New Military In Russia Ten Myths That Shape The Image:

The New Military in Russia Richard Felix Staar,1996 Drawing on Russian language sources this authoritative study of the military establishment in Russia since the dissolution of the USSR refutes the persistent claim that the country's military remains outside of politics and maintains that reform is nonexistent *Army*,1995 **Parameters**,1996 Revitalising US-Russian Security Cooperation Richard Weitz,2020-11-25 Russia and the United States are the most important countries for many vital security issues They possess the world's largest nuclear weapons arsenals are involved in the principal regional conflicts and have lead roles in opposing international terrorism and weapons proliferation Despite persistent differences on many questions mutual interests consistently drive Russians and Americans to work together to overcome these impediments This Adelphi paper argues that opportunities for improving further security cooperation between Russia and the United States exist but are limited Near term results in the areas of formal arms control or ballistic missile defences are unlikely The two governments should focus on improving and expanding their joint threat reduction and nonproliferation programmes enhancing their military to military dialogue regarding Central Asia and defence industrial cooperation and deepening their antiterrorist cooperation both bilaterally and through NATO Using more market incentives expanding reciprocity and equal treatment and limiting the adverse repercussions from disputes over Iran would facilitate progress Russia and the United States will not soon become close allies but they should be able to achieve better security ties given that on most issues their shared interests outweigh those that divide them Concepts of Non-Provocative Defence G. Wiseman,2001-12-18 This book examines the viability of non provocative defence the controversial idea that defensive military policies and practices reduce the risk of wars and provide a viable basis for defending a society should war break out Drawing on case studies from Europe the 1991 Persian Gulf War and Asia Pacific the author concludes that non provocative defence concepts remain relevant and that they can help in deterring conducting and settling wars *Breaking Away from the Bear*, Breaking Away from the Bear Dianne Louise Smith,1998 Lieutenant Colonel Dianne L Smith examines the development of post Soviet Central Asian armed forces Central Asian efforts to guarantee their national security and the implications for the United States of this struggle She cautions that the United States use its influence and its military to military contact programs judiciously This is a region of great instability with massive infusions of energy wealth just beyond the horizon If these states can create viable methods to ensure domestic and regional security this wealth may produce prosperity and secure well being for their citizens If these states fail to create institutions to preserve their national sovereignty the new century could presage long lingering chaos and waste on a grand scale One need only look south to Afghanistan for such a model *Integration vs. Autonomy* Geir Hønneland,Anne-Kristin Jørgensen,2018-12-21 Published in 1999 On the basis of leading theoretical work on civil military relations the authors elaborate their own model emphasising the continuum between military autonomy which has traditionally characterised the military sector in Russia and integration

with civil society which one might expect would be the result of the political changes having taken place in Russia over the past decade Three Indicators of this relation are selected the participation of military personnel in civilian life and its particular politics the status of closed cities conversion of military industry to civilian production These indicators are investigated at the federal level and at the regional level pertaining to Murmansk oblast the Kola Peninsula which is one the most heavily militarised areas of the world The study is based on intensive on the spot data gathering in Murmansk including interviews with officers redundant officers and inhabitants of such closed cities **Phoenix** A. James Gregor, 2017-10-23 A great deal of effort has been expended by Anglo American scholars in an attempt to isolate past and contemporary fascisms neofascisms cryptofascisms and latent fascisms in the modern world A James Gregor's Phoenix Fascism in Our Time is an insightful history of the intellectual rationale for Benito Mussolini's fascism offered by major Italian intellectuals The book provides a list of recurrent features that helps to identify the generic phenomenon This lucid account reviews seriously neglected aspects of intellectual history describing the socioeconomic and political conditions that precipitate and sustain fascism Gregor shows that Italian fascism was supported by a responsible and credible rationale His account of that rationale permits us to understand the appeal fascism as an ideal has exercised over elites and masses in the 20th century Gregor offers a credible list of traits in showing how instances of fascism can be identified when they first appear The last chapters of the work are devoted to a case study of the newly emergent post Soviet Russian nationalism and its affinities with historic fascism Gregor discusses the implications of the rise of generic fascism in the former Soviet Union and post Maoist China This timely volume offers an alternative to conventional interpretations of the major historical events of the 20th century Phoenix is must reading for scholars and policymakers dealing with European history between the two world wars and should will be instructive for anyone interested in the fascist ideology in a new millennium *Biological Warfare and Disarmament* Susan Wright, 2002 This book proposes fresh approaches and concrete proposals to overcome one of the most intractable security problems of the twenty first century Visit our website for sample chapters **War and Peace Philosophical, Political and Legal Aspects** Anetta Breczko, Florian Lempa, 2013 **Opening Pandora's Box: Ethnicity and Central Asian Militaries**, Under the Counter and Over the Border Mark Phythian, 2013-03-09 Although the illicit arms trade has evolved over recent years despite the end of the Cold War it appears to be as vibrant as ever From Bosnia and Kosovo to Angola and Sierra Leone illicit arms flows have played a key role in areas of contemporary instability and violence Against this background this volume brings together studies of several key issues relating to this trade the changing nature of the illicit arms trade the origins of the Iran Contra affair the flow of illicit arms from post communist Russia the role of France in arming the genocide in Rwanda the question of the role of private security companies in areas of instability and the prospects of controlling the illicit trade in small arms This timely volume will be essential reading for courses in Criminology War and Peace Studies International Politics and African and other Area Studies which deal with arms trafficking and conflict issues

Russian Military Reform, 1992-2002 Anne C. Aldis, Roger N. McDermott, 2004-11-23 Military reform has featured prominently on the agenda of many countries since the end of the Cold War necessitated a re evaluation of the strategic role of the armed forces and nowhere more publicly than in Russia Not since the 1920s have the Russian Armed Forces undergone such fundamental change President Boris Yeltsin and his successor Vladimir Putin have both grappled with the issue with varying degrees of success An international team of experts here consider the essential features of Russian military reform in the decade since the disintegration of the USSR Fluctuations in the purpose and priorities of the reform process are traced as well as the many factors influencing change Chapters analyse the development of Russia s security policy structural reform of the services the social impact of military service and experience of military conflict in Chechnya Critical evaluations of the impact of social change on the Russian Armed Forces capabilities and expectations complement the analysis of the on going debate Russian Military Reform 1992 2002 will prove invaluable to all those interested in civil military relationships and international security as well as to students of military theory and practice

Conversion of Former BTW Facilities Erhard Geissler, Lajos G. Gázsó, Ernst Buder, 2012-12-06 The development production stockpiling and use in war of biological and toxin weapons are prohibited by international law Although not explicitly stated the two treaties outlawing such activities the Geneva Protocol of 1925 and the Biological and Toxin Weapons Convention of 1972 prohibit the continuation of activities previously performed in Biological and Toxin Weapons facilities not justified for prophylactic protective or other peaceful purposes Because conversion and other means of cessation of former BTW facilities are not explicitly addressed in the treaties mentioned above the problems involved in conversion of BTW facilities have thus far only been discussed marginally in the open literature In times of increased awareness of the danger of biological and toxin warfare including the increased danger of terrorist use of biological and toxin weapons it seemed necessary to us to invite experts from different parts of the world to discuss the pros and cons of conversion and the problems involved It also became obvious to us that the conversion of former BTW facilities should be discussed with respect to the necessity of peaceful international cooperation in areas related to the Biological and Toxin Weapons Convention An additional reason to discuss matters of peaceful cooperation is that cooperation is explicitly requested by Article X of the Biological and Toxin Weapons Convention

Policing Northeast Asia Se Hyun Ahn, 2020-06-02 This book explores the progress in and the obstacles surrounding developing comprehensive security cooperation between Russia and South Korea since diplomatic relations were established in 1991 within the framework of economic security The book focuses on oil and natural gas projects linking the Trans Siberian and Trans Korean Railroads industrial development in the Nakhodka Free Economic Zone fishery cooperation and the arms trade and examines whether these five aspects of cooperation serve to contribute to building Russian South Korean bilateral and regional economic security The author argues that these five aspects of cooperation all have the potential to enhance comprehensive bilateral security and further regional economic security in Northeast Asia

However Russian South Korean economic cooperation has been hampered by a number of obstacles including domestic factors as well as external factors and prevented Russia and South Korea from fulfilling their potential for creating a cooperative comprehensive security relationship The author concludes with an assessment on the utility of the concept of multi dimensional security cooperation as a framework for studying and improving the prospects for Russian South Korean bilateral relations

Russian Politics Zoltan D. Barany, Robert G. Moser, 2001-08-27 What went wrong in Russia's decade old post communist transition A group of leading young scholars answer this question by offering assessments of five crucial political arenas during the Yeltsin era elections executive legislative relations interactions between the central state and the regions economic reforms and civil military relations All of the contributors recognize that adverse historical legacies have complicated Russian democratization They challenge structural explanations that emphasize constraints of the pre existing system however and concentrate instead on the importance of elite decisions and institution building The authors agree that elites failure to develop robust political institutions has been a central problem of Russia's post communist transition The weakness of the state and its institutions has contributed to a number of serious problems threatening democratic consolidation These include the tensions between the executive and the legislature the frail infrastructure for successful market reform and the absence of proper civilian control over the armed forces

Searching for Partners William H. Lewis, Edward Marks, 1998 Peacekeeping emerged in the post Cold War period as the most prominent UN activity This is largely because governments have come under increasing scrutiny commonwealth of independent states Africa peacekeeping in Asia range of organizations available

The Soldier in Russian Politics 1988-1996 Robert V. Barylski, Stalin's Secret Weapon Anthony Rimmington, 2018 A chilling reassessment of the Soviet Union's advances in biological warfare and the West's inadvertent contributions
