Regional Unemploymentjob Matching And Migration:

Regional Unemployment, Job Matching and Migration Graham Crampton, 1999 *Regional Labor Market Developments in Transition* Peter Huber, 2006 The author analyzes regional labor market disparities in transition by presenting some data and summarizing existing literature He finds that large and persistent regional labor market disparities developed in virtually all transition countries and that there is some evidence of polarization Differences in starting conditions and market access seem to be the major reasons for regional divergence in transition Furthermore regional wages are only slightly more flexible than in many European Union labor markets interregional migration is low and capital seems to move toward high wage and low unemployment urban centers rather than to the most backward regions Policy should thus take a long run perspective on the existing regional disparities focus on removing barriers to mobility review existing institutions for implementing regional policy and aim at a close coordination of regional and labor market policy instruments World Bank web site

Regional unemployment disparities in Germany Marcus Kunz, 2012-01-10 Weder empirische Daten noch die konomische Theorie geben klare Anhaltspunkte wie sich regionale Disparitäten entwickeln und welche politischen Maßnahmen angebracht sind um diese zu reduzieren Dies gilt insbesondere für Deutschland wo die Wiedervereinigung zwischen West und Ostdeutschland im Jahr 1990 die regionalen Arbeitslosigkeitsunterschiede deutlich verstärkt hat Vor diesem Hintergrund stellt Marcus Kunz drei zentrale Fragen 1 Zeigen Arbeitslosenquoten in den Kreisen und Regionen Deutschlands regionale Konvergenz oder Divergenz 2 Wie erfolgt die Anpassung von Kreisen und Regionen nach einem regionalen Arbeitsmarktschock 3 Welche Faktoren sind für die regionalen Arbeitslosigkeitsunterschiede in Westdeutschland verantwortlich Im Gegensatz zu anderen Studien über regionale Arbeitslosenquoten in Deutschland die sich ausschließlich auf größere Regionen konzentrieren zeichnet die Studie von Kunz ein detaillierteres empirisches Bild da der Fokus auf der Entwicklung der Kreisebene liegt wo die Unterschiede besonders ausgeprägt sind Publikationssprache Englisch

Perspectives on Regional Unemployment in Europe Mr. Paolo Mauro, Mr. Eswar Prasad, Mr. Antonio Spilimbergo, 1999-05-17 The third stage of European Economic and Monetary Union EMU was implemented in January 1999 against the specter of persistently high unemployment in many of the participating countries While the high European unemployment has received considerable attention this new IMF staff study analyzes an equally important issue the extent of regional unemployment disparities in certain countries The paper focuses on large and persistent differences in regional unemployment rates within several European countries The paper includes detailed case studies of two euro area countries where regional disparities in unemployment are striking Italy and Spain The studies emphasize that wages are unresponsive to local labor market conditions

Unemployment Persistence and Mismatch Raquel Fonseca, 2002 Since the mid 1970s Spain has suffered from persistently high unemployment as it has occurred in other parts of Europe Although during the last few years the unemployment level has declined there are still enormous disparities in the unemployment rate across groups

skills and regions This thesis attempts to shed some light on the mechanisms of unemployment persistence and skill and regional mismatch in Spain Chapter 1 provides a first introductory analysis of Spanish data The chapter emphasises the importance of skill and regional mismatch which may have contributed about fifty percent to the observed increase in total unemployment over the last twenty years The chapter also studies the cyclical pattern in the Spanish unemployment which is a very important aspect in view of its magnitude The following three chapters are devoted to the evaluation of different mechanisms that may have been at work In all three chapters the analysis relies on the specification calibration and simulation of dynamic general equilibrium models with matching on the labour market Chapter 2 focuses on cyclical fluctuations with particular emphasis on the role of reallocation shocks Chapter 3 focuses on skill mismatch more precisely the chapter investigates to what extent unemployment rate disparities across skill groups can be explained in terms of a ladder effect Chapter 4 focuses on regional disparities A model is built to investigate the possible determinants of regional disparities and the role of labour mobility

Migration and Labor Market Adjustment Jouke van Dijk,H. Folmer, Henry W. Herzog Jr., Alan M. Schlottmann, 2013-03-14 *The Economics of Knowledge Generation and Distribution* Pier Paolo Patrucco, 2014-09-25 Contemporary capitalistic systems have been undergoing profound transformations determined by the transition towards the so called knowledge based economy i.e. a competitive system based on the capabilities firms have to create use and circulate knowledge These transformations concern both the characteristics of productive and innovative processes and the resources used in these activities This book captures these changes where traditional R D investments undertaken internally by firms are increasingly and strategically complemented by external sources of innovation and new knowledge Collaborations between firms and between firms and other organizations as well as the mobility of human capital are strategic processes in order to share and circulate knowledge and competencies They are also key determinants in the creation of new knowledge and innovation and ultimately in growth dynamics The circulation and distribution of knowledge is now a key input in the production of knowledge Knowledge and innovation are understood as the result of collective and interactive processes at the system level and less at the micro level In other words new knowledge production is less and less the result of individualistic behaviours of the firms and much more the effect of explicit and pro active interactions and transactions put in place by local networks of innovators In this perspective economic space is much more defined by the quality of the interactions among actors rather than by their mere technological sectoral or geographical proximity This book brings together new conceptual and empirical contributions and blends the analysis of the technological and geographical spaces in which innovation and knowledge are produced

[The Flow Analysis of Labour Markets](#) Ronald Schettkat, 1996-08-08 Well functioning labour markets are a precondition for economic development In order to function smoothly the market needs to be able to adjust effectively and quickly to new developments An understanding and analysis of adjustment processes within labour markets is therefore essential for economic theory and policy proposals This study

discusse **Building Resilient Migration Systems in the Mediterranean Region** Mauro Testaverde, Jacquelyn Pavilon, 2022-07-01 For thousands of years migration has been a source of social and economic well being for people living on different shores of the Mediterranean Sea Whether through higher earnings for migrants access to labor for receiving countries or remittances for sending communities migration has been an important driver of development in the Mediterranean region The COVID 19 coronavirus pandemic has severely disrupted this complex web of movements raising questions about whether migration will continue to be an important driver of the region's well being As time passed it became clear that the drivers of migration are so strong that mobility restrictions can only reduce movements not halt them entirely Building Resilient Migration Systems in the Mediterranean Region Lessons from COVID 19 present evidence on the implications of the COVID 19 pandemic on mobility in the region to inform policy responses that can help countries restart migration safely and better respond to future shocks While some of the challenges that emerged during the pandemic are specific to public health crises others are common to different types of shocks including those related to economic conflict or climate related factors To inform this reform process this book suggests a set of actions that can help Mediterranean countries to maximize the benefits of migration for all people living in the region while at the same time ensuring the sustainability of migration flows As a whole these proposed policy actions point to a vision of migration resilience that even during crises can address key labor shortages keep both migrant and native populations safer sustain household incomes and ameliorate blows to economic growth The COVID 19 pandemic has created momentum for policy reforms Whether this crisis can illuminate the way toward better adapting migration systems to future crises will depend on learning its lessons

Reshaping Regional Planning Brita Olerup, 2017-11-30 This title was first published in 2002 Uniting scholars from across the full range of social sciences this distinctive volume provides a unique overview of northern European planning It examines all the key issues as well as the evolution traditions current innovations and future developments in the field of planning Focusing on how planning impacts upon social issues such as employment social exclusion and quality of life the volume also looks at innovations in planning policy and practice in particular the challenge of sustainability The contributors analyze the built environment's relationship with culture and take a critical look at the creative re thinking currently taking place in Nordic planning

Handbook of Regional Growth and Development Theories Roberta Capello, Peter Nijkamp, 2019 Regional economics an established discipline for several decades has undergone a period of rapid change in the last ten years resulting in the emergence of several new perspectives At the same time the methodology of regional economics has also experienced some surprising developments This fully revised and updated Handbook brings together contributions looking at new pathways in regional economics written by many well known international scholars The aim is to present the most cutting edge theories explaining regional growth and local development The authors highlight the recent advances in theories the normative potentialities of these theories and the cross fertilization of ideas between regional and

mainstream economists It will be an essential source of reference and information for both scholars and students in the field

Vacancies J. Hatzius, 1994 **Geographical Labor Market Imbalances** Chiara Mussida, Francesco Pastore, 2015-04-29 This book focuses on the questions of how territorial differences in productivity levels and unemployment rates arise in the first place and why territorial differences in labor market performance persist over time Unemployment divergence and unemployment club convergence have been touched on in a large number of works and have recently also been studied using spatial econometric analysis In this book we aim to develop the debate to include several important new topics such as the reasons why structural changes in some sectors cause slumps in some regions but not in others the extent to which agglomeration factors explain regional imbalances the degree of convergence divergence across EU countries and regions the role of labor mobility in reducing increasing regional labor market imbalances the impact of EU and country level regional policy in stimulating convergence and the unsatisfactory role of active labor market policy in stimulating labor supply in the weakest economic areas *OECD Regional Development Studies Working Together for Local Integration of*

Migrants and Refugees in Athens OECD, 2018-07-26 Migrants including native born children with migrant parents account for 23% of Athens population 664 046 people while the number of refugees and asylum seekers has rapidly increased since 2015 and is currently estimated at 18 000 To respond to the refugee inflow Athens developed bold Labour Economics

Stephen W. Smith, 2003-03-20 In the six years since the appearance of the first edition of Stephen Smith's book labour economics has become a more firmly entrenched subject on the curriculum Previously regarded as a subsection within industrial economics there are now very few universities that do not devote a course to it in its own right The focus of topics covered with **Evolutionary Economic Geography** Dieter Kogler, 2017-10-02 Economic geographers increasingly

consider the significance of history in shaping the contemporary socio economic landscape and increasingly believe that experiences and competencies acquired over time by individuals and entities in particular localities to a large degree determine present configurations as well as future regional trajectories Attempts to trace understand and investigate the pathways from past to present have given rise to the thriving and exciting sub field of Evolutionary Economic Geography EEG EEG highlights the important factors that initiate inhibit or consolidate the contextual settings and relationships in

which regions and their respective agents which comprise and shape economic activity and social reproduction change over time. It has at its core the production and destruction of novelty in space and the links between innovation and regional economic fortunes. The creation of knowledge, its movement and recombination within different regional ensembles of economic agents and institutions plays a critical role in the evolution of the space economy. EEG provides a framework to disentangle the complexity of technological change and regional economic development based on a variety of theoretical and methodological approaches. In only a short time EEG has established itself as a promising and rapidly evolving research framework with its focus on the driving forces of regional development across various scales and its attempt to translate findings into public policy. This book advances the theoretical foundations of EEG and demonstrates how EEG utilises and operationalises conceptual frameworks both established and new. Contributions also point to future research avenues and extensions of EEG attempting to build stronger ties between theory, empirical evidence and relevance to policy. This book was originally published as a special issue of *Regional Studies*. *Regional Economic Impact Analysis and Project Evaluation* H. Craig Davis, 1990. This book provides a non-technical introduction to the fundamental principles and techniques of regional impact and evaluation analysis. The book is written for readers who have a minimal background in mathematics and economics and so the materials listed in the bibliographies have been chosen for their accessibility to such readers. References to relevant papers of a more technical nature are indicated in notes in each reference. Unlike existing texts which usually concentrate on regional impact or evaluation analysis, *Regional Economic Impact Analysis and Project Evaluation* offers an extensive introduction to both these subjects since both are critical to the study and practice of regional economic analysis. Two case studies intended as illustrations of practical applications are included in each of the six chapters that deal with specific principles or techniques. While many of the case studies and much of the literature cited in the bibliographies is Canadian, a substantial portion is from the United States and Great Britain, demonstrating that the principles and techniques discussed in this book are universally applicable. *Urban Transportation Research and Planning, Current Literature*, 1977.

Internal Labor Mobility in Central Europe and the Baltic Region Pierella Paci, 2007. Large regional disparities in labor market indicators exist in Central Europe and the Baltic region. Such disparities appear to be persistent over time, indicating in part a lack of flexibility in the prevailing adjustment mechanisms. Internal labor mobility is often seen as an important instrument to reduce adjustment costs when other mechanisms fail. Drawing from a variety of data sources and utilizing a common empirical framework and estimation strategy, this study identifies patterns and statistical profiles of geographical mobility. It finds internal migration to be generally low and highly concentrated among better educated young and single workers. This suggests that migration is more likely to reinforce existing inequalities than to act as an equalizing phenomenon. By way of contrast, commuting flows have grown over time and are more responsive to regional economic differentials. The findings suggest the need for appropriate and country-tailored policy measures designed to increase the responsiveness of

labor flows to market conditions
