## **Religion And Creation:**

**Religion and Creation** Keith Ward, 1996-06-20 This book is the second part of a major project of comparative theology begun with *Religion and Revelation* Clarendon Press 1994 which looks at major concepts of faith in all four of the main scriptural religions of the world In *Religion and Creation* the author explores the idea of a creator God in the work of twentieth century writers from Judaism Islam Hinduism and Christianity He develops a positive concept of God which stresses God's dynamic and responsive relation to the temporal structure of the universe and the importance of that structure to the self expression of the divine being Professor Ward goes on to present a Trinitarian doctrine of creation drawing inspiration from a wider set of theistic traditions and recent discussions in physics in the realm of cosmology

*Evolution and Religious Creation Myths : How Scientists Respond* Paul F. Lurquin School of Molecular Biosciences Washington State University, Linda Stone Department of Anthropology Washington State University, 2007-06-08 Polls show that 45% of the American public believes that humans were created about 10 000 years ago and that evolution is non-existent Another 25% believes that changes in the natural world are directed by a supernatural being with a particular goal in mind This thinking clashes frontally with scientific findings obtained in the past 150 years A large portion of the general public espouses the views of creationists and their descendants and ignores or is unaware of scientific advances Critical thinking about the natural world within a scientific framework is lacking in the USA and many parts of the world This manuscript provides a multidisciplinary explanation and defense for the science of evolution not just Darwinism as it is being challenged by arguments for intelligent design and other creation myths It draws in the life physical and social sciences and recent studies of human evolution that rely much on the idea of change over time which is evolution writ large It puts the evolution ID issue into international perspective by including opinions held in world religions other than Christianity It is clearly written and also can easily be used as a guide for those with some science background The authors make a convincing case that other books do not achieve this as much as they do in this work The book is written for a whole spectrum of educated people including teachers and teachers in training who are interested in the broad issues of the origins of the universe life and humans and who may not quite grasp the potential magnitude of the negative influence on all of science education of people embracing creationist and ID thinking This includes high school teachers and people on boards of education and in municipal governments anyone involved in education It could be used also in college courses such as contemporary social issues and Science and Society sometimes team taught by sociologists and scientists The authors show that when they are teleological dogmatic or politically inspired religious and creation myths threaten scientific efforts The book does not require any extensive knowledge of science The principle of change over time pervades all of science from cosmology to the search for the origin for life to human physical and cultural evolution The book educates readers on scientific matters that overwhelmingly support the idea of evolution not only in the living world but also in physical and social science It explains

too how evolution physical and biological is a random unguided process whose roots can be already found in quantum physics

*Destiny: Volume Two: God, Creation and Religion* Edward Nagell, 2006-08 Need for religion seems independent of culture or training and many exist throughout the world This book describes religions that had or continue to have some impact on the USA

**From Creation to Eternity** Raymond J. Jerome, 2010-01-07 Sometimes I have a difficult time accepting my good fortune to be living at this particular time nothing has made me feel more that way than reading Dr Jerome s fascinating realistic and informative book It is a treasure house of wonderful information useful knowledge and excellent writing This book essentially takes the basic religious truths that have been handed down to us over hundreds of years from our major world religions and shows how current findings in subatomic particle physics quantum theory and laser technology gives us a way of seeing how they may well be agreeing on the same basic truths that construct and maintain our matter and spiritual existence Larry Dossey M D President of Isthmus Institute and author of *Space Time and Medicine* and *Beyond Illness* has written an excellent introduction and endorses Dr Jerome s work I believe that any creditable scientist would do the same and certainly every New Thought student should be enthusiastic about the work This book is not another scientific text It is that of course but is so much more and such fun reading Take a look at this book which is entertaining informative and above all else a book which has great application to daily living Jack H Holland PhD D D Theologian Reviewer of scientific and theological literature for *The New Thought Quarterly* and Director of The Institute for Human Growth and Awareness Dr Jerome s book just might be one of the most important books of this era It explains the holographic nature of God s consciousness in terms that are understandable Tommy Sellers communications expert in computer science and laser research Dr Jerome personifies a new breed of human now emerging He is a scientist who realizes that his science represents only part of the path to understand his existence and his reality It is an essential part but incomplete in itself To be whole to be balanced in life he knows it is necessary to discover the path s other essential part As the parts of the path become visible before him Dr Jerome integrates them for us As he says in his preface If science is right and if religion is also right then they must allude to the same basic truths The quest to uncover this sameness is the goal of this book This is a sensitive and beautiful book written by an admirable man It deserves to be read then pondered then reread and finally referred to often John C Carls PhD in particle physics and author of *What It Means To Be Human*

**Creationism** Lloyd R. Bailey, 2006-05-28 Genesis Creation and Creationism is an important new study that explores all sides of the creationism debate and gives a sound and spiritually rich way of understanding the creation stories of Genesis Creationism is an ardently proclaimed and widely held point of view involving both scientific and biblical data While much has been written about scientific creationism much less is available about its counterpart biblical creationism Genesis Creation and Creationism provides this much needed evaluation of creationism by uniquely allowing the Bible to speak for itself Author Lloyd R Bailey who is a biblical scholar and also holds a degree in physics begins his investigation by inviting all sides of the creationism debate to set aside their prejudices for or against the theory of evolution and read the biblical story of creation in Genesis 1 1 2 4a He then examines the creationist phenomenon and compares this data with the agenda of the young earth creationist All the while Bailey enhances the Bible s ability to speak for itself by withholding judgment on many of the assumptions of historical critical biblical scholarship for example the date and authorship of Genesis The result is a scientifically straightforward study of Genesis that explicitly answers fundamentalist questions on creationism Genesis Creation and Creationism is a thought provoking study on the relationship of science and religion that speaks to all Christian denominations It provides excellent resource material for high school science classes religion classes and for seminarians engaged in biblical studies Theism and the Christian Faith Charles Carroll Everett, 1909 *Creation Centred in Christ*
