The Oxford Handbook of Evidence-based Crime and Justice Policy Brandon Welsh, Steven N. Zane, Daniel P. Mears, 2024 An evidence based approach to crime and justice policy can go a long way toward ensuring that the best available research is considered in decisions that bear on the

public good However the term evidence based is characterized by a great deal of rhetoric Indeed there remains a marked disjuncture between calls for evidence based policy and an understanding of what it means for policy to be evidence based The calls for evidence based policy nonetheless provide a powerful foundation for propelling a movement toward bringing about rational cost effective and humane policies for the betterment of society This handbook showcases the state of research on evidence based crime and justice policy and the challenges that impede its creation and use The volume has three core objectives to promote new and productive ways to think about evidence based policy to demonstrate how research can contribute to and guide evidence based policy in juvenile justice criminal justice and alternatives to system responses and to identify strategies that can increase reliance on evidence based policy To meet these objectives each chapter is guided by several central questions What do we know about evidence based policy and practice in crime and justice How can we improve knowledge of evidence based policy and practice How can we promote more use of evidence based policy and practice Taken as a whole the volume emphasizes the critical need for policies that are grounded in high quality research that address critical research gaps and that fully acknowledge the limitations of what extant research can do to inform policy decisions

Institutional Violence Deane Curtin, Robert Litke, 2022-05-20 Violence can be

physical and psychological It can characterize personal actions forms of group activity and abiding social and political policy This book includes all of these aspects within its focus on institutional forms of violence Institution is also a broad category ranging from formal arrangements such as the military the criminal code the death penalty and prison system to more amorphous but systemic situations indicated by parenting poverty sexism work and racism Violence is as complex as the human beings who resort to it its institutional forms pervade our relational lives We are all participants in it as victims and perpetrators The chapters in this book were written in the hope that violence can be explicated even if not fully understood and that such clarification can help us in devising less violent forms of living even if it does not lead to its total abolition The studies bring new aspects of violence to light and offer a number of suggestions for its remedy The Reporter's Handbook Steve Weinberg,1996 Reporters editors and journalists will find this third edition of The Reporter s Handbook an even more impressive resource than prior editions This essential tool for serious journalists identifies hundreds of documents and human sources in both private and government sectors It provides step by step methods for tracking paper trails people trails and computer trails The book also includes coverage of library research computer assisted reporting case studies anecdotes and IRE contest winning pieces This new edition features chapters on the environment transportation housing financial institutions international investigation utilities and non profit organizations Under the sponsorship of Investigative Reporters and Editors Inc Steven Weinberg has revised and polished this journalism classic into a must have reference guide for the classroom and the newsroom Creating Sanctuary Sandra L Bloom,2013-04-12 Creating Sanctuary is a description of a hospital based program to treat adults who had been abused as children and the revolutionary knowledge about trauma and adversity that the program was based upon This book focuses on the biological psychological and social aspects of trauma Fifteen years later Dr Sandra Bloom has updated this classic work to include the groundbreaking Adverse Childhood Experiences Study that came out in 1998 information about Epigenetics and new material about what we know about the brain and violence This book is for courses in counseling social work and clinical psychology on mental health trauma and trauma theory *The Reinvention of Policing* William R. Kelly,Daniel P. Mears,2023-07-03 Written in an accessible style this book provides a historically grounded critique of American policing and offers implementable solutions providing students a comprehensive understanding of modern policing Contemporary policing is in crisis a situation that has led to persistent calls to reform it Unfortunately many proposed solutions focus on piecemeal changes that ignore a fundamental problem policing relies on a largely reactive approach that does not in any systematic or comprehensive way focus on crime prevention Most of what the police do such as responding to 911 calls for service and employing directed patrols or hot spots policing fails to address the causes of crime Compounding this problem is the absence of any institution or agency charged with prioritizing the prevention of crime and for ensuring that police efforts support this goal A central distinguishing feature of this book is its comprehensive approach and the emphasis on policing as part of a much broader set of changes that must occur both to

improve policing and to improve public safety and justice This approach includes retaining what works eliminating what does not drawing on evidence based policy from around the world and creating systemic changes that institutionalize better policing accountability and evaluation processes for ensuring that the police are effective The Reinvention of Policing can be used in courses focused on policing policy and practice specifically when discussing the nature of policing how policing may reflect and contribute to inequality and injustice or how it might improve these social problems
