Andrew Garrod,Janie Victoria Ward,Tracy L. Robinson,Robert Kilkenny,2002-09-11 Most of what is written these days about young black men and women emphasizes incarceration and mortality rates teen pregnancy drug use and domestic strife This collection of sixteen autobiographical essays by African Americans Africans in America Afro Caribbean and biracial college students who have tackled significant obstacles to achieve success and degrees of self understanding offers a broader more hopeful portrait of the adolescent experiences of minority youth Here are emotionally honest and reflective stories of economic hardship racial bias loneliness and anger but also of positive role models spiritual awakening perseverance and racial pride In these essays students explore the process of self discovery and the realization of cultural identity The pieces are accompanied by commentary from prominent African American scholars such as Jewelle Taylor Gibbs and Peter C Murrell Jr Together they create a vivid portrait of what it is like to grow up as a black person in America and offer a springboard to current debates about self discovery cultural identity and assimilation Often raw and painful always honest and affecting this collection of personal stories written by young people stands as an eloquent tribute to the courage of today s youth and to the power of their own words *On Looking Back* Elizabeth Dumbleton,2014-03-28 By the law of averages I should not be around for the writing of this book nor the subsequent ones but it has to be said that in this life against all the odds there are the survivors which is obviously the category into which I fall On Looking Back is the first in a series of books

that reveal the compelling life story of Elizabeth Dumbleton Each chapter takes the reader on a journey beginning with Elizabeth s younger years where she fondly recounts her friendships and adventures living with her five older brothers and their single mother in the East End She then experiences the early death of her mother and is forced to endure a life fraught with unhappiness and danger as she is ripped from her brothers with a sudden evacuation to the country during the war Elizabeth lays bare her emotions recalling each memory honestly and unashamedly One moment the reader could be chuckling along with an amusing anecdote before sinking into sadness as she battles the twists and turns of a war torn life Full of compassion On Looking Back is an emotional read from start to finish Fans of biographies and memoirs will find this book difficult to put down once they pick it up *The Retrospect of Practical Medicine and Surgery* ,1853 **The**

Tomorrow's Medicine Scientific American Editors,2014-04-28 One hundred years ago most of the medical treatments and technologies that we take for granted hadn t even been imagined or were found in the pages of science fiction novels rather than medical journals Today on the other hand medical research often sounds like science fiction This eBook Tomorrow s Medicine looks at some of the more fascinating areas where technology that could transform health is being developed including cybernetics regenerative medicine nanotechnology and genetically tailored treatments Although many of these advances may not be ready to treat humans for many years some of them may someday profoundly change and extend

our lives In Bionic Connections for example D Kacy Cullen and Douglas Smith discuss synthetic limbs that function as well or better than our own Echoes of the 1966 film Fantastic Voyage abound in Nanomedicine Targets Cancer by James Heath Mark Davis and Leroy Hood who examine how miniaturized tools can both measure the molecular interactions of disease and deliver targeted therapies Several articles discuss different approaches for regeneration including Grow Your Own Eye in which author Yoshiki Sasai illustrates how his lab successfully grew a retina from stem cells to A Sweet Solution for Replacing Organs in which Katherine Harmon describes how a speaker at a recent TED talk used a 3 D printer to create a kidney A century from now will the sight of an amputee be a rarity with cybernetic limbs controlled by thought and nearly indistinguishable from the biological ones Perhaps most people will have their genomes read for indications of future disease and take steps to prevent it or even to cure inherited disorders Will we replace some drugs with tiny machines fanning out inside the body to repair damage As exciting as these possibilities are to extend both the length and quality of life immortality or at least agelessness may be forever out of our reach As Thomas Kirkwood notes in his piece Why Can t We Live Forever death might be the price we pay for our complex biology Even so the doctors of a century past would surely be impressed by what medical science has accomplished in the past hundred years antibiotics organ transplants and the elimination of smallpox to name but a few The next century should be equally impressive and with the various types of new technologies on the horizon many of us have a good chance of seeing it happen

Aurorae D. J. Hoffman, 2012-09 I never thought that I would spend my retirement writing novels Then again I never planned on hearing a voice not my own inside my head At my age many of my friends think I am going senile but they are wrong So this sixty something year old is in front of an old typewriter and waiting Waiting to hear the rest of this story but it has been months of silence I am beginning to believe that it is over and the voice is truly gone Therefore will not be telling their life story and perhaps that is for the best Everyone knows that I can t type well and my grammar is terrible That doesn t matter and what does is letting you know this biography Perhaps I should just put this old typewriter back in its case I will spend last of my years wondering before I also get put in a case I hope my porcelain farm animals find a good home when I m gone WHAT Okay The voice is back but not as loud and different than before But I am pleased to hear it again and hope my arthritis doesn t act up I will manage the pain of typing many pages and finally get use to it I should buy one of those computers everyone is using these days I understand it could even help with my grammar but I don t know What You are right and I am ranting on But how should I begin this novel and it can t be at the beginning What Of course and why wouldn t it It will start where I left off from my writings of Devan This novel is named Aurorae and I beg forgiveness for my mistakes Thank you Morgan E Wentworth

putting together a curriculum Time frames for delivering curricula in residency can be very tight often restricted to scattered one hour conferences This book provides a modular curriculum structure for instructors with each topic area taking up one section or one hour of instructional time Developed over the past 14 years as an introductory course for interns in the internal medicine residency program at Duke the curriculum will cover core content areas in evidence based medicine and best teaching practices for them and skills such as literature searching and applying evidence to patients Most importantly it will center on actual patient questions and use current literature as examples that instructors can use as teaching exercises There will also be ample diagrams that have been shown to be effective with learners and each module will include a video tutorial of a sample teaching session including visual aids and small group teaching techniques The curriculum can be implemented in any time frame necessary compressed or longitudinal to a variety of learners This is an ideal guide for residency program directors and core faculty either within internal medicine or more broadly in family medicine pediatrics surgery OB gyn as well as medical school faculty for use with students
