Dash, 2008-02-19 The dramatic surge in regional integration schemes over the past two decades has been one of the most important developments in world politics This book examines regionalism in South Asia exploring the linkages between institutional structures government capabilities and domestic actors preferences to explain the dynamics of regional cooperation      Strengthening Regional Trade Integration in South Asia Owais Hasan Khan, 2021-03-05 This book brings

forth the philosophical conceptual and practical contours of the trade regionalism provisions under the GATT WTO It analyses SAARC as the regional integration organisation of South Asia along with identifying major challenges and bottlenecks faced by it in the process of achieving regional integration It presents ways and methods through which SAARC can be made a more effective regional organisation The book predominantly focuses on trade regionalism However other areas of integration which have impacts on the trade regionalism are also examined like social and political integrations etc The book takes off from the premise that trade regionalism under SAARC has failed and has been marred by political and security concerns among its member nations It has failed to achieve its objective on all the three counts which are promoting peace development and economic cooperation However with the developing countries as members SAARC has great potential for trade integration Certain structural normative and organisation alteration along with favourable ideation can still make SAARC achieve its full potential The book also deals with the comparative analysis of SAARC regional integration with the regional integration under European Union and ASEAN Regarding comparative regionalism the discussion has been confined only to the EU and ASEAN The EU has been chosen because it is comparatively established as one of the most successful regional organisations in the contemporary world Whereas ASEAN has been chosen because of its similarity to the SAARC s economy society and political structure The analysis presented in the book is from the perspectives of international law and international relations theories and practise This book thus is of particular relevance to the students researchers academicians policymakers and practitioners of international trade law international relations and South Asian studies

Political Economic Perspectives of China's Belt and Road Initiative Christian Ploberger, 2019-07-30 The book begins with an overview on China s Belt and Road Initiative highlighting its complex character as a domestic and international development strategy and offering an up to date evaluation of it In response to this complexity the book attempts to highlight the Belt and Road Initiative s double character and how it will address primary domestic development challenges that the Chinese government is facing by adding an international focus to a domestic development strategy This in turn supports the understanding of China s political economic policy and strategy formulation by reminding that supporting China s domestic development is still the primary task of its government Even as the domestic aspect of the Belt and Road Initiative is highlighted its regional and international relevance cannot be ignored either The Belt and Road Initiative will support a continuation of the persisting debate about the impact that China s rise generates and to what extent China can be characterised as a satisfied status quo power or a dissatisfied revisionist power In this context the book draws attention to the various impacts that the Belt and Road Initiative generates in different regional settings However the book also identifies some of the limitations that China s Belt and Road Initiative encounters despite the seemingly convincing economic goals it offers and explains why a few of the countries like India are resisting the lure
