Summary

Regional integration theory seeks to explain the establishment and development of regional international organizations. Key questions are why and under which conditions states decide to transfer political authority to regional organizations, how regional organizations expand their tasks, competencies, and members, and what impact they have on states and societies in their regions. Whereas regional integration theory started with a broad comparative regional and organizational scope in the 1950s and 1960s, it has since focused on European integration and the European Union.

The main (families of) theories explaining the development of European integration – rather than decision-making and policy-making in the EU – are intergovernmentalism, neofunctionalism and postfunctionalism. The key debates in regional integration theory have taken place between variants of intergovernmentalist and neofunctionalist integration theory. Intergovernmentalism assumes national governments to be the key actors in regional integration. Governments use regional integration to maximize their national security and economic interests in the context of regional interdependence. Integration outcomes result from intergovernmental bargaining and reflect the regional preference and power

research with the continued expansion of the European Union as well as an increased number of regional organizations around the globe This paper will seek to use both Europe and East Asia as illustrations in order to better comprehend the driving forces behind integration as well as why some regions are further integrated than others The purpose of this research is to achieve a better understanding of what causes regional integration in hopes of developing a more inclusive theory More specifically it aims to see how integrated the region of East Asia is in particular when compared to Europe Through comparing the two regions and analyzing factors in both Europe and East Asia as determined by current integration theory this research aims to achieve a better understanding of the driving forces behind regional integration as an international phenomenon My research is an attempt to tie together the multiple existing theories of regional integration with the goal of creating a more cohesive and measurable theory With an increased understanding of regional integration we will be better able to both explain and predict integration in both Europe and East Asia as well as other less integrated regions around the world

The Theory of Multi-level Governance Simona Piattoni, 2010-02-25

This book explores the theoretical issues, empirical evidence and normative debates elicited by the concept of multi-level governance (MLG). The concept is a useful descriptor of decision-making processes that involve the simultaneous mobilization of public authorities at different jurisdictional levels as well as that of non-governmental organizations and social movements. It has become increasingly relevant with the weakening of territorial state power and effectiveness and the increase in international interdependencies which serve to undermine conventional governmental processes. This book moves towards the construction of a theory of multi-level governance by defining the analytical contours of this concept, identifying the processes that can uniquely be denoted by it and discussing the normative issues that are raised by its diffusion, particularly in the European Union. It is divided into three parts, each meeting a specific challenge: theoretical, empirical, normative. It focuses on three analytical dimensions: multi-level governance as political mobilization, politics as authoritative decision-making, policy and as state restructuring. Three policy areas are investigated in vindicating the usefulness of MLG as a theoretical and empirical concept: cohesion, environment, higher education, with particular reference to two member states, the UK and Germany. Finally, both the input and output legitimacy of multi-level governance decisions and arrangements and its contribution to EU democracy are discussed. As a loosely coupled policy-making arrangement, MLG is sufficiently structured to secure coordination among public and private actors at different jurisdictional levels yet sufficiently flexible to avoid joint decision traps. This balance is obtained at the cost of increasingly blurred boundaries between public and private actors and a change in the established hierarchies between territorial jurisdictions.

The Nemesis of Power Harald Kleinschmidt, 2000 The Nemesis of Power is the first book to look at the history of international relations theories Many theorists have investigated the nature of power studying it in its social political economic intellectual and physical contexts in order to define it Rather than present yet another definition Harald Kleinschmidt shows how the theorists themselves have perceived and handled the concept of power and how conduct in international relations has been evaluated Taking a broad look at international relations theories from the Roman Empire to the modern transformation of the European world picture Kleinschmidt bridges the gap between theory and history by subjecting theory to the logic and method of historical inquiry Drawing on original sources he reads international relations theories against their social and cultural contexts placing an emphasis on the ways in which changes in theory are reflections of a wider pattern of changes in culture
