Chemical Separation Technologies and Related Methods of Nuclear Waste Management Gregory R. Choppin,Mikhail Kh. Khankhasayev,1999-02-28 Separation technologies are of crucial importance to the goal of significantly reducing the volume of high level nuclear waste thereby reducing the long term health risks to mankind International co operation including the sharing of concepts and methods as well as technology transfer is essential in accelerating research and development in the field The writers of this book are all internationally recognised experts in the field of separation technology well qualified to assess and criticize the current state of separation research as well as to identify future opportunities for the application of separation technologies to the solution of nuclear waste management problems The major emphases in the book are research opportunities in the utilization of innovative and potentially more efficient and cost effective processes for waste processing treatment actinide speciation separation methods technological processing and environmental restoration *Research and Development on Radioactive Waste Management and Storage* ,1983 **Testing, Evaluation, and Shallow Land Burial of Low and Medium Radioactive Waste Forms** Wolfgang Krischer,Rainer Simon,1984 **Management of Plutonium Contaminated Waste** G.
