***New Models In Geography*** Richard Peet, Nigel Thrift, 2013-10-11 First published in 1989 It seems such a long time ago another age yet it is a mere twenty odd years since the original *Models in Geography* was published It is an even shorter time

since the first tentative steps were taken towards an alternative formulation of what might constitute a geographical perspective within the social sciences. What came to be called the political economy perspective has progressed with remarkable speed and energy to generate its own framework of conceptualization and analysis, its own questions and debates. The papers in these two volumes are witness to the richness and range of the work which has developed over this relatively short period within the political economy approach. Moreover, from being a debate within an institutionally defined discipline of geography to introducing into that discipline ideas and discussions from the wider fields of philosophy and social science and the humanities more generally, it has now flowered into a consistent part of enquiries that span the entire realm of social studies.

*Political Economy and Tourism* Jan Mosedale, 2010-01-11. Political economy in its various guises and transfigurations is a research philosophy that presents both social commentary and theoretical progress and is concerned with a number of different topics: politics, regulation and governance, production systems, social relations, inequality and development amongst many others. As a critical theory, political economy seeks to provide an understanding of societies and of the structures and social relations that form them in order to evoke social change toward more equitable conditions. Despite the early influence of critical development studies and political economy on tourism research, political economy has received relatively little attention in tourism research.

*Political Economy and Tourism*, the first volume to bring together different theoretical perspectives and discourse in political economy related to tourism. Written by leading scholars, the text is organised into three sequential Parts linked by the principle that the political and the economic are intimately connected. Part one presents different approaches to political economy including Marxist political economy, regulation, comparative political economy, commodity chain research and alternative political economies. Part two links key themes of political economy such as class, gender, labour, development and consumption to tourism, and Part three examines the political economy at various geographical scales and focuses on the outcomes and processes of the political act of planning and managing tourism production. This engaging volume provides insights and alternative critical perspectives on political economy theory to expand discussions of tourism development and policy in the future.

*Political Economy and Tourism* is a valuable text for students, researchers and academics interested in Tourism and related disciplines.

*New Models In Geography V2* PhD Richard Peet, Professor Nigel Thrift, 2014-07-10. First published in 1989, the publication of *Models in Geography* presaged a sea change in the practice of Anglo-American geography. For a new set of models, this book provides a summary of their nature, spirit and purpose based upon a political economy perspective. The book is split into two volumes, each consisting of four parts. This makes the title suitable for students and geographers with an interest in models of the city, civil society and social theory.

*America's Johannesburg* Bobby M. Wilson, 2019-12. In some ways, no American city symbolizes the black struggle for civil rights more than Birmingham, Alabama. During the 1950s and 1960s, Birmingham gained national and international attention as a center of activity and unrest during the civil rights movement. Racially motivated bombings of the

houses of black families who moved into new neighborhoods or who were politically active during this era were so prevalent that Birmingham earned the nickname Bombingham In this critical analysis of why Birmingham became such a national flashpoint Bobby M Wilson argues that Alabama's path to industrialism differed significantly from that of states in the North and Midwest True to its antebellum roots no other industrial city in the United States depended as much on the exploitation of black labor so early in its urban development as Birmingham A persuasive exploration of the links between Alabama's slaveholding order and the subsequent industrialization of the state America's Johannesburg demonstrates that arguments based on classical economics fail to take into account the ways in which racial issues influenced the rise of industrial capitalism

**Creativity** Harriet Hawkins, 2016-10-04 Creativity whether lauded as the oil of the 21st century touted as a driver of international policy or mobilised by activities has been very much part of the zeitgeist of the last few decades Offering the first accessible but conceptually sophisticated account of the critical geographies of creativity this title provides an entry point to the diverse ways in which creativity is conceptualized as a practice promise force concept and rhetoric It proffers these critical geographies as the means to engage with the relations and tensions between a range of forms of arts and cultural production the cultural economy and vernacular mundane and everyday creative practices Exploring a series of sites Creativity examines theoretical and conceptual questions around the social economic cultural political and pedagogic imperatives of the geographies of creativity using these geographies as a lens to cohere broader interdisciplinary debates Central concepts cutting edge research and methodological debates are made accessible with the use of inset boxes that present key ideas case studies and research The text draws together interdisciplinary perspectives on creativity enabling scholars and students within and without Geography to understand and engage with the critical geographies of creativity their breadth and potential The volume will prove essential reading for undergraduate and post graduate students of creativity cultural geography the creative economy cultural industries and heritage

Rethinking the Region John Allen, with Julie Charlesworth, Allan Cochrane, Gill Court, Nick Henry, Doreen Massey, Phil Sarre, 2012-12-06 Rethinking the Region argues that regions are not simply bounded spaces on a map This book uses unique research of England during the 1980s to show how regions are made and unmade by social processes The book examines how new lines of division both social and geographical were laid down as free market growth and reconstructed this are as a neo liberal region The authors argue that a more balanced form of growth is possible within and between regions as well as between social groups This book shows that to grasp the complexities of growth we must rethink the region in time as well as in space

*Key Thinkers on Space and Place* Phil Hubbard, Rob Kitchin, 2010-11-30 In this latest edition of Key Thinkers on Space and Place editors Phil Hubbard and Rob Kitchin provide us with a fully revised and updated text that highlights the work of over 65 key thinkers on space and place Unique in its concept the book is a comprehensive guide to the life and work of some of the key thinkers particularly influential in the current spatial turn in the social sciences Providing a synoptic overview of different

ideas about the role of space and place in contemporary social cultural political and economic life each portrait comprises Biographical information and theoretical context An explication of their contribution to spatial thinking An overview of key advances and controversie Guidance on further reading With 14 additional chapters including entries on Saskia Sassen Tim Ingold Cindi Katz and John Urry the book covers ideas ranging from humanism Marxism feminism and post structuralism to queer theory post colonialism globalization and deconstruction presenting a thorough look at diverse ways in which space and place has been theorized An essential text for geographers this now classic reference text is for all those interested in theories of space and place whether in geography sociology cultural studies urban studies planning anthropology or women s studies

*The Routledge Handbook of Tourism Geographies* Julie Wilson, 2012-03-15 Geographical analysis of tourism spaces and places is advancing fast In terms of human geography the various recent academic turns have led to fresh examination of existing debates and have advanced new theoretical ideas in geography that are more salient than ever for tourism studies The Routledge Handbook of Tourism Geographies seeks to examine such recent developments by providing a state of the art review of the field documenting advances in research and evaluating different perspectives approaches techniques and contexts The Routledge Handbook of Tourism Geographies considers recent disciplinary developments including post disciplinarily in geography in relation to the study of tourism It also analyzes the fledging relationships of the new mobilities paradigm critical tourism studies and cultural political economy to tourism spaces and places as well as acknowledging a spatial turn in poststructuralist social sciences more generally In addition it evaluates how postcolonial feminist sensory performative and queer perspectives have diversified research in the tourism geographies field Spatial analysis time geography placemaking and landscape concerns are addressed and issues such as transport environmental discourses and development are also analyzed Finally the volume s contributions highlight key areas for advancing research and map out the dimensions of future trajectories in tourism geographies in different theoretical and thematic contexts Written by leading scholars in the tourism geographies field this text will provide an invaluable resource for all those with an interest in tourism geographies encouraging dialogue across disciplinary boundaries and areas of study

The Social Science Encyclopedia Adam Kuper, 2004-10-14 The Social Science Encyclopedia first published in 1985 to acclaim from social scientists librarians and students was thoroughly revised in 1996 when reviewers began to describe it as a classic This third edition has been radically recast Over half the entries are new or have been entirely rewritten and most of the balance have been substantially revised Written by an international team of contributors the Encyclopedia offers a global perspective on key issues within the social sciences Some 500 entries cover a variety of enduring and newly vital areas of study and research methods Experts review theoretical debates from neo evolutionism and rational choice theory to poststructuralism and address the great questions that cut across the social sciences What is the influence of genes on behaviour What is the nature of consciousness and cognition What are the causes of poverty and wealth What are the roots of conflict wars

revolutions and genocidal violence This authoritative reference work is aimed at anyone with a serious interest in contemporary academic thinking about the individual in society      **Race and Place in Birmingham** Bobby M. Wilson, 2000 This pioneering book explores the implications of postmodernism for the black community through an analysis of the civil rights and neighborhood movements in Birmingham Alabama Grounded not only in class struggle the Civil Rights Movement was tied to the politics of racial identity the neighborhood movement to the politics of place identity Bobby M Wilson critically examines these two movements which together transformed race and place in Birmingham He shows that although the civil rights struggle and neighborhood empowerment served a valuable purpose they cannot now overcome post Fordist forces of domination and exclusion Successful political movements the author argues must venture beyond the politics of identity and difference based on race and neighborhood      **Poststructuralist Geographies** Marcus Doel, 1999-08-30 This work is the first attempt to integrate poststructuralist thought with the insights of critical human geography Doel does not seek to make conventional approximations of poststructuralist concepts but to rethink and rewrite the world through them

**Service Worlds** John Bryson, Peter Daniels, Barney Warf, 2013-04-15 As the twenty first century begins significant changes are occurring in the way that services and goods are produced and consumed One of the key drivers of this change is information and communications technology ICT It has transformed the role of space and time in patterns of economic development in the rise of globalization and in the scale and structure of organizations ICT has therefore accelerated the process of continual change and evolution that is the hallmark of both the capitalist economy and of organizations Giving a student friendly account of the diversity of theoretical perspectives this outstanding book aids understanding the evolving economic geography of advanced capitalist economies A series of detailed firm and employees case studies from Europe North America and the Asia Pacific are used to inform useful theoretical case studies which also investigate the significance of increased blurring of the lines between services and manufacturing functions in the production and consumption process

*Routledge Handbook of Social and Cultural Theory* Anthony Elliott, 2013-12-04 If today students of social theory read Jurgen Habermas Michel Foucault and Anthony Giddens then proper regard to the question of culture means that they should also read Raymond Williams Stuart Hall and Slavoj Zizek The Routledge Handbook of Social and Cultural Theory offers a concise comprehensive overview of the convergences and divergences of social and cultural theory and in so doing offers a novel agenda for social and cultural research in the twenty first century This Handbook edited by Anthony Elliott develops a powerful argument for bringing together social and cultural theory more systematically than ever before Key social and cultural theories ranging from classical approaches to postmodern psychoanalytic and post feminist approaches are drawn together and critically appraised There are substantive chapters looking at among others structuralism and post structuralism critical theory network analysis feminist cultural thought cultural theory and cultural sociology Throughout the Handbook there is a strong emphasis on interdisciplinarity with chapters drawing from research in sociology cultural studies

psychology politics anthropology women s studies literature and history Written in a clear and direct style this Handbook will appeal to a wide undergraduate and postgraduate audience across the social sciences and humanities
