New Marxism:

Marx & History D. Ross Gandy, 2014-05-23 Gandy has attempted a much needed reinterpretation of Marx's theory of history one that everything considered deserves the reader's attention American Political Science Review In this book Karl Marx's observations on history which are found scattered throughout his voluminous writings are brought together and subjected to searching analysis in refreshingly direct language without jargon For the first time we have a thoughtful assessment of Marx's views on all the epochs that cross his historical vision D Ross Gandy treats Marx's ideas on primitive societies on ancient Roman and Asiatic civilization on the structure of feudalism on strategies for overthrowing capitalism and on the hypothetical communist future Among the author's departures from traditional readings of Marx are his interpretations of class struggle his conception of social strata and his cogent analysis of the new Marxism Since many aspects of Marxist historical theory have been neglected or distorted Gandy's remarkably clear commentary based on extensive research including an exhaustive study of the forty volume Marx Engels Werke will doubtless stimulate debate among sociologists and other students of social change political scientists and historians Perspectives In U.s. Anthropology David J. Hakken, Hanna Lessinger, June Nash, Florence Babb, 2019-06-04 An assessment of current trends in Marxist anthropology this collection of essays reflects both the unifying force of Marxist thought and the diversity of contemporary anthropology Linked by a common approach a shared commitment to Marxist analysis the contributors look at a variety of phenomena including the problems of labor and work in terms of a coherent theory of Marxism Examining political economic and ethnic situations the authors discuss social structures ideology and class formation This unique volume warrants the attention of both Marxists and non Marxists in anthropology and of scholars in other fields **Unthinking**

Social Science Immanuel Maurice Wallerstein, 2001 Immanuel Wallerstein develops a thorough going critique of the legacy of nineteenth century social science for social thought in the new millennium We have to unthink radically revise and discard many of the presumptions that still remain the foundation of dominant perspectives today Once considered liberating these notions are now barriers to a clear understanding of our social world They include for example ideas built into the concept of development In place of such a notion Wallerstein stresses transformations in time and space Geography and chronology should not be regarded as external influences upon social transformations but crucial to what such transformation actually is Unthinking Social Science applies the ideas thus elaborated to a variety of theoretical areas and historical problems

Companion to the History of Modern Science G N Cantor, G.N. Cantor, J.R.R. Christie, M.J.S. Hodge, R.C. Olby, 2020-10-07 The 67 chapters of this book describe and analyse the development of Western science from 1500 to the present day Divided into two major sections The Study of the History of Science and Selected Writings in the History of Science the volume describes the methods and problems of research in the field and then applies these techniques to a wide range of fields Areas covered include the Copernican Revolution Genetics Science and Imperialism the History of Anthropology Science and

Religion Magic and Science The companion is an indispensable resource for students and professionals in History Philosophy Sociology and the Sciences as well as the History of Science It will also appeal to the general reader interested in an introduction to the subject Praxis and Method (RLE: Gramsci) Richard Kilminster,2014-04-24 This sociological critique of the philosophy of praxis looks at the importance of the concept in the social theory of leading influential Western Marxists such as Luk cs Gramsci Korsch Horkheimer Marcuse and Adorno in the inter war period It offers a detailed critique of Marx and Hegel and explores the validity and implications for sociology of two of Marx s ideas which the later theorists made the centre piece of their social theory first that true theory is authenticated by praxis and second its corollary that certain major social transformations should and would in practice render sociology redundant **Readings in the Philosophy of Social Science** Michael Martin, Lee C. McIntyre, 1994 the first comprehensive anthology in the philosophy of social science to appear since the late 1960s The Other Worldview Peter Jones, 2015-06-24 A must read for every concerned American and especially for every Christian who weeps at the graveside of his culture R C Sproul A cataclysmic change has occurred as our culture has shifted toward belief in Oneism Every religion and philosophy fits into one of two basic worldviews Oneism asserts that everything is essentially one while Twoism affirms an irreducible distinction between creation and Creator The Other Worldview exposes the pagan roots of Oneism traces its spread throughout Western culture and demonstrates its inability to save For bodily holiness and transformed thinking we depend entirely on one amazing thing the incredibly powerful message of the Gospel to a sinful world which is the ultimate expression and goal of Twoism The only hope is in Christ alone **Back Issues** Gary Genosko, 2019-06-12 Using independent critical and cultural theory journals that cross the Canada US border as key examples this book shows how to interpret the original practices of periodicals by tracing editorial diasporas and transitions to electronic publishing Back Issues explains the role of independent theory journals in the institutional formation of critical theory and cultural studies in Canada and the US by focusing on two seminal publications Paul Piccone s Telos and Arthur Kroker s Canadian Journal of Political and Social Theory Editorial transits across the international border figure largely as do founding conferences interpersonal flare ups and the conviviality of academic communities and pre gentrified urban bohemia Both commensurable and incommensurable relationships between journal projects are analysed and a hitherto unwritten history of critical and cultural theory in Canada is broached Intellectual Foundations of the Nicaraguan Revolution Donald C. Hodges, 2014-02-04 In this critical study of the thought of Augusto Cesar Sandino and his followers Donald C Hodges has discovered a coherent ideological thread and political program which he succeeds in tracing to Mexican and Spanish sources Sandino s strong religious inclination in combination with his anarchosyndicalist political ideology established him as a religious seer and moral reformer as well as a political thinker and is the prototype of the curious blend of Marxism and Christianity of the late twentieth century Nicaraguan government the Frente Sandinista de Liberaci n Nacional *Paradise Remade* Elizabeth Buck, 2010-06-17 This is a book about the politics of

competing cultures and myths in a colonized nation Elizabeth Buck considers the transformation of Hawaiian culture focusing on the indigenous population rather than on the colonizers She describes how Hawaii's established religious social political and economic relationships have changed in the past 200 years as a result of Western imperialism Her account is particularly timely in light of the current Hawaiian demands for sovereignty 100 years after the overthrow of the monarchy in 1893 Buck examines the social transformation Hawaii from a complex hierarchical oral society to an American state dominated by corporate tourism and its myths of paradise She pays particular attention to the ways contemporary Hawaiians are challenging the use of their traditions as the basis for exoticized entertainment Buck demonstrates that sacred chants and hula were an integral part of Hawaiian social life as the repository of the people's historical memory chants and hula practices played a vital role in maintaining the links between religious political and economic relationships Tracing the ways in which Hawaiian culture has been variously suppressed and constructed by Western explorers New England missionaries the tourist industry ethnomusicologists and contemporary Hawaiians Buck offers a fascinating rereading of Hawaiian history

Revolution in the Air Max Elbaum, 2018-04-10 The first in depth study of the long march of the US New Left after 1968 The sixties were a time when radical movements learned to embrace twentieth century Marxism *Revolution in the Air* is the definitive study of this turning point and examines what the resistance of today can learn from the legacies of Lenin Mao and Che It tells the story of the new communist movement which was the most racially integrated and fast growing movement on the Left Thousands of young activists radicalized by the Vietnam War and Black Liberation and spurred on by the Puerto Rican Chicano and Asian American movements embraced a Third World oriented version of Marxism These admirers of Mao Che and Amilcar Cabral organized resistance to the Republican majorities of Nixon and Ford By the 1980s these groups had either collapsed or become tiny shards of the dream of a Maoist world revolution Taking issue with the idea of a division between an early good sixties and a later bad sixties Max Elbaum is particularly concerned to reclaim the lessons of the new communist movement for today's activists who like their sixties predecessors are coming of age at a time when the Left lacks mass support and is fragmented along racial lines With a new foreword by Alicia Garza cofounder of BlackLivesMatter
