encounter while describing the dramatic remaking of a sweeping landscape by residents of one small community in the Brazilian Amazon Combining richly textured ethnographic research and lively historical analysis Raffles weaves a fascinating story that changes our understanding of this region and challenges us to rethink what we mean by nature Raffles draws from a wide range of material to demonstrate in contrast to the tendency to downplay human agency in the Amazon that the region is an outcome of the intimately intertwined histories of humans and nonhumans He moves between a detailed narrative that analyzes the production of scientific knowledge about Amazonia over the centuries and an absorbing account of the extraordinary transformations to the fluvial landscape carried out over the past forty years by the inhabitants of Igarap Guariba four hours downstream from the nearest city Engagingly written theoretically inventive and vividly illustrated the book introduces a diverse range of characters from sixteenth century explorers and their native rivals to nineteenth century naturalists and contemporary ecologists logging company executives and river traders A natural history of a different kind In Amazonia shows how humans animals rivers and forests all participate in the making of a region that remains today at the center of debates in environmental politics

The Place of Geography Tim Unwin, 2013-12-16 The Place of Geography is designed to provide a readable and yet challenging account of the emergence of geography as an academic discipline It has three particular aims it seeks to trace the development of geography back to its formal roots in classical antiquity provides an interpretation of the changes that have taken place in geographical practice within the context of Jurgen Habermas's critical theory and thirdly describes how the increasing separation of geography into physical and human parts has been detrimental to our understanding of critical issues concerning the relationship between people and environment

New Models in Geography Richard Peet, Professor Nigel Thrift, 1989-10-12 First Published in 1989 Routledge is an imprint of Taylor Francis an informa company

**America's Johannesburg** Bobby M. Wilson, 2019-12-01 In some ways no American city symbolizes the black struggle for civil rights more than Birmingham Alabama During the 1950s and 1960s Birmingham gained national and international attention as a center of activity and unrest during the civil rights movement Racially motivated bombings of the houses of black families who moved into new neighborhoods or who were politically active during this era were so prevalent that Birmingham earned the nickname Bombingham In this critical analysis of why Birmingham became such a national flashpoint Bobby M Wilson argues that Alabama's path to industrialism differed significantly from that of states in the North and Midwest True to its antebellum roots no other industrial city in the United States depended as much on the exploitation of black labor so early in its urban development as Birmingham A persuasive exploration of the links between Alabama's slaveholding order and the subsequent industrialization of the state America's Johannesburg demonstrates that arguments based on classical economics fail to take into account the ways in which racial issues influenced the rise of industrial capitalism

Landscape Theories Olaf Kühne, 2019-04-08 In the past decades the discussion about theoretical approaches to the topic of landscape has increased This book presents the currently discussed theoretical approaches to

landscape and shows its potentials and limits The theoretical approaches are discussed on the basis of current questions such as socialisation and the hybridisation of landscape and combined with empirical results This is followed by a discussion of the landscape policy operationalisation of theoretical considerations and empirical findings Mapping in Architectural Discourse Marc Schoonderbeek, 2021-11-29 This book explores the notion of mapping in architectural discourse First locating positioning and theorizing mapping it then makes explicit the relationship between research and design in architecture through cartography and spatial analysis It proposes three distinct modalities tool operation and concept showing how these methods lead to discursive aspects of architectural work and highlighting mapping as an instrument in developing architectural form It emphasizes the importance of place and time as fundamental terms with which to understand the role of mapping An investigation into architectural discourse this book will appeal to academics and researchers within the discipline with a particular interest in theory history and cartography *Science, Space, Society* Olaf Kühne, Karsten Berr, 2022-09-23 This volume provides a basic introduction to the philosophy of science and its central concepts theories and philosophical scientific and spatial positions and approaches **Fictive Domains** Judith Broome, 2007 Introduction toward a theory of nostalgia Pronouncing her case to be grief nostalgia and the body in Clarissa and Sir Charles Grandison Desire body and landscape in Pope s Eloisa to Abelard and Rousseau s Julie ou La nouvelle Heloise The secret pleasure of the picturesque In a world so changed feminine nostalgia and Sarah Scott s A description of Millenium Hall and the country adjacent **New Forms of Urbanization** Graeme Hugo, 2017-07-28 There is increasing appreciation in the social sciences that context is an important element in understanding social economic cultural political and demographic processes An important element in context is the type of settlement in which people live and work and so it is vital to be able to categorise people into particular settlements types This book brings together a leading team of social scientists to present the latest information on urbanization around the world highlighting examples of development patterns that are not adequately captured by the UN s type of reporting systems and drawing attention to other ways of representing current trends

*Foodscapes* Olaf Kühne, Julia Deborah Fischer, Timo Sedelmeier, Volker Hochschild, Barbara Staniscia, Cesare Manetti, Liliana Dumitrache, Ana-Maria Talos, Angel Menéndez Rexach, Ana de Marcos Fernández, 2023-08-01 Since the mid 1990s the term foodscapes has been used Its reference to landscape opens it up to a wide theoretical variety and numerous methodological approaches Through the large semantic yard of the concept of landscape it becomes clear that the approach of foodscapes aims less at the description or pure positivistic analysis of the production distribution and consumption of food but is rather open to aesthetic approaches normative questions aspects of the connection of food and space with meaning In this respect research on foodscapes is not simply a part of food geography but reaches beyond it With this anthology we contribute to the development of the research field on foodscapes and combine diverse perspectives from different disciplines locations and theoretical as well as methodological backgrounds on the diversity of what foodscapes can be Our

anthology Foodscapes Theory History and Current European Examples is the result of the collaboration of lecturers and students from the universities of Bucharest Madrid Rome and Tbingen

**Political Economy and Tourism** Jan Mosedale, 2010-01-11 Political economy in its various guises and transfigurations is a research philosophy that presents both social commentary and theoretical progress and is concerned with a number of different topics politics regulation and governance production systems social relations inequality and development amongst many others As a critical theory political economy seeks to provide an understanding of societies and of the structures and social relations that form them in order to evoke social change toward more equitable conditions Despite the early influence of critical development studies and political economy on tourism research political economy has received relatively little attention in tourism research Political Economy and Tourism the first volume to bring together different theoretical perspectives and discourse in political economy related to tourism Written by leading scholars the text is organised into three sequential Parts linked by the principle that the political and the economic are intimately connected Part one presents different approaches to political economy including Marxist political economy regulation comparative political economy commodity chain research and alternative political economies Part two links key themes of political economy such as class gender labour development and consumption to tourism and Part three examines the political economy at various geographical scales and focuses on the outcomes and processes of the political act of planning and managing tourism production This engaging volume provides insights and alternative critical perspectives on political economy theory to expand discussions of tourism development and policy in the future Political Economy and Tourism is a valuable text for students researchers and academics interested in Tourism and related disciplines

*Prolific Ground* Nicolle Jordan, 2024-11-15 Land ownership and engagement with land more generally constituted a crucial dimension of female independence in eighteenth century Britain Because political citizenship was restricted to male property owners women could not wield political power in the way propertied men did Given its foundational sociopolitical function land necessarily generated copious writing that vested it with considerable aesthetic and economic value This book then situates these issues in relation to the historical transformation of landscape under emergent capitalism The women writers featured herein including Jane Barker Anne Finch Sarah Scott and Elizabeth Montagu participated in this transformation by celebrating female estate stewardship and evaluating the estate stewardship of men By asserting their authority in such matters these writers acquired a degree of independence and self determination that otherwise proved elusive

**Geographies of Agriculture** Guy Robinson, 2014-01-14 Agricultural Geography has changed dramatically in recent decades reflecting the transformation of the farming industry itself Geographies of Agriculture embraces these changes applying ideas and methods from contemporary social science as it moves beyond farm based production to address current issues affecting the production and consumption of food and fibre throughout the world The book places special emphasis on topics that reflect globalisation processes integration of agriculture into the wider agri

food system concern with attaining sustainable production systems and the importance of both government and supra government policies Examples are drawn from North America Western Europe and the developing world Geographies of Agriculture will appeal especially to Geography students but should also be of interest to a broader range of students in Sociology Economics and Development Studies and anyone interested in agriculture food production and consumption and rural development
