Urban Water in Japan Rutger de Graaf,Fransje Hooimeijer,2014-04-21 Water control is essential to Japan as more than half of its invested capital is concentrated in elevations under sea level and the majority of the island nation is exceptionally vulnerable to flooding To avoid potential crisis the Japanese have developed exceptionally innovative water management practices Offering the unique perspective of Dut

Geomorphic Approaches to Integrated Floodplain Management of Lowland Fluvial Systems in North America and Europe Paul F. Hudson,Hans Middelkoop,2015-04-29 This volume provides a comprehensive perspective on geomorphic approaches to management of lowland alluvial rivers in North America and Europe Many lowland rivers have been heavily managed for flood control and navigation for decades or centuries resulting in engineered channels and embanked floodplains with substantially altered sediment loads and geomorphic processes Over the past decade floodplain management of many lowland rivers has taken on new importance because of concerns about the potential for global environmental change to alter floodplain processes necessitating revised management strategies that minimize flood risk while enhancing environmental attributes of floodplains influenced by local embankments and upstream dams Recognition of the failure of old perspectives on river management and the need to enhance environmental sustainability has stimulated a new approach to river management The manner that river restoration and integrated management are implemented however requires a case study approach that takes into account the impact of historic human impacts to the system especially engineering The river basins examined in this volume provide a representative coverage of the drainage of North America and Europe taking into account a range of climatic and physiographic provinces They include the 1 Sacramento California USA 2 San Joaquin California 3 Missouri

Missouri USA 4 Red Manitoba Canada and Minnesota USA 5 Mississippi Louisiana USA 6 Kissimmee Florida USA 7 Ebro Spain 8 Rhone France 9 Rhine Netherlands 10 Danube Romania and 11 Volga Russian Federation Rivers The case studies covered in these chapters span a range of fluvial modes of adjustment including sediment channel hydrologic regime floodplains as well as ecosystem and environmental associations **The Hydraulic System of Uxul** Nicolaus

Seefeld,2018-09-30 This research seeks to close an essential research gap the understanding of the water management strategies of the Maya in pre Hispanic times It focuses on the archaeological investigation of the hydraulic system of Uxul a medium sized Maya centre in the south of the state of Campeche Mexico *Crop Production Technologies* Peeyush Sharma,Vikas Abrol,2012-01-05 Crop production depends on the successful implementation of the soil water and nutrient management technologies Food production by the year 2020 needs to be increased by 50 percent more than the present levels to satisfy the needs of around 8 billion people Much of the increase would have to come from intensification of agricultural production Importance of wise usage of water nutrient management and tillage in the agricultural sector for sustaining agricultural growth and slowing down environmental degradation calls for urgent attention of researchers planners and policy makers Crop models enable researchers to promptly speculate on the long term consequences of changes in agricultural practices In addition cropping systems under different conditions are making it possible to identify the adaptations required to respond to changes This book adopts an interdisciplinary approach and contributes to this new vision Leading authors analyze topics related to crop production technologies The efforts have been made to keep the language as simple as possible keeping in mind the readers of different language origins The emphasis has been on general descriptions and principles of each topic technical details original research work and modeling aspects However the comprehensive journal references in each area should enable the reader to pursue further studies of special interest The subject has been presented through fifteen chapters to clearly specify different topics for convenience of the readers

Irrigation Revisited Jan Kop,Wim Ravesteijn,Kasper Kop,2016-03-21 In February 2013 a delegation of Dutch technicians working in Indonesia handed over the book For Profit and Prosperity dealing with the Dutch contribution to public works in Indonesia during the period 1800 2000 to dr ir Suyono Sosrodarsono who was Director General of Water Management 1966 1982 and Minister of Public Works 1983 1988 in Indonesia In his expression of thanks dr ir Suyono Sosrodarsono noticed that important information was missing in the book especially in the field of irrigation in modern Indonesia He suggested that Dutch participants of the irrigation projects in Indonesia since 1965 should provide the missing information by putting their memories on paper This suggestion was adopted and has resulted in the present anthology focusing on the rehabilitation and creation of a few irrigation projects with Dutch assistance during the period 1965 2014 Apart from purely technical information legal frameworks policies and programs are treated as well as systems regarding water management settlement training and education Special attention is given to the problematic nature of the West Tarum Canal and to Indonesia s

unique tidal and non tidal swamp development The anthology derives its authenticity from the fact that the authors of the various chapters actually participated in the field
