Math Education for America analyzes math education policy through the social network of individuals and private and public organizations that influence it in the United States. The effort to standardize a national mathematics curriculum for public schools in the U S culminated in 2010 when over 40 states adopted the Common Core State Standards for Mathematics. Rather than looking at the text of specific policy documents this book complements existing critical reviews of the national math education curriculum by employing a unique social network analysis. Breaking new ground in detailing and theorizing the politics of math education Wolfmeyer argues that the private interests of this network are closely tied to a web of interrelated developments: human capital education policy debates over traditional and reform pedagogy, the assumed content knowledge deficit of math teachers and the proliferation of profit driven educational businesses. By establishing the interconnectedness of these interests with the national math education curriculum he shows how the purported goals of math education reform are aligned with the prevailing political agendas of this social network rather than the national interest.

Guadarrama, 2014-10-01 In keeping with the tradition set forth in volumes 1-4 this fifth volume *Creating Visions for University School Partnerships: A Volume in Professional Development School Research* continues to exemplify current thinking of practitioners and researchers in the field. The range of authors from the PreK-16 arena illustrates the ways in which professional development schools generate possible solutions to the complex problems facing educators. The diversity of their work represents perspectives of classroom teachers, preservice teachers, school leaders and university faculty who grapple with identifying ways of knowing and ways of doing that enhance educational outcomes for PreK-12 students while also serving to transform the profession. The volume's contents of 19 chapters divided into four areas: 1 Clinically Rich Practices, 2 PDS Stakeholders Perspectives, 3 Enriching Content Area Instruction, 4 Family Engagement gives us a more vivid picture of the work that partnerships are doing to fulfill the PDS promise for improving teaching and learning at every level.
