Millimeterwave And Infrared Multisensor Design And Signal Processing:

Millimeter-wave and Infrared Multisensor Design and Signal Processing Lawrence A. Klein, 1997 Here s a practical non theoretical introduction to the principles applications and benefits of multi sensor technology used in smart weapon development surveillance systems and an increasing variety of non military applications This book provides a broad overview of MMW millimeter wave and IR infrared sensor constraints design principles system alternatives and targeting applications and is unique in its coverage of integrated MMW and IR multisensor design *Sensor and Data Fusion* Lawrence A. Klein, 2004 This book illustrates the benefits of sensor fusion by considering the characteristics of infrared microwave and millimeter wave sensors including the influence of the atmosphere on their performance Applications that benefit from this technology include vehicular traffic management remote sensing target classification and tracking weather forecasting military and homeland defense Covering data fusion algorithms in detail Klein includes a summary of the information required to implement each of the algorithms discussed and outlines system application scenarios that may limit sensor size but that require high resolution data *ITS Sensors and Architectures for Traffic Management and Connected Vehicles* Lawrence A. Klein, 2017-08-07 An intelligent transportation system ITS offers considerable opportunities for increasing the safety efficiency and predictability of traffic flow and reducing vehicle emissions Sensors or detectors enable the effective gathering of arterial and controlled access highway information in support of automatic incident detection active transportation and demand management traffic adaptive signal control and ramp and freeway metering and dispatching of emergency response providers As traffic flow sensors are integrated with big data sources such as connected and cooperative vehicles and cell phones and other Bluetooth enabled devices more accurate and timely traffic flow information can be obtained The book examines the roles of traffic management centers that serve cities counties and other regions and the collocation issues that ensue when multiple agencies share the same space It describes sensor applications and data requirements for several ITS strategies sensor technologies sensor installation initialization and field testing procedures and alternate sources of traffic flow data The book addresses concerns related to the introduction of automated and connected vehicles and the benefits that systems engineering and national ITS architectures in the US Europe Japan and elsewhere bring to ITS Sensor and data fusion benefits to traffic management are described while the Bayesian and Dempster Shafer approaches to data fusion are discussed in more detail ITS Sensors and Architectures for Traffic Management and Connected Vehicles suits the needs of personnel in transportation institutes and highway agencies and students in undergraduate or graduate transportation engineering courses *Public Roads* ,2007 **Critical Technologies Plan** ,1989 *Army RD & A.* ,1991 *Program Solicitation* ,1997 *Weapon Systems* ,1992 *Army RD & A Bulletin* ,1991 *Sensor and Data Fusion Concepts and Applications* Lawrence A. Klein, 1999 First published in 1993 this Tutorial Text has been revised and updated to provide explanations and examples of data fusion algorithms in areas not

covered in the first edition. These include Bayesian inference, artificial neural networks, and fuzzy logic. All of the chapters in the first edition have been revised and updated, and new material is included on the FASCODE and MODTRAN atmospheric models and EOSAEL, which analyzes physical processes that affect the performance of millimeter wave and IR sensors.
