Regional Development In Greece:

Regional Development in Greece N. Konsolas, A. Papadaskalopoulos, I. Plaskovitis, 2012-12-06 This book is based on the Regional Section of the Development Plan 2000 2006 prepared by the Regional Development Institute according to the Greek Ministry of National Economy's directions and available data The different development proposals coming from the Country's Regions were also taken into account The information contained in the Regional Development Institute's database and the conclusions of the studies made by the Institute's collaborators were also used The thematic maps in this edition were also produced by the Regional Development Institute's GIS Geographical Information System laboratory The Development Plan 2000 2006 was submitted by the Ministry of National Economy to the European Union in September 1999 and represents the basis for the 3rd Community Support Framework's acceptance The book is organized into four parts Part one contains six chapters reflecting the evolution of the Greek and European Regional Policy as well as the trends for the coming period More specifically the first part refers to the Greek Regional Policy of the 1950 1985 period the EEC Regional Policy the twenty years of Operational Programme 1986 2006 the evolution of the main objectives and priorities for this period the evolution of means and processes and the new trends in Regional Policy and Planning In the second part the basic figures and trends of Regional Development in Greece are analysed Specifically we refer here to the population concentration the regional distribution of GDP the employment and unemployment rates and the sector specialisation *Regional Analysis and Policy* Harry Coccossis, Yannis Psycharis, 2009-08-29 Regional development is attracting the attention of policy makers and scientists again as regions urban centers and rural areas experience substantial pressures particularly in Europe as a consequence of globalization and geopolitical changes which lead to changes in spatial structures and dynamics This book is based on the contributions of Greek regional science research presented at the 2006 Congress of the European Regional Science Association at Volos Greece The contributions selected to be presented in this book address these changes offering a fresh look into regional development They provide an overview of regional development concerns from Greek regional scientists but the issues discussed pervade Greek particularities and stimulate thinking about regional science regional development and regional policy in the early twenty first century *Regional Analysis and Policy* Harry Coccossis, Yannis Psycharis, 2008-08-02 Regional development is attracting the attention of policy makers and scientists again as regions urban centers and rural areas experience substantial pressures particularly in Europe as a consequence of globalization and geopolitical changes which lead to changes in spatial structures and dynamics This book is based on the contributions of Greek regional science research presented at the 2006 Congress of the European Regional Science Association at Volos Greece The contributions selected to be presented in this book address these changes offering a fresh look into regional development They provide an overview of regional development concerns from Greek regional scientists but the issues discussed pervade Greek particularities and stimulate thinking about regional science regional development and regional

policy in the early twenty first century **Agriculture and Regional Development in Greece** Dimitrios Kyrkilis, Simeon Semasis, 2012 This paper attempts to explore the effects of post war economic development model followed in Greece The model is characterized by both the neglect of Greek agriculture and the emphasis on industrialization mainly around the two major cities Athens and Thessaloniki The model has to develop a strong industrial sector but to inflate services and it devastated agriculture At the regional level the uneven growth path that has been adopted perpetuated between urban and tourist areas on the one hand and the rural regions on the other Problems of Greek Regional Development Benjamin N. Ward, 1962 **Regional Prospects in Greece** Nicholas Konsolas, 1993 **Greece** Antonis Tritsis, 1963 **OECD Territorial Reviews Regional Policy for Greece Post-2020** OECD, 2020-10-01 The Territorial Review of Greece offers analysis and policy guidance to strengthen regional development and well being It examines Greece s regional development framework the EU Cohesion policy and multilevel governance in Greece Since the global financial crisis Greece has undertaken an impressive number of structural reforms Recovery initiated in 2017 but the current COVID 19 pandemic is slowing down Greece s efforts **Routledge Revivals: Regional Development in Western Europe (1975)** Hugh Clout, 2017-11-22 First published in 1975 this book provides a straightforward examination of regional differences and regional development in the countries of Western Europe Professor Clout divides this into two parts The first examines a series of themes with reference to the whole of Western Europe and the second part discusses regional development in individual countries or groups of countries Contributions by experts from the UK and from mainland Europe present an essentially geographic approach combining thematic and country by country discussions *European Regional Growth* Bernard Fingleton, 2013-06-29 Looking into the future and trying to visualize long run regional disparities is difficult There is no agreed single theory to guide our model building although some insight can be gained from analysis of the past and by looking at the different theoretical positions to see if there is any agreement at least in terms of outcome if not in terms of mechanism This is what is attempted in this book which brings together specialists with a common interest in European regional growth and in applying quantitative analytical and simulation techniques in order to provide different perspectives on the topic Many of the Chapters in the book employ the methods of spatial econometrics Spatial econometrics is a suite of statistical and econometric tools dedicated to the analysis of spatial data in other words data that is set within the context of socio economic theories and which can be represented most informatively in mapped form These methods have emerged over the last half century from a series of influential papers and books in the fields of regional science spatial statistics and quantitative geography and are ripe for serious application in the context of the EU s development In particular they provide the means by which to analyze spatially indexed data where the time dimension is essentially suppressed because for instance the variables of interest are not available or are of questionable accuracy which is often the case when one is interested in regional rather than national variations across a number of countries The Competitive Advantage of Greece

Ioannis Konsolas,2017-10-05 This title was first published in 2002 This compelling text is the first major application of Michael Porter's diamond framework to identify the sources of national competitive advantage in the case of Greece Offering a useful evaluation of Porter's theory through an extensive literature review the book also draws on empirical evidence from five selected Greek industries It also provides information and commentary on many aspects of the Greek economy its historical evolution and its current trends International and Greek investors international organizations business consultants and financial institutions will certainly benefit from this analysis of the Greek economic environment Moreover universities and researchers will be interested in the evidence supporting or refuting parts of the widely used and cited diamond framework

Compromise Planning : A Theoretical Approach from a Distant Corner of Europe Louis C. Wassenhoven, 2022-03-28 The purpose of the book is to elaborate a planning theory which departs from the plethora of theories which reflect the conditions of developed countries of the North West The empirical material of this effort is derived from a country Greece which sits on the edge between North West and South East at the corner of Europe No doubt there is extensive international literature on planning theory in general from a bewildering variety of viewpoints The interested professional or student of urban and regional planning is certainly aware of the dizzying flood of books articles and research reports on planning theory and of their never ending borrowing of obscure concepts from more respectable scientific disciplines from mathematics to philosophy and from physics to economics human geography and sociology He or she probably observed that there is a growing interest in theoretical approaches from the viewpoint of the so called Global South The author of the present book has for many decades faced the impasse of attempting to transplant theories founded on the experience of the North West to countries with a totally different historical political social and geographical background He learned that the reality that planners face is unpredictable patchy and responsive to social processes frequently of a very pedestrian nature Planning strives to deal with private interests which planners are keen to envelop in a single public interest which is extremely hard to define The behaviour of the average citizen far from being that of the neoclassical model of the homo economicus is that of an individual a kind of homo individualis who interacts with the state and the public administration within a complex web of mutual dependence and negotiation The state and its administrative apparatus i e the key determinants and fixers of urban and regional planning policy bargain with this individual offer inducements exemptions derogations and privileges deviate unhesitatingly from their grand policy pronouncements but still defend the rationality and comprehensiveness of the planning system they have legislated and operationalized It is by and large a successful *modus vivendi* but only thanks to a constant practice of compromise Hence the term compromise planning which the author coined as an alternative to all the existing theoretical forms of planning This is the sort of planning and of the accompanying theory with which he deals in this book It is the outcome of experience and knowledge accumulated in a long personal journey of academic teaching in England and Greece research and professional involvement

challenges It offers a case study developing integrated policies for unemployment for prevention of diversification of rural areas and for provision of solutions to the problem of increasing competition while enhancing environmental quality and making rational use of productive resources **Regional Development** ,1982
