*Limestones and Caves of Wales* Trevor D. Ford, 2011-06-02 This 1989 book covers the geology and geomorphology of the Carboniferous Limestone areas of Wales and summarises the state of knowledge of the main cave systems including the longest and deepest in Britain It sets out to assess the morphological evolution of the cave systems and the associated landscape features particularly in light of the effects of successive glaciations The book also covers related subjects including the biology of the cave faunas important archaeological discoveries in Welsh caves and the hydrology of the limestone masses On its publication this was the first book to give a general survey of the subject It will continue to provide a valuable reference for cavers and also for geologists geographers biologists and archaeologists with special interests in the area

*Studies of Cave Sediments* Ira D. Sasowsky, John Mylroie, 2012-12-06 John E Mylroie and Ira D Sasowsky Caves occupy incongruous positions in both our culture and our science The oldest records of modern human culture are the vivid cave paintings from southern France and northern Spain which are in some cases more than 30 000 years old Chauvet et al 1996 Yet to call someone a caveman is to declare them primitive and ignorant Caves being cryptic and mysterious occupied important roles in many cultures For example Greece a country with abundant karst had the oracle at Delphi and Hades the god of death working from caves People are both drawn to and mortified by caves Written records of cave exploration exist from as early as 852 BC Shaw 1992 In the decade of the 1920 s which was rich in news events the second biggest story as measured by column inches of newsprint was the entrapment of Floyd Collins in Sand Cave Kentucky USA This was surpassed only by Lindbergh's flight across the Atlantic Murray and Brucker 1979 Annales de géomorphologie Andreas Aigner, Josef Stini, Hans Mortensen, 1962 **Transactions of the British Cave Research Association**, 1974

**Dictionary Catalog of the Research Libraries of the New York Public Library, 1911-1971** New York Public Library. Research Libraries, 1979 Treatise on Geomorphology, 2013-02-27 The changing focus and approach of geomorphic research suggests that the time is opportune for a summary of the state of discipline The number of peer reviewed papers published in geomorphic journals has grown steadily for more than two decades and more importantly the diversity of authors with respect to geographic location and disciplinary background geography geology ecology civil engineering computer science geographic information science and others has expanded dramatically As more good minds are drawn to geomorphology and the breadth of the peer reviewed literature grows an effective summary of contemporary geomorphic knowledge becomes increasingly difficult The fourteen volumes of this Treatise on Geomorphology will provide an important reference for users from undergraduate students looking for term paper topics to graduate students starting a literature review for their thesis work and professionals seeking a concise summary of a particular topic Information on the historical development of diverse topics within geomorphology provides context for ongoing research discussion of research strategies equipment and field methods laboratory experiments and numerical simulations reflect the multiple approaches to

understanding Earth's surfaces and summaries of outstanding research questions highlight future challenges and suggest productive new avenues for research. Our future ability to adapt to geomorphic changes in the critical zone very much hinges upon how well landform scientists comprehend the dynamics of Earth's diverse surfaces. This Treatise on Geomorphology provides a useful synthesis of the state of the discipline as well as highlighting productive research directions that Educators and students/researchers will find useful. Geomorphology has advanced greatly in the last 10 years to become a very interdisciplinary field. Undergraduate students looking for term paper topics to graduate students starting a literature review for their thesis work and professionals seeking a concise summary of a particular topic will find the answers they need in this broad reference work which has been designed and written to accommodate their diverse backgrounds and levels of understanding. Editor in Chief Prof J F Shroder of the University of Nebraska at Omaha is past president of the QG/G section of the Geological Society of America and present Trustee of the GSA Foundation while being well respected in the geomorphology research community and having won numerous awards in the field. A host of noted international geomorphologists have contributed state-of-the-art chapters to the work. Readers can be guaranteed that every chapter in this extensive work has been critically reviewed for consistency and accuracy by the World expert Volume Editors and by the Editor in Chief himself. No other reference work exists in the area of Geomorphology that offers the breadth and depth of information contained in this 14 volume masterpiece. From the foundations and history of geomorphology through to geomorphological innovations and computer modelling and the past and future states of landform science, no stone has been left unturned.

**BCRA Transactions** British Cave Research Association, 1976      *Vegetation and Erosion* J. B.

Thornes, 1990-07-19 Stressing the significance of vegetation in geomorphology, an often ignored area, it presents the results of the 1988 British Geomorphological Research Group conference which brought together work in progress or recently completed on plant processes and geomorphological interactions. According to the editor, these results, while encouraging, are only a start, indicating a preponderance of past work dealing with vegetation simply as an extrinsic variable. The text focuses on vegetation as a highly dynamic and vital component that affects virtually all processes and therefore all geomorphological histories. By raising these and other issues, it indicates a variety of avenues for future investigation.

*Geomorphology of Desert Environments* Anthony J. Parsons, A. D. Abrahams, 2009-03-20 About one third of the Earth's land surface experiences a desert climate and this area supports approximately 15% of the planet's population. This percentage continues to grow and with this growth comes the need to acquire and apply an understanding of desert geomorphology. Such an understanding is vital in managing scarce and fragile resources and in mitigating natural hazards. This authoritative reference book is comprehensive in its coverage of the geomorphology of desert environments and is arranged thematically. It begins with an overview of global deserts, proceeds through treatments of weathering, hillslopes, rivers, piedmonts, lake basins, and aeolian surfaces, and concludes with a discussion of the role of climatic change. Written by a team of international authors, all of whom

are active in the field the chapters cover the spectrum of desert geomorphology     Ancient Landforms Cliff Ollier,1991

**The Lancet** ,1875     *Arid Zone Geomorphology* David S. G. Thomas,2011-02-08 The new edition of *Arid Zone Geomorphology* aims to encapsulate the advances that have been made in recent years in the investigation and explanation of landforms and geomorphological processes in drylands Building on the success of the previous two editions the Third Edition has been completely revised and updated to reflect the latest developments in the field Whilst this latest edition will remain a comprehensive reference to the subject the book has been restructured to include regional case studies throughout to enhance student understanding and is clearly defined into five distinct sections Firstly the book introduces the reader to Large Scale Controls and Variability in Drylands and then moves on to consider Surface Processes and Characteristics The Work of Water The Work of the Wind The book concludes with a section on Living with Dryland Geomorphology that includes a chapter on geomorphological hazards and the human impact on these environments Once again recognised world experts in the field have been invited to contribute chapters in order to present a comprehensive and up to date overview of current knowledge about the processes shaping the landscape of deserts and arid regions In order to broaden the appeal of the Third Edition the book has been reduced in extent by 100 pages and the Regional chapters have been omitted in favour of the inclusion of key regional case studies throughout the book The Editor is also considering the inclusion of a supplementary website that could include further images problems and case studies     **Selected Water Resources Abstracts** ,1991
