Regionalism Multilateralism And Deeper Integration:

Regionalism, Multilateralism, and Deeper Integration Robert Z. Lawrence, 2000-07-26 Over the past decade international economic liberalization has been pursued through both multilateral and regional arrangements In the Uruguay Round more than one hundred governments pledged their commitment to greater open trade in goods and services and established new rules under the enforcement of the World Trade Organization At the same time however many regional arrangements have been negotiated including the European Union and the North American Free Trade Agreement Nonetheless controversy still rages about these arrangements Are regional arrangements stumbling blocks or in fact building blocks for a more integrated and successful international economy In this book Robert A Lawrence addresses this question and explains both sides of the debate A volume of Brookings Integrating National Economies Series **Regionalism, Multilateralism, and Deeper**

Regionalism, Multilateralism, and Economic Integration Gary P. Sampson, Stephen Woolcock, 2003 This publication considers whether regional trade agreements have led to a new form of economic co operation by promoting deeper integration in the regulatory structures of participating countries An examination of recent experiences are found to show that although there is no single model for deeper integration regional trade agreements have generally more effective than more remote WTO procedures in facilitating trade and improving transparency Regional processes and rules are found to have been consistent with the multilateral obligations of each party with additional commitments in the regional agreements complementing WTO rules *Advancing East Asian Regionalism* Melissa Curley, Nicholas Thomas, 2012-10-12 Developments in East Asia have progressed rapidly in terms of regionalism since the 1997 crisis The end of the Asian miracle called into question not only the capacity of regional states to meet the needs of their attendant peoples but also challenged the viability of regional organizations such as ASEAN to adapt and respond to the changing circumstances Advancing East Asian Regionalism looks at the ways in which ASEAN has expanded since the crisis and evaluates the potential of East Asia to come together in a regional formation one capable of representing the region as a whole akin to the European Community It draws upon the knowledge and perspectives of academics and policy makers actively engaged in the contradictory issues of regionalism Coupling case study material on regionalism institutions and sectoral cooperation with theoretical debates on regionalization this book is an invaluable resource that pushes our understanding of East Asian regionalism forward

How China Opened Its Door Susan L. Shirk, 1994-12-01 China's transformation from a virtually closed economy to a major trading nation is an incredible success story Since 1979 the country has changed its policies to promote increased foreign trade and investment thereby attracting more direct investment to China than to any other developing country in recent years What brought about this change How after thirty years of being walled off from the world economy did China open its door This book part of the Integrating National Economies series tells the story of how China ended its long held policies of economic isolationism and rejoined the world economy in the decade and a half between 1979 and 1994 It shows how China's transformation into a world trading power was achieved remarkably without any major alteration in the country's communist political system Susan L Shirk describes the reform strategy and explains why such a turn around was possible in China but not in the Soviet Union Shirk's analysis details the political logic behind the economic reform illustrating how China's leaders were able to win support for reform politics among Communist Party and government officials Despite strong vested interest in the status quo the communist government successfully adopted reforms through gradualism administrative decentralization and ad hoc particularistic negotiating with individual subordinates Shirk explains these distinctive features of China's path to reform China has achieved shallow integration with great success Whether deeper integration with the world economy will automatically follow remains unclear Shirk concludes that China will not be able to achieve reform in the areas of deep integration intellectual property rights environmental protection and labor treatment in the same way it achieved shallow integration She argues that imposing international standards will require rapid enforcement central regulation and uniform rules If China can meet these challenges
