*John Banville* Neil Murphy,2018-05-18 John Banville offers a close analysis of most of Banville s major novels as well as the Quirke crime novels he has written under the pseudonym Benjamin Black and his dramatic adaptations of Heinrich von Kleist s plays From the beginning Banville s work has been marked both by the presence of a complex embedded discourse about the significance of art and by a concurrent self conscious obsession with its own status as art His novels perpetually reveal an overt fascination with the visual arts in particular and with the aesthetic principle of literature as art This study argues that as a whole Banville s work presents an elaborate and richly textured coded account of his relationship with art and with the self referential fictional world that his novels have conjured It is from this critical context that John Banville s central argument is derived This book asserts that Banville s fiction can be viewed both as an extended interrogation into the meaning and status of art as well as itself being a representative of the type of art that is admired in the pages of the novels As such it also represents an extremely sophisticated enactment of the novel form that goes beyond the self reflexivity of late twentieth century fiction to chart new developments in the literary arts The book s critical process involves several specific reference points Firstly Banville s own theoretical statements about art in interviews essays reviews and journalistic writing over the past 40 years are synthesized into a coherent interpretation of the author s artistic vision which is thereafter used as

a conceptual touchstone when considering his major works of fiction This is done in conjunction with investigating specific theoretical perspectives about the relationship between literature and art by critics such as Denis Donoghue and Susan Sontag and by philosophers of art Graham Gordon Etienne Gilson Peter Lamarque and Susanne Langer **Seven**
