evolve an Enterprise Architecture Capability the Leader's Guide presents advice on establishing an Enterprise Architecture Capability that aligns to a set of requirements and expectations that are specific to each enterprise. This approach follows a configured path through the TOGAF Architecture Development Method (ADM). This document introduces key topics of concern, defines the terms related to the topic, shows the terms that are related to an EA Capability, discusses what the Leader needs to know, describes what the Leader should do with this knowledge. It covers the following topics: An introduction to the topic including an assessment of the state of EA definitions and key concepts used in the Guide; A narrative that is a companion to the TOGAF ADM that leads the reader through a series of topics and related steps to assist in stepping back from the current operational context to seek a broader perspective; How to adopt an EA Capability including the preparation and initiation activities required to establish or enhance the EA Capability; A mapping of how the TOGAF ADM can be used for architecting and establishing an EA Capability; Reactions from other readers; A quality hard copy of the TOGAF method easier to read than endless HTML docs or huge PDFs. This proven model offers an empowering and fundamental redesign of the board role and emphasizes values, vision, empowerment of both the board and staff, and strategic ability to lead. Leaders' Policy Governance gives board members and staff a new approach to board job design, board-staff relationships, the role of the chief executive, performance monitoring, and virtually every aspect of the board management relationship. This latest edition has been updated and expanded to include explanatory diagrams that have been used by thousands of Carver's seminar participants. It also contains illustrative examples of Policy Governance model policies that have been created by real-world organizations. In addition, this third edition of *Boards That Make a Difference* includes a new chapter on model criticisms and the challenges of governance research. *Global Best Practices*

Nonprofit Governance Chris Cornforth, William A. Brown, 2013-07-04 The current fashion for rolling back the state has seen the nonprofit or third sector playing an increasing role in what were previously the heartlands of the public sphere The growing significance of the sector and its increasing reliance on public funds mean it has also attracted increased scrutiny From outside the sector concerns have been raised about the accountability and performance of nonprofit organizations From within the sector there has been considerable debate about whether the increased reliance on government contracts is in danger of undermining the sector's independence As a result the spotlight has fallen on governance arrangements and whether they are adequate to ensure that nonprofit organizations are effective and accountable for their actions and able to retain their independence This collection offers a comprehensive assessment of research on the governance of nonprofit organizations Nonprofit governance research has been dominated by the study of boards of unitary organizations and has paid insufficient attention to the multi level nature of governance governance relationships and dynamics and the contribution of actors other than board members to governance processes Drawing on the research of leading scholars in the US UK Canada and Australia this book presents new perspectives on non profit governance which help to overcome these weaknesses Written in an accessible manner the book will be of value to scholars researchers students reflective practitioners and governance consultants and advisers How to Review and Assess the Value of Board Subcommittees
