Railroading At Its Wildest:

Early Illinois Railroads William K. Ackerman, 1884 Official Proceedings of the New York Railroad Club New York Railroad Club, 1915 **Cartographies of Travel and Navigation** James R. Akerman, 2010-11-15 Finding one's way with a map is a relatively recent phenomenon. In premodern times maps were used if at all mainly for planning journeys in advance not for guiding travelers on the road. With the exception of navigational sea charts the use of maps by travelers only became common in the modern era indeed in the last two hundred years maps have become the most ubiquitous and familiar genre of modern cartography. Examining the historical relationship between travelers navigation and maps *Cartographies of Travel and Navigation* considers the cartographic response to the new modalities of modern travel brought about by technological and institutional developments in the twentieth century. Highlighting the ways in which the travelers operators and planners of modern transportation systems value maps as both navigation tools and as representatives of a radical new mobility this collection brings the cartography of travel by road sea rail and air to the forefront placing maps at the center of the history of travel and movement. Richly and colorfully illustrated *Cartographies of Travel and Navigation* ably fills the void in historical literature on transportation mapping.

Railroads of Nevada and Eastern California David F. Myrick, 2016-07-05 Valuable as these volumes are in relation to railroad operations in Nevada and California their usefulness as authoritative reference sources embraces a much broader scope. *Railroads of Nevada and Eastern California* is as much a history of the region as it is a study of the railroads. The principal mines and mills and their production are scrupulously detailed together with the personalities who created them. The final volume in the complete history of Nevada and Eastern California railroads David Myrick's monumental railroad histories have become essential reference works for railroaders historians and hobbyists. Volume III contains additional information about the northern roads including some not covered in previous volumes and about developments since the publication of the first two volumes in the railroads of the region. It provides new facts gleaned from the correspondence of Collis P. Huntington one of the builders of the Central Pacific and Southern Pacific railroads. It also covers roads connected with the lumber industry and the construction of electric power plants and Southern Pacific branch lines including some that never advanced beyond surveys.
