Mavis Hetherington, 2014-01-02 This book a result of a conference sponsored by the National Institute of Child Health and Human Development explores developmental and clinical evidence of how divorce and the transition to single parenting and stepparenting affects children Many of the articles collected here look at the legal measures being used to make such transitions easier for families [The Voice of a Child in Family Law Disputes](#) Patrick Parkinson, Judy Cashmore, 2008-12-18 When relationships break down disputes commonly arise over the parenting arrangements for children whose living arrangements have to be reorganized at a time of great conflict and turmoil Most such disputes are resolved without a judicial determination through private agreement negotiation between lawyers mediation or a combination of these methods This book examines whether and how children should be involved in the process of resolving family law disputes Although there is widespread acceptance in the Western world that the views of children should be taken into account and that the weight given to those views should depend on their age and maturity there is much less agreement about how children s voices should be heard There are many benefits to giving children a voice in decisions that affect their lives and the UN Convention on the Rights of the Child identifies this as a right for children However there are difficulties and dangers in seeking to hear from children not least because they may be subject to pressure from each parent to express views that support his or her case Courts dealing with family law issues are constantly faced with a dilemma Is it better to keep children out of the conflict or to give them a say so that the arrangements are as workable for them as possible This book integrates examinations of these issues with empirical data from interviews which explore the views and experiences of children parents counsellors mediators lawyers and judges involved in such disputes in

Australia Drawing on this research the authors suggest ways in which children can better be heard without placing them at the centre of their parents conflicts They argue that the focus should not just be on how children are heard in legal proceedings but on how they can be better heard in those families who resolve their conflicts without going to court

Child Custody in Islamic Law Ahmed Fekry Ibrahim,2018-08-09 Pre modern Muslim jurists drew a clear distinction between the nurturing and upkeep of children or custody and caring for the child s education discipline and property known as guardianship Here Ahmed Fekry Ibrahim analyzes how these two concepts relate to the welfare of the child and traces the development of an Islamic child welfare jurisprudence akin to the Euro American concept of the best interests of the child enshrined in the Convention on the Rights of the Child CRC Challenging Euro American exceptionalism he argues that child welfare played an essential role in agreements designed by early modern Egyptian judges and families and that Egyptian child custody laws underwent radical transformations in the modern period Focusing on a variety of themes including matters of age and gender the mother s marital status and the custodian s lifestyle and religious affiliation Ibrahim shows that there is an exaggerated gap between the modern concept of the best interests of the child and pre modern Egyptian approaches to child welfare
