

## VALUE OF PHILOSOPHY- BERTRAND RUSSELL ESSAY

Written by: Shreya Grover

Bertrand Russell explains in his article that the value of philosophy is not in the definite answers, but in the questions and possibilities that it raises. He states that "The value of philosophy is, in fact, to be sought largely in its very uncertainty." He says that for many people philosophy is nothing but endless discussions and controversies, people have this view majorly because of the misconceptions they have about the actual goals and achievements of philosophy. Physical sciences are valued for the utility they provide to the people of the society, everyone realizes this utility as the effects of physical science are benefiting them directly or indirectly even if they do not completely understand the physical sciences. The true value of philosophy according to him lies with the students of philosophy, whose lives are affected by it.

He further explains that to succeed in understanding the true value of philosophy one needs to ignore the prejudices of the 'practical man' he uses this term to describe people who only recognize material needs and fails to understand the needs of the mind. According to him philosophy can be a tool to create a valuable society.

He admits that philosophy does not provide definite answers like other sciences, and as soon as some definite knowledge related to a subject appears, it is channeled into a separate science example: Newton's work is called 'mathematical principles of natural philosophy', the study of heavens- astronomy and the study of the human mind- psychology. It is clear to notice how questions with definite answers get separated from philosophy while the uncertain ones remain within it. The uncertainty of philosophy is what makes it intriguing and worth arguing for or against, what if there are no definite answers? Many answers are not demonstrably true but it is a part of philosophy and there is a need to create awareness about them and he encourages to not give up the quest of finding answers to such questions, this frees the individual from the bounds of customs. Habit and self-interest should be eliminated to discourage any kind of contemplation. He says that true philosophical contemplation finds satisfaction in everything but self. A person studying philosophy will attain a 'freedom of mind' with which the person can examine things without a personal gain frame of mind, purely to attain knowledge. This contemplation teaches individuals to be citizens of the world, and it is in this citizenship that lies true freedom.

In conclusion, I think that philosophy teaches us to see the world from a bigger perspective, and that however difficult it maybe we should never back down from finding answers to our questions. Russell also says that philosophy should not be studied just for the sake of finding definite answers, as no definite answers can be known to be true, such questions enlarge our perspective and enrich our imagination.

**The Leibniz-Des Bosses Correspondence** G. W. Leibniz, 2007-01-01 This volume is a critical edition of the ten

year correspondence 1706-1716 between Gottfried Wilhelm Leibniz one of Europe's most influential early modern thinkers and Bartholomew Des Bosses a Jesuit theologian who was keen to bring together Leibniz's philosophy and the Aristotelian philosophy and religious doctrines accepted by his order. The letters offer crucial insights into Leibniz's final metaphysics and into the intellectual life of the eighteenth century. Brandon C. Look and Donald Rutherford present 71 of Leibniz's and Des Bosses' letters in the original Latin and in careful English translation. Few of the letters have been translated into English before. The editors also provide extensive annotations, deletions and marginalia from Leibniz's various drafts and a substantial introduction setting the context for the correspondence and analysing the main philosophical issues. **Life and**

**Roger North's Notes on Newton and Correspondence with Samuel Clarke c.1704-1713** Jamie C. Kassler, 2016-04-01. In the early 1690s Roger North was preparing to remove from London to Rougham, Norfolk, where he planned to continue his search for truth, which for him meant knowledge of nature including human nature. But this search was interrupted by three events. First, between c. 1704 and the early part of 1706, he read Newton's book on rational quantitative mechanics and

afterwards his book on optics in Clarke's Latin translation. Second, towards the latter part of 1706 he and Clarke, a Norfolk clergyman, corresponded about matters relating to Newton's two books, after which Clarke removed to London and the correspondence ceased. Third, in 1712 North received a letter from Clarke requesting him to read and respond to his new publication on the philosophy of the Godhead. As Kassler details, each of these events presented a number of challenges to North's values as well as the way of philosophising he had learned as a student and practitioner of the common law. Because he never made public his responses to the challenges, her book also includes editions of North's notes on reading Newton's books as well as what now remains of the 1706 and later correspondence with Clarke. In addition, she presents analyses of some of North's second thoughts about the issues raised in the notes and 1706 correspondence and, from an examination of Clarke's main writings, provides a context for understanding the correspondence relating to the 1712 book.
