Environmental Education Teacher Resource

Handbook Richard J. Wilke, 1993. From the Preface: The Environmental Education Teacher Resource Handbook is one of a series of practical references for curriculum developers, education faculty, veteran teachers, and student teachers. The handbook is designed to provide information on the background of environmental education (EE) curriculum, as well as current, comprehensive information on publications, standards, and special materials for K-12 EE. Think of this handbook as the first place to look when you are revising or developing your EE curriculum, or if you need resource information on EE any time of the year. This handbook does not seek to prescribe any particular form of curriculum, nor does it follow any set of standards or guidelines. Instead, the book provides a general grounding in the EE curriculum so that you can use this information and then proceed in the direction best suited for your budget, your school, and your district. What this handbook gives you is a sense of the numerous options that are available; it is up to you to use the information to develop the appropriate curriculum or program for your situation.
