H. Dekker, 2024-04-04 This book gives you the historical sensation of coming face to face with the bodily expression and regulation of children's emotions over time The study does this by encouraging you to look through the eyes of well known artists like Albrecht Dürer Domenico Ghirlandaio Jan Steen Antony van Dyck Rembrandt and Titian in early modern Europe and Jean Baptiste Simón Chardin Thomas Lawrence Jean Honor Fragonard Philipp Otto Runge Willem Bartel van der Kooi Paul Gauguin Auguste Renoir and Jozef Israëls in the late 18th and 19th centuries These sources are supplemented by

works from less famous artists as well as popular emblem books child advice manuals observations from the emerging child sciences and personal documents Jeroen Dekker observes children's emotions mainly in the child's world and in the domestic emotional space and connects them with history's ongoing underlying discourse on education and the emotions This discourse was developed by theologians philosophers and moralists like Augustine Aquinas Erasmus Descartes Jacob Cats John Locke and Jean Jacques Rousseau by Romantic educationalists like Friedrich Fröbel and Ellen Key and by scientists like Charles Darwin and William James who emphasized the biological instead of the moral fundament of children's emotions The story of children's emotions is told in the context of cultural movements like the Renaissance Humanism the Reformation the Enlightenment Romanticism and the starting Age of Child Science Children's Emotions in Europe 1500 1900 crucially highlights the continuous co-existence of regulation oriented and child oriented educational views on children's emotions
