**Social Comparison** Jerry Suls, Thomas Ashby Wills, 2024-05-01 Assessment of abilities opinions and overall feelings of self worth are commonly acknowledged to be influenced by how ones attributes compare with those of other

people In contemporary social psychology this process is known as social comparison or interpersonal comparison Originally published in 1991 this volume presents the most recent developments in this field of study at the time As described in the chapters the theory has gone through several iterations taken on new problems and research paradigms and reached out to other social psychological areas of study Some of this research addresses questions that are logical extensions of Festinger's theory some consider questions that derive from entirely different ways of construing the comparison process from Festinger's original approach Although all questions are not settled the work presented here shows how far the original social comparison theory has evolved and suggests where the next insights are likely to be found Today it can be read in its historical context

**Social Comparison, Judgment, and Behavior** Jerry M. Suls, Ladd Wheeler, Rebecca L. Collins, 2020 Comparison with other people a core element of social life influences self concept attitudes conformity psychological and physical well being achievement educational outcomes and social movements This volume presents classic and state of the science chapters by leading experts that survey the major areas of social comparison theory and research *Handbook of Social Comparison* Jerry Suls, Ladd Wheeler, 2013-11-11 Comparison of objects events and situations is integral to judgment comparisons of the self with other people comprise one of the building blocks of human conduct and experience After four decades of research the topic of social comparison is more popular than ever In this timely handbook a distinguished roster of researchers and theoreticians describe where the field has been since its development in the early 1950s and where it is likely to go next *Communal Functions of Social Comparison* Zlatan Krizan, Frederick X. Gibbons, 2014-03-21 The extent to which we see ourselves as similar or different from others in our lives plays a key role in getting along and participating in social life This volume identifies research relevant to such communal functions of social comparisons and summarizes and organizes this research within a single coherent conceptual framework The volume provides an important addition to current thinking about social comparison which has often neglected communal and affiliative functions Whereas human desire to compare with others has traditionally been viewed as motivated by self centered needs such as self evaluation self enhancement and self improvement this book presents an eclectic cross section of research that illuminates connective cooperative and participatory functions of social comparisons In this vein the book aims both to expose research on currently neglected functions of social comparisons and to motivate a broader theoretical integration of social comparison processes

The Oxford Handbook of Leader-Member Exchange Talya N. Bauer, Berrin Erdogan, 2015-08-14 Leader member exchange LMX is the foremost dyadic theory in the leadership literature Whereas contemporary leadership theories such as transformational servant or authentic leadership theories focus on the effects of leader behaviors on employee attitudes motivation and team outcomes relational leadership theory views the dyadic relationship quality between leaders and members as the key to understanding leader effects on members teams and organizations This approach views trust and respect based relationships as the cornerstone of leadership LMX has grown from a new theory in the 1970s to a mature area

of research in 2015 Interest in this theory has increased rapidly over the past four decades and the pace of research in this area continues to accelerate dramatically The Oxford Handbook of Leader Member Exchange takes stock of the literature to examine its roots what is currently known what research gaps may exist and what areas are in need of the most urgent research

**Moral Emotion, Moral Cognition, and (Im)Moral Behavior in the Workplace** Peixu He,Hongdan Zhao,Cuiling Jiang,Chuangang Shen,2023-09-27 Moral behavior is subject to socially accepted moral norms and also has a pervasive influence on organizational performance With the emergence of ethical issues

found in organizations practitioners and scholars pay increasing attention to ethics management Therefore workplace moral behavior e g pro social behavior and organizational citizenship behavior OCB and immoral behavior e g interpersonal abusive behavior deviant counterproductive behavior and unethical pro organizational behavior have also received substantial research interests over the past decades To date the most common framework used to study moral behavior has been the cognitive approach with abundant evidence demonstrating that emotion and cognition are the two core elements in generating and influencing workplace im moral behavior However limited studies have been conducted to explore the emotional cognitive processes or integrative moral emotion cognition system relevant to workplace moral behavior Despite our knowledge of the antecedents and consequences of workplace im moral behaviors more research on the generating mechanism influencing mechanism transformation mechanism and governance strategies is needed For example it is unclear how exhibiting im moral behavior in the workplace would impact the actor s and the third party observer s emotions thoughts feelings and subsequent behavior Besides the question of whether ethical unethical leader behavior would trigger a trickle down effect is underdeveloped which refers to the fact that how the behavior or perception of the top leaders affects employees from top to bottom along the formal vertical power chain In addition we have little knowledge on when how and why the ethical employees the so called good soldiers would engage in workplace immoral behavior and vice versa

**Federalism and National Diversity in the 21st Century** Alain-G. Gagnon, Arjun Tremblay, 2020-03-21 This edited volume explores the obstacles to and opportunities for the development and entrenchment of a sustainable and representative multinational federalism In doing so it tackles a striking puzzle on the one hand scholars agree that deeply diverse multinational and multiethnic democracies should adopt federal structures that reflect and empower territorially concentrated diversity On the other hand there are very few if any real examples of enshrined and fully operative substantive multinational federalism What are the main roadblocks to the adoption of multinational federalism Can they be overcome Is there a roadmap to realizing multinational federalism in the twenty first century In addressing these questions this book brings together scholars from across the globe who explore a diverse range of cases from different and innovative analytical approaches The chapters contribute to answering the above questions each in their own way while also addressing other important aspects of multinational federalism The book concludes that the way forward likely depends on the emergence of a specific set of norms and a receptiveness to the complex institutional design

**The Social Dynamics of Organizational Justice** Stephen W. Gilliland, Dirk D. Steiner, Daniel P. Skarlicki, 2015-02-01 This eighth volume in the Research in Social Issues in Management series explores a variety of social relations to expand our thinking about organizational justice which is fundamentally based on relationships between organizational authorities and the employees of the organizations These relationships also emphasize the roles of various actors and suggest fairness perspectives other than that of subordinates perceptions of the treatment received from their superiors The 10 chapters of the volume are divided into two major sections

plus a conclusion The first section presents five chapters that bring new theoretical perspectives to bear on justice considerations Topics treated throughout this section include conflicting perspectives on justice psychological distance greed and punishment The second section places emphasis on leaders or managers perspectives of justice going back to some of the initial proactive roots of justice rather than on what has become the more traditional focus that of subordinate perceptions or reactive justice In the contributions comprising this section leaders personalities their motives and their position as both superiors of some employees and subordinates of their own superiors are examined to provide new perspectives on the leadership role in justice matters The concluding chapter by Brockner and Carter comments on the collection of chapters and proposes extensions and alternative perspectives for consideration This commentary chapter suggests that the volume surfs a fifth wave in the history of justice research as these chapters all examine justice as a dependent variable influenced by numerous factors

times is to keep people clear headed and to resist the delusions of prophetic legislators Humanities and arts are the process of perceiving realizing thinking manipulating and expressing objective or subjective objects through capturing and excavating feeling and analyzing integrating and applying or displaying the stage results in the form obtained through feeling seeing hearing smelling touching The social sciences and humanities and arts contain content that will directly affect our lives and the way society functions And by reacting to today s increasingly intricate problems and situations through systematic and professional discussions they will further contribute to the improvement of institutions and the development of society By thinking about issues and looking at problems and the world from different perspectives by putting the two together it may be possible to have more comprehensive appropriate and better responses for example the development of laws requires a deeper understanding of the environment in which they are implemented international trade requires a certain understanding of the customs of different countries and the development of tax and economic policies requires a certain understanding of the population consumer demand etc
