Philosophical Dialogues Arne Naess And The Progress Of Philosophy:

Philosophical Dialogues Nina Witoszek, Andrew Brennan, 1999 This volume documents the progress of Arne Naess's ecophilosophy from its inception to the late 1990s. It includes Naess's most crucial polemics with leading thinkers drawn from sources as diverse as scholarly articles, correspondence, TV interviews, and unpublished exchanges. The book testifies to the sceptical and self-correcting aspects of Naess's vision, which has deepened and broadened to include third world and feminist perspectives.

Nature Ethics Marti Kheel, 2008 In *Nature Ethics: An Ecofeminist Perspective*, Marti Kheel explores the underlying worldview of nature ethics, offering an alternative ecofeminist approach. Seeking to heal the divisions between the seemingly disparate movements and philosophies of feminism, animal advocacy, environmental ethics, and holistic health, Kheel proposes an ecofeminist philosophy that underscores the importance of empathy and care for individual beings as well as larger wholes.

How Nature Matters Simon P. James, 2022-07-28 *HOW NATURE MATTERS* presents an original theory of nature's value based on part-whole relations. James argues that when natural things have cultural value, they do not always have it as means to valuable ends. In many cases, they have value as parts of valuable wholes, as parts of traditions, for instance, or cultural identities. James develops his theory by investigating twelve real-world cases, ranging from the veneration of sacred trees to the hunting of dugongs. He also analyses some key policy-related debates and explores various fundamental issues in environmental philosophy, including the question of whether anything on earth qualifies as natural. This accessible, engagingly written book will be essential reading for all those who wish to understand the moral and metaphysical dimensions of environmental issues.

The Power of the Periphery Peder Anker, 2020-05-28 What is the source of Norway's culture of environmental harmony in our troubled world? Exploring the role of Norwegian scholar-activists of the late twentieth century, Peder Anker examines how they portrayed their country as a place of environmental stability in a world filled with tension. In contrast with societies dirtied by the hot and cold wars of the twentieth century, Norway's power, they argued, lay in the pristine ideal natural environment of the periphery. Globally, a beautiful Norway came to be contrasted with a polluted world and fashioned as an ecological microcosm for the creation of a better global macrocosm. In this innovative interdisciplinary history, Anker explores the ways in which ecological concerns were imported via Rachel Carson's *Silent Spring* in 1962, then to be exported from Norway back to the world at the Earth Summit in Rio de Janeiro in 1992. This title is also available as Open Access on Cambridge Core.

Indigenous Knowledges and the Sustainable Development Agenda Anders Breidlid, Roy Krøvel, 2020-04-17 This book discusses the vital importance of including indigenous knowledges in the sustainable development agenda. In the wake of colonialism and imperialism, dialogue between indigenous knowledges and Western epistemology has broken down time and again. However, in recent decades, the broader indigenous struggle for rights and recognition has led to a better understanding of indigenous knowledges, and in 2015 the Sustainable Development Goals (SDGs) outlined the importance of indigenous engagement in contributing to the implementation of the agenda. Drawing

on experiences and field work from Africa Asia Latin America and Europe Indigenous Knowledges and the Sustainable Development Agenda brings together authors who explore social educational institutional and ecological sustainability in relation to indigenous knowledges In doing so this book provides a comprehensive understanding of the concept of sustainability at both national and international levels from a range of diverse perspectives As the decolonizing debate gathers pace within mainstream academic discourse this book offers an important contribution to scholars across development studies environmental studies education and political ecology The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Connection to Nature, Deep Ecology, and Conservation Social Science Christian Diehm, 2020-12-15 In *Connection to Nature Deep Ecology and Conservation Social Science Human Nature Bonding and Protecting the Natural World* Christian Diehm analyzes the relevance of the philosophy of deep ecology to contemporary discussions of human nature connectedness Focusing on deep ecologists notion of identification with nature Diehm argues that deep ecological theory is less conceptually problematic than is sometimes thought and offers valuable insights into what a sense of connection to nature entails what its attitudinal and behavioral effects might be and how it might be nurtured and developed This book is closely informed by and engages at length with conservation social science which Diehm draws on to assess the claims of deep ecology theorists resolve long standing problems associated with their work investigate the impacts of time outdoors on human nature bonding and critically review the biophilia hypothesis Emphasizing the foundational role of ecologically inclusive identities in pro environmental attitudes and behaviors Diehm demonstrates that having a sense of connection to nature is more important than many environmental advocates have realized and that deep ecology has much to add to the increasingly pressing conversations about it

The Environment and International Politics Hakan Seckinelgin, 2005-11-17 This new study shows how environmental issues represent a deep problem in conceptualising the relationship between human beings and nature This key relationship grounds the implicit ethical and political concerns of International Relations and our understandings of environmental politics It demonstrates that the core theoretical orientations of the study of International Relations are not only incapable of understanding and responding to contemporary problems but are profoundly complicit in creating the ecological problems in the first place This major book develops a sense of these realities based on the thinking of Martin Heidegger It forwards new ways of rethinking the environmental questions and addresses crucial issues such as sovereignty the International Law of The Sea the Kyoto Protocol Northern Alaskan oil exploration and exploitation and the impact of the United Nations Convention on the Law of The Sea III This is essential specialist reading for readers concerned with the environment

Breathing with Luce Irigaray Lenart Skof, Emily A. Holmes, 2013-08-15 Contributors to this volume consider the implications of the Age of Breath a spiritual shift in human awareness to the needs of the other figured through breathing Awareness of the breath allows us to attend to our bodies and

the bodies of others to animals nature other cultures oppressed minorities and the other of sexual difference As a way to connect body and spirit self and other nature and culture and East and West breathing emerges as the significant theological and philosophical gesture of our time Philosophy has too often cut off metaphysical thought from this living breathing world with its animal and female bodies just as religious traditions have repressed the breathing flesh in favour of calcified word The re introduction of breath into philosophy and theology draws our awareness back to the body to respect for the other and to nature making awareness of the breath essential for an embodied ethics of difference in our globalized ecological age These themes are addressed by an international team of scholars including Luce Irigaray **Understanding**
