

Team Training and Resource Management in Health Care: Current Issues and Future Directions

*David M. Musson, MD, PhD and
Robert L. Helmreich, PhD*

Many authorities have suggested that some variant of team training is likely to be an effective means to reduce human error in operating rooms, emergency departments, resuscitation teams and other settings within healthcare where human interaction is common, and where breakdowns in communication and teamwork can have critical consequences. The implementation of formal training in teamwork for healthcare workers, analogous to aviation's crew resource management (or CRM) used to train pilots, was a specific recommendation of the Institute of Medicine's landmark report, *To Err is Human: Building a Safer Healthcare System*, released in 2000.¹ Indeed, our own research group has made this same recommendation on multiple

occasions over recent years.²⁻⁴ Team training is also currently suggested as part of a comprehensive Patient Safety Plan published by the Joint Commission on Accreditation of Healthcare Organizations (JCAHO), the regulatory agency charged with hospital accreditation in the United States.⁵⁻⁶

A major problem, however, is that few clear guidelines exist to help guide the implementation of such recommendations in healthcare settings. In general, training programs designed to improve team skills are a new concept for medicine, particularly for physicians who are trained largely to be self-sufficient and individually responsible for the care they deliver. While many parties acknowledge a need for such training, exactly how to go about developing

The National Home and Hospice Care Survey, ... Summary,2003 **Families and Work** Karen I. Fredriksen-Goldsen,Andrew E. Scharlach,2001 This book is intended for for use in upper level undergraduate and graduate courses in social work with the family social work with the elderly and social work with children **National Hospital Discharge Survey** ,2002 **Vital and Health Statistics** ,1967 **Protocols in Primary Care Geriatrics** John P. Sloan,2012-02-02 The striking increase in average life expectancy during the twentieth century rates as one of the major events of our time We are in the midst ofa social revolution one rooted not in a new ideology but in our changing population pat terns For the first time in human history infants in fortunate nations like ours can expect to live well into their seventies and beyond This demographic revolution increases pressure on re sources as it also creates further social change and new opportunities for older persons Such rapid changes have left most people living in the past with their generally negative attitudes about aging and elderly people The same outmoded beliefs are embedded in many ofour health care programs In our youth oriented culture most of us still view old people as physically decrepit or in rapid inevitable decline Mentally they are viewed as forgetful or childish with little ability to learn and adapt Socially and economically they are often considered a burden With such stereotypes where is the expectation and

encouragement for their continuing capacity to enrich their own lives and to enrich society. These deep-seated cultural stereotypes do not describe accurately the new wave of elderly persons or their potential contributions to society. Today's aging individuals are mostly far from decrepit; fewer than 25 percent experience any disability and fewer than 5 percent are in nursing homes. Intellectually given new opportunities to learn and grow, they thrive.

Nursing Home Administration James Elmore Allen, 2007. Contains the knowledge essential to prepare for licensure and employment as a nursing home administrator. Using as its basis the guidelines of the National Association of Boards of Examiners of Nursing Home Administrators, this work includes sections on Distinguishing delirium from dementia, Psychosis from agitation, GERD and Glycemic control.

New Directions in Old-Age Policies Janie S. Steckenrider, Tonya M. Parrott, 1998-09-11. This book explores the changed political environment in the United States and what it means for the policies and programs benefiting the elderly and their families. It includes chapters written by distinguished contributors such as Fernando Torres Gil, Assistant Secretary for Aging, Clinton Administration, and discusses specific realistic policy options for the future. *New Directions in Old Age Policies* suggests that old age policy in the changed political environment is a paradox of competing agendas: individual versus fiscal responsibility in policy choices; doing more for the elderly and their families with fewer public resources and prioritizing the status quo or change in policy decisions for the elderly.

Managing Death James M. Hoefler, 2019-08-15. Many Americans before they die will go through a stage where they are unable to make competent decisions about their own life-sustaining medical treatment. More and more family members and care givers are facing these difficult decisions in their stead, becoming engulfed in questions about personal wishes, medical ethics, state and federal law, and quality of life. Drawing on provocative case studies, personal interviews, and detailed research, James Hoefler examines the medical, legal, ethical, and clinical aspects of such right-to-die issues. Beginning with the legal struggle of a woman whose son existed in a persistent vegetative state (PVS) for seventeen years, the author moves into a broader look at consensus among professional organizations from the AMA to the President's Commission to the National Center for State Courts, beliefs of mainstream religious groups, public opinion issues surrounding end-stage Alzheimer's and other organic brain disorders that can slowly lead to PVS, and the role of artificial nutrition and hydration in these cases. Hoefler concludes with recommendations on how to improve the quality of right-to-die decision making. An absorbing read with a minimum of technical jargon, this book is a valuable guide to care givers, public policy students, medical ethicists, family members, and anyone facing questions about an individual's right to die.
