how historical traditions are currently being appropriated by philosophy how some of the most provocative questions confronted by philosophers are given their impetus and direction by cultural memory Unlike analytic philosophy a discipline supposedly liberated from any manifestation of cultural memory the movement represented by these essays demonstrates how the inquiries narratives traditions and events of our cultural past can mediate some of the most interesting exercises of the present day philosophical imagination Attesting to the power of historical tradition to enhance and redirect the prospects of philosophy these essays exemplify a new mode of doing philosophy The product of a National Endowment for the Humanities Summer Institute in 1990 it is the task of this book to show that history can be reclaimed by philosophy and resurrected in postmodernity Contributors George Allan Eva T H Brann Arthur C Danto Lynn S Joy George L Kline George R Lucas Jr Alasdair MacIntyre Robert C Neville John Rickard Stanley Rosen J B Scheenwind Donald Phillip Verene Cultural Memory and the Construction of Identity Dan Ben-Amos, Liliane Weissberg, 1999 Cultural memory and the Construction of Identity brings together scholars of folklore literature history and communication to explore the dynamics of cultural memory in a variety of contexts Memory is a powerful tool that can transform a piece of earth into a homeland and common objects into symbols The authors of this volume show how memory is shaped and how it operates in uniting society and creating images that attain the value of truth even if they deviate from fact Cultural Memory Studies Astrid Erll, Ansgar Nünning, 2008-08-27 This handbook represents the interdisciplinary and international field of cultural memory studies for the first time in one volume Articles by renowned international scholars offer readers a unique overview of the key concepts of cultural memory studies The handbook not only documents current research in an unprecedented way it also serves as a forum for bringing together approaches from areas as varied as sociology political sciences history theology literary studies media studies philosophy psychology and neurosciences Cultural memory studies as defined in this handbook came into being at the beginning of the 20th century with the works of Maurice Halbwachs on *milieu collectif* In the course of the last two decades this area of research has witnessed a veritable boom in various countries and disciplines As a consequence the study of the relation of culture and memory has diversified into a wide range of approaches This handbook is based on a broad understanding of cultural memory as the interplay of present and past in sociocultural contexts It presents concepts for the study of individual remembering in a social context group and family memory national memory the various media of memory and finally the host of emerging transnational lieux de *milieu* such as 9 11 **Jacques Derrida and the Institution of French Philosophy** Vivienne Orchard, 2017-12-02 Jacques Derrida 1930 2004 was unquestionably one of the

most celebrated and reviled French thinkers of the last thirty years Outside France his influence in comparative literature circles through deconstruction and other ideas has been so profound that his personal role as a leader of contemporary French philosophy has been almost overlooked Perhaps because there is no equivalent in English speaking countries to the timetabling of philosophy in the French education system writers on Derrida outside France have not fully appreciated the importance of this political and cultural struggle In this ground breaking book Orchard examines a hard fought debate of great importance not only to Derrida himself but also to France s idea of what studying philosophy might mean after the student uprisings of 1968

The Penumbra of Personhood G.V. Loewen, 2020-09-17 The drive to overcome nature is a projection of the anxiety about succumbing to our own nature Inevitably this conflict creates a vicious circle For in subduing nature to our technical goals themselves arranged so that our human frailty is to be overcome we end up destroying the world in which we must live Of late we have begun to recognize this viciousness both in our acts and more profoundly in our thoughts Yet the attempt to lose our nature by losing Nature holds an even deeper conflict The most effective means of escaping spiritual trial is to become spiritless and the sooner the better If only taken care of in time everything takes care of itself Kierkegaard 1844 Social philosopher G V Loewen is the author of forty books on ethics education aesthetics religion health and social theory and more recently metaphysical adventure fiction He was a professor in the interdisciplinary human sciences for two decades The Penumbra of Personhood is not only the cumulative effect and expression of the primordial characters of Dasein flung along with my being into the world writes the author it is also the most graceful and eloquent response to the unknown that we possess It is in its own thrown essence the fullest divergence from any violence of the reactionary or technique of the manager It is objectively what we are and thus what we have to offer our own time Ironically the State has to contend not with history the writing of which it mainly controls but rather morality part of the pre State metaphysics and a version of collective human vanity that also claims to be timeless If it is at first striking that even in our time morality has retained such a hold on second glance it is at least not surprising It has ironically become the weapon of the private person and this is very much against its own cosmogonical backdrop Morality is shared as is belief that the one stems from the other and in this they are quite unlike either ethics or opinion also having become the pedestal upon which any demagogue can be placed The uttering of a higher law betrays the moralist at every turn Even if the State can delicately navigate these potentially dangerous currents while affording to ignore mere moral editorializing an inevitable whirlpool in any democracy at least if enough private people recognize that their misgivings are shared morality can once again assume a vestige of its former mantle It becomes a rip tide of conventional wisdom against which this or that elected regime may ride or be ridden over If this is the most vulgar expression of Dasein s will to life and even ontically will to freedom then it cannot be ignored by the reflective person It is the final avenue of appeal in a rationalist social organization Equipped with its own divinity morality finds that it still has some suasion in the courts certainly within many families and in the schools It is society

s back door man to use an old Blues phrase to point up its consistent vulgarity **Memory, History, Justice in Hegel** Angelica Nuzzo,2012-04-05 This reconstruction of the work of dialectical memory in Hegel raises the fundamental question of the principle that presides on the articulation of history and indicates in Hegel s philosophy two alternative models of conceiving history one that grounds history on ethical memory the other that sees justice as the moving principle of history

David Hume Richard Whatmore,2017-05-15 This volume on Hume s politics brings together essays that have been formative of the scholarly and more general debate about Hume s political thought Unlike many theorists who express their thought in terms of system Hume uses the incidental genre of the essay as the vehicle for his writing and his mode of presentation is a reflection indeed an expression of his belief in the limited power of reason to give any over all shape to human life Hume s politics are particularly suited for discussion of a wide range of view points The possibilities of seeing in Hume both the conservative and the liberal are pursued along with Hume s sophisticated analysis of party politics His acute and pioneering theorisation of perhaps the most central issue for 18th century political observers that of commerce and politics is brought out in the context of his ideas of the international order His fundamental theory of justice is discussed in its connection with law property and government Blind Spots G.V. Loewen,2019-08 History has replaced morality Not in point to point substitution but in that something could be timeless either in principle or practice It s likely that the old anxiety concerning one s fate is now itself a mask It is interesting to imagine that a metaphysical source of angst can be more comforting than a quotidian one We are most intolerant of anyone who seeks to be as we are and have what we have yet this too remains somehow a throwback to the previous age of caste child chattel and misogyny so the soteriological sensibility remains compelling It is if anything a much larger mystery than it was before Now and for the first time we must save ourselves *Managing Strategy* Watson, David,2000-03-01 This text sets out what strategic management can and should consist of in a modern essentially democratic university or college and how to make it work It demonstrates how the academy has to adapt to meet the needs of the changing society *Teaching through Images* ,2021-12-20 In ancient didactic poetry poets frequently make use of imagery similes metaphors acoustic images models exempla fables allegory personifications and other tropes as a means to elucidate and convey their didactic message In this volume which arose from an international conference held at the University of Heidelberg in 2016 we investigate such phenomena and explore how they make the unseen visible the unheard audible and the unknown comprehensible By exploring didactic poets from Hesiod to pseudo Oppian and from Vergil and Lucretius to Grattius and Ovid the authors in this collective volume show how imagery can clarify and illuminate but also complicate and even undermine or obfuscate the overt didactic message The presence of a real or implied addressee invites our engagement and ultimately our scrutiny of language and meaning **Christianity and Confucianism** Christopher Hancock,2020-12-10 Christianity and Confucianism Culture Faith and Politics sets comparative textual analysis against the backcloth of 2000 years of cultural political and religious interaction between China and the West

As the world responds to China's rise and China positions herself for global engagement this major new study reawakens and revises an ancient conversation. As a generous introduction to biblical Christianity and the Confucian Classics, Christianity and Confucianism tells a remarkable story of mutual formation and cultural indebtedness. East and West are shown to have shaped the mind, heart, culture, philosophy, and politics of the other and far more perhaps than either knows or would want to admit. Christopher Hancock has provided a rich and stimulating resource for scholars and students, diplomats and social scientists, devotees of culture and those who pursue wisdom and peace today.

Boats on the Marne Prakash Younger, 2017-10-16. *Boats on the Marne* offers an original interpretation of Jean Renoir's celebrated films of the 1930s, treating them as a coherent narrative of philosophical response to the social and political crises of the times. Grounded in a reinterpretation of the foundational film philosopher André Bazin and drawing on work from a range of disciplines—film studies, art history, comparative literature, political and cultural history—the book's coordinated consideration of Renoir's films, writings, and interviews demonstrates his obsession with the concept of romanticism. Renoir saw romanticism to be a defining feature of modernity, a hydra-headed malady which intimately shapes our personal lives, culture, and politics, blinding us and locking us into agonistic relationships and conflict. While mapping the popular manifestations of romanticism that Renoir engaged with at the time, this study restores the philosophic weight of his critique by tracing the phenomenon back to its roots in the work and influence of Jean-Jacques Rousseau, who first articulated conceptions of human desire, identity, community, and history that remain pervasive today. Prakash Younger argues that Renoir's films of the 1930s articulate a multi-stranded narrative through which the director thinks about various aspects of romanticism and explores the liberating possibilities of an alternative paradigm illuminated by the thought of Plato, Montaigne, and the early Enlightenment. When placed in the context of the long and complex dialogue Renoir had with his audience over the course of the decade, masterpieces such as *La Grande Illusion* and *La Règle du Jeu* reveal his profound engagement with issues of political philosophy that are still very much with us today.

Ethics and Politics: Volume 2 Alasdair MacIntyre, 2006-06-08. Alasdair MacIntyre is one of the most creative and important philosophers working today. This volume presents a selection of his classic essays on ethics and politics, collected together for the first time, focussing particularly on the themes of moral disagreement, moral dilemmas, and truthfulness and its importance. The essays range widely in scope, from Aristotle and Aquinas and what we need to learn from them to our contemporary economic and social structures and the threat which they pose to the realization of the forms of ethical life. They will appeal to a wide range of readers across philosophy and especially in moral philosophy, political philosophy, and theology.

Exclusion and Embrace, Revised and Updated Miroslav Volf, 2019-08-20. Life in the twenty-first century presents a disturbing reality. Otherness, the simple fact of being different in some way, has come to be defined as in and of itself evil. Miroslav Volf contends that if the healing word of the gospel is to be heard today, Christian theology must find ways of speaking that address the hatred of the other. Is there any hope of embracing our enemies? Of opening the door to

reconciliation Reaching back to the New Testament metaphor of salvation as reconciliation Volf proposes the idea of embrace as a theological response to the problem of exclusion Increasingly we see that exclusion has become the primary sin skewing our perceptions of reality and causing us to react out of fear and anger to all those who are not within our ever narrowing circle In light of this Christians must learn that salvation comes not only as we are reconciled to God and not only as we learn to live with one another but as we take the dangerous and costly step of opening ourselves to the other of enfolding him or her in the same embrace with which we have been enfolded by God Volf won the 2002 Louisville Grawemeyer Award in Religion for the first edition of his book *Exclusion Embrace A Theological Exploration of Identity Otherness and Reconciliation* Abingdon 1996 In that first edition professor Volf a Croatian by birth analyzed the civil war and ethnic cleansing in the former Yugoslavia and he readily found other examples of cultural ethnic and racial conflict to illustrate his points Since September 11 2001 and the subsequent epidemic of terror and massive refugee suffering throughout the world Volf revised *Exclusion and Embrace* to account for the evolving dynamics of inter ethnic and international strife

Quality in Higher Education Ming Cheng, 2016-09-27 Many countries now employ national evaluation systems to demonstrate publicly that universities provide a quality education However the current processes of quality evaluation are often detached from the practices of teaching and learning In particular those who teach and those who learn still have to be won over to such audit processes This book argues that it is time for the higher education sector to concern itself with the human dimension so as to develop both academic professionalism and students commitment to their learning Based on five completed research projects which explore academics and students experiences and their views of quality evaluation the book argues that developing the intrinsic values of teaching and learning held by academics and students is key to achieving high quality education In this book the author critically reviews the four most frequently used terms related to current quality evaluation fitness for purpose value for money student satisfaction and students as customers and argues for a motivationally intelligent quality approach emphasising the moral dimension and the intrinsic values of academics and students The author also outlines an improved quality evaluation system that encourages and increases academics and students commitment to teaching and learning

Exclusion & Embrace Miroslav Volf, 2010-03-01 Life at the end of the twentieth century presents us with a disturbing reality Otherness the simple fact of being different in some way has come to be defined as in and of itself evil Miroslav Volf contends that if the healing word of the gospel is to be heard today Christian theology must find ways of speaking that address the hatred of the other Reaching back to the New Testament metaphor of salvation as reconciliation Volf proposes the idea of embrace as a theological response to the problem of exclusion Increasingly we see that exclusion has become the primary sin skewing our perceptions of reality and causing us to react out of fear and anger to all those who are not within our ever narrowing circle In light of this Christians must learn that salvation comes not only as we are reconciled to God and not only as we learn to live with one another but as we take the dangerous

On World Politics A. Astrov, 2005-08-11 This book outlines an idea of world politics as an activity of thinking and speaking about the conditions of world order World order is understood not as an arrangement of entities but a complex of variously situated activities conducted by individuals as members of diverse associations of their own Within contemporary International Relations it entails a theoretical position neotraditionalism as a reformulation of the initial traditionalist approach in the wake of rationalism and subsequent reflectivist critique

On Telling Images of China Shane McCausland, Yin Hwang, 2013-11-01 The essays in this volume address a

diverse range of issues in China's narrative art and visual culture mainly from the Ming dynasty 1368-1644 to the present. These studies attend to the complex ways in which images circulate in pictorial media and across boundaries between high art and popular culture images in paintings, prints, stone engravings and posters as well as in film and video art. In addition, the authors examine the roles of ancient exemplary stories and textual narratives as well as their reiteration in the visual arts in early modern and modern social and political contexts. The volume is divided into three sections: Representing Paradigms, Interpreting Literary Themes and Narratives, and the Medium and Modernity. While the essays in each section deal with concerns in the field of China's art history, an editor's introduction serves to position the topic of narrative art and to introduce definitions and genre issues which run through the book. As a whole, the volume invites reflection on the intrinsic nature of narratives and their pictorial lives and presents new research which challenges established views and paradigms.

Subversive Strategies in Contemporary Chinese Art Mary Wiseman, Liu Yuedi, 2011-03-21. What is art and what is its role in a China that is changing at a dizzying speed? These questions lie at the heart of Chinese contemporary art. *Subversive Strategies* paves the way for the rebirth of a Chinese aesthetics adequate to the art whose sheer energy and imaginative power is subverting the ideas through which western and Chinese critics think about art. The first collection of essays by American and Chinese philosophers and art historians, *Subversive Strategies* begins by showing how the art reflects current crises and is working them out through bodies, gendered and political. The essays raise the question of Chinese identity in a global world and note a blurring of the boundary between art and everyday life.
