# From guidelines to action: implementation opportunities and realities

El-Sadr, Wafaa

ICAP, Columbia University, New York, NY, USA.

The past decade has seen notable progress in confronting the HIV epidemic. By the end of 2013, almost 13 million persons living with HIV had access to antiretroviral therapy (ART) in low- and middle-income countries (LMIC). In addition, progress has also been achieved in terms of HIV prevention with 26 LMIC achieving a 50% decrease in number of new infections including 15 countries in sub-Saharan Africa. New research findings also offer new efficacious prevention interventions that offer new opportunities for further mitigation of new HIV infections. Such progress has inspired ambitious pronouncements such as achieving “The End of AIDS” or “An AIDS Free Generation.” This progress has also motivated the development of new guidelines aimed to achieving these goals. Implementation of guideline recommendations, however, requires translation of these guidelines into actionable steps and then their successful delivery within established health services. The opportunities offered by new guidelines frequently meet the realities of the frailties of the health system. Achieving current ambitious global targets must confront the specific deficits in the health system that inhibit access and acceptability of programmes as well as hinder achievement of high quality or desired coverage.

abandonment of higher authority had radical effects on American society influencing not only the broader world of Christianity but also such disparate arenas as government law health care and the very vocabulary of American culture As this book astutely reveals today s debates over political power religious freedom gay rights and more are all deeply infused by the language and concepts outlined by these pioneers of personal conscience **The Book Buyer's Guide** ,1967

**Mental Reality, second edition, with a new appendix** Galen Strawson,2009-10-09 An argument against neobehaviorism and for naturalized Cartesianism which couples a wholly materialist approach to the mind with a fully realist attitude to the phenomena of conscious experience In Mental Reality Galen Strawson argues that much contemporary philosophy of mind gives undue primacy of place to publicly observable phenomena nonmental phenomena and behavioral phenomena understood as publicly observable phenomena in its account of the nature of mind It does so at the expense of the phenomena of conscious experience Strawson describes an alternative position naturalized Cartesianism which couples the materialist view that mind is entirely natural and wholly physical with a fully realist account of the nature of conscious experience Naturalized Cartesianism is an adductive as opposed to reductive form of materialism Adductive materialists don t claim that conscious experience is anything less than we ordinarily conceive it to be in being wholly physical They claim instead that the physical is something more than we ordinarily conceive it to be given that many of the wholly physical goings on in the brain constitute literally are conscious experiences as we ordinarily conceive them Since naturalized Cartesianism downgrades the place of reference to nonmental and publicly observable phenomena in an adequate account of mental phenomena Strawson considers in detail the question of what part such reference still has to play He argues that it is a mistake to think that all behavioral phenomena are publicly observable phenomena This revised and expanded edition of Mental Reality includes a new appendix which thoroughly revises the account of intentionality given in chapter 7 **Media Criticism in a Digital Age** Peter B.
