Relativity And The Secret Of Life:

Relativity and the Secret of Life Jonathan T. Rus, 1990-01-01 *Radium and the Secret of Life* Luis A. Campos, 2015-04-03 Before the hydrogen bomb indelibly associated radioactivity with death many chemists physicians botanists and geneticists believed that radium might hold the secret to life Physicists and chemists early on described the wondrous new element in lifelike terms such as decay and half life and made frequent references to the natural selection and evolution of the elements Meanwhile biologists of the period used radium in experiments aimed at elucidating some of the most basic phenomena of life including metabolism and mutation From the creation of half living microbes in the test tube to charting the earliest histories of genetic engineering Radium and the Secret of Life highlights previously unknown interconnections between the history of the early radioactive sciences and the sciences of heredity Equating the transmutation of radium with the biological transmutation of living species biologists saw in metabolism and mutation properties that reminded them of the new element These initially provocative metaphoric links between radium and life proved remarkably productive and ultimately led to key biological insights into the origin of life the nature of heredity and the structure of the gene Radium and the Secret of Life recovers a forgotten history of the connections between radioactivity and the life sciences that existed long before the dawn of molecular biology *AutoRicerca - Volume 18, Year 2019 - The secret of life* Editore: Massimiliano Sassoli de Bianchi, 2019-01-24 AutoRicerca is a journal whose mission is to publish writings of value on the topic of inner research but not only This eighteenth volume is the first to be published only in English It contains an interesting conversation between D Aerts K W Ekeson M Sassoli de Bianchi and V Schneider on The secret of life It also contains two original articles written by D Aerts and K W Ekeson which complete the content of the conversation
