

The “New Morality”

New Morality

Owen Anderson

New Morality:

Make Love, Not War David Allyn, 2016-05-23 When Helen Gurley Brown's *Sex and the Single Girl* hit bookstores in 1962 the sexual revolution was launched and there was no turning back Soon came the pill the end of censorship the advent of feminism and the rise of commercial pornography Our daily lives changed in an unprecedented time of sexual openness and experimentation *Make Love Not War* is the first serious treatment of the complicated events ideas and personalities that drove the sexual revolution forward Based on first hand accounts diaries interviews and period research it traces changes in private lives and public discourse from the fearful fifties to the first tremors of rebellion in the early sixties to the heady heyday of the revolution Bringing a fresh perspective to the turbulence of these decades David Allyn argues that the sexual revolutionaries of the 60s and 70s by telling the truth about their own histories and desires forced all Americans to re-examine the very meaning of freedom Written with a historian's attention to nuance and a novelist's narrative drive *Make Love Not War* is a provocative vivid and thoughtful account of one of the most captivating episodes in American history Also includes an 8 page insert

Teaching Moral Sex Kristy L. Slominski, 2021 *Teaching Moral Sex* is the first comprehensive study of the role of religion in the history of public sex education in the United States from the late nineteenth century to the early twenty first Far from being a barrier to sex education Kristy Slominski demonstrates religion has been deeply embedded in the history of sex education and its legacy has shaped the terms of current debates

Applied Ethics Ruth F. Chadwick, Doris Schroeder, 2002

Moral Philosophy: An Unconventional Perspective Pasquale De Marco, 2025-03-07 In a world grappling with complex moral dilemmas *Moral Philosophy An Unconventional Perspective* offers a refreshing and thought provoking exploration of morality beyond traditional boundaries Inspired by the groundbreaking work of Friedrich Nietzsche this book challenges conventional notions of right and wrong inviting readers to embark on a journey of self-discovery and moral exploration With meticulous analysis and engaging prose the book delves into the foundations of morality tracing the origins of moral codes and questioning the assumption of absolute truths It sheds light on the psychological social and historical factors that shape our ethical frameworks revealing the subjective nature of moral judgments and the diversity of moral perspectives across cultures and individuals The book also examines Nietzsche's concept of the slave revolt in morality arguing that morality is not a universal and immutable truth but rather a product of power dynamics and social conditioning It explores how the weak and oppressed seeking to assert their power invert the values of the strong creating a morality that emphasizes humility meekness and self-denial Furthermore the book explores the concept of the will to power central to Nietzsche's philosophy and its implications for morality It posits that the fundamental drive of all living beings is the will to power the desire to assert oneself and overcome obstacles This drive when expressed in a healthy and productive manner can lead to self-actualization and personal growth However when it becomes destructive or oppressive it can lead to conflict domination and the subversion of moral values The book also delves into

Nietzsche's genealogical approach to morality challenging traditional notions of morality as timeless and unchanging. It argues that moral values are not inherent or absolute but rather have evolved over time through a process of historical and cultural contingencies. By tracing the genealogy of moral concepts, the book uncovers the hidden assumptions, prejudices, and power relations that shape our ethical judgments. Finally, the book explores the implications of Nietzsche's philosophy for morality in the modern world. It examines the challenges posed by technological advancements, environmental degradation, and the increasing interconnectedness of our global society. It questions whether traditional moral frameworks are still adequate to address the complex ethical dilemmas of the 21st century and considers the possibility of creating a new morality that is more inclusive, just, and sustainable. *Moral Philosophy: An Unconventional Perspective* is a thought-provoking and challenging book that invites readers to question their own moral beliefs, challenge conventional assumptions, and embark on a transformative journey of self-discovery and moral exploration. If you like this book, write a review. **New**

Religions Thoughts, 1860 *The New Morality* Durant Drake, 1928 **Anti-American Generation** Edgar Friedenberg, 2017-07-05 This book examines the social attitudes that distinguish today's youth from their predecessors, identifies the sources of these attitudes in the social experiences of today's youth, and analyzes the stereotype implied in the term Anti-American Generation. These essays show clearly that the issue between the dissenting, primarily middle-class youth and their elders, and most of the working class, regardless of age, is a difference of opinion not about Americanism but about moral behavior and the scope of moral judgment. What distinguishes the generations is not so much their feelings about their country as their feelings about what people should do about their feelings and the role feelings should have in the conduct of one's life. The attitudes of the young are largely in conflict with an older cultural tradition that promotes the subordination of impulse and personal conviction to rational control for the sake of common purposes and future acceptability and effectiveness. *Obesity, Eating Disorders and the Media* Professor Stanley Ulijaszek, Dr. Karin Eli, 2014-09-28 How do the media represent obesity and eating disorders? How are these representations related to one another? And how do the news media select which scientific findings and policy decisions to report? Multi-disciplinary in approach, *Obesity, Eating Disorders and the Media* presents critical new perspectives on media representations of obesity and eating disorders with analyses of print, online, and televisual media framings. **Areas of Learning: Basic to Lifelong Education** P. Lengrand, 2016-05-27 The study of lifelong education brings to light aspects of education which go beyond the purely intellectual sphere into all dimensions of being. These dimensions assume great importance for individuals seeking to develop capacities which will enable them to cope successfully with the challenges they will confront throughout life and to participate constructively in the larger processes of development. The subjects covered include communication, corporal man, time-space, art, man as citizen, the ethical domain, technology, and the scientific spirit, and from these papers emerges the unifying theme of the interrelationship between morality and technology. This relationship poses the vital question of how individuals should decide

which of the new technologies that proliferate in contemporary society is likely to be beneficial to humankind and which destructive The book is the result of a collective project undertaken by the Unesco Institute of Education UIE The approach adopted is new in two respects first each theme is treated in terms of learning and second each is related to the others in a global and transdisciplinary view of personal development It is written by experts from various countries who are known internationally for their outstanding contributions to research into the problems of learning as a basis for lifelong education and will be important reading for all those involved in the study and practice of lifelong education **These Are Written**

Peter Nafzger,2013-05-31 Today there is an increasing awareness and availability of the sacred writings of the world's religions This raises important questions about the Christian Scriptures What is distinctive about these writings What role do they play in the Christian story What makes these particular texts holy The modern battle for the Bible with its narrow focus on proving or disproving biblical inerrancy has made it difficult to provide sufficient answers This work of constructive theology rethinks the concepts categories and assumptions that have dominated the modern approach to the Bible by returning to the biblical narrative and its focus on the cross It identifies the Scriptures as the written form of the living and active Word of God which was spoken by the prophets and apostles and became human in the person of Jesus Christ This conception of the Bible provides Christians in this postmodern world with a solid ground from which to address pressing questions about canon authority and interpretation of their Scriptures **The Matrix of Christian Ethics** Patrick

Nullens,Ronald T. Michener,2010-08-10 Patrick Nullens and Ronald T Michener seek to revitalize Christian ethics through an integrative approach to classical ethics Their matrix of consequential principle virtue and value ethics provides an alternative to postmodern situation ethics and brings the framework of biblical wisdom to bear on contemporary ethical questions

Pragmatism, Post-modernism, and Complexity Theory Donna Trueit,2012-08-21 The first collection of the key works of the major curriculum studies scholar William E Doll Jr this volume provides an overview of his scholarship over his fifty year career and documents the theoretical and practical contribution he has made to the field The book is organized in five thematic sections Personal Reflections Dewey Piaget Bruner Whitehead Process And Transformation Modern Post Modern Structures Forms and Organization Complexity Thinking and Reflections on Teaching The complicated intellectual trajectory through pragmatism postmodernism and complexity theory not only testifies to Doll's individual lifetime works but is also intimately related to the landscape of education to which he has made an important contribution Of interest to curriculum scholars around the world the book will hold special significance for graduate students and junior scholars who came of the age in the field Doll helped create one crafted by postmodernism and more recently complexity theory **The Creativity of Action** Hans Joas,1996 Hans Joas is one of the foremost social theorists in Germany today Based on Joas's celebrated study of George Herbert Mead this work reevaluates the contribution of American pragmatism and European philosophical anthropology to theories of action in the social sciences Joas also establishes direct ties between Mead's work and

approaches drawn from German traditions of philosophical anthropology Joas argues for adding a third model of action to the two predominant models of rational and normative action one that emphasizes the creative character of human action This model encompasses the other two allowing for a more comprehensive theory of action Joas elaborates some implications of his model for theories of social movements and social change and for the status of action theory in sociology in the face of competition from theories advanced by Luhmann and Habermas The problem of action is of crucial importance in both sociology and philosophy and this book already widely debated in Germany will add fresh impetus to the lively discussions current in the English speaking world

Moral Discernment in the Christian Life James M. Gustafson, Theodoor Adriaan Boer, Paul E. Capetz, 2007-01-01 James M Gustafson has been a leading and formative figure in the field of Christian ethics over the past fifty years His many contributions to theological ethics have helped to define and shape ethical thinking by Christians who reflect on great moral issues Gustafson's work must be dealt with by all students in this discipline and his perceptive insights have given clarity and guidance to the process of moral discernment The essays collected here are ones that have had a significant impact on discussions and debates over recent decades The Library of Theological Ethics series focuses on what it means to think theologically and ethically It presents a selection of important and otherwise unavailable texts in easily accessible form Volumes in this series will enable sustained dialogue with predecessors though reflection on classic works in the field

Communication: Ethical and Moral Issues Lee Thayer, 1973 First Published in 1973

Routledge is an imprint of Taylor Francis an informa company

Culture, Ritual and Revolution in Vietnam Shaun Kingsley Malarney, 2002-01-01 This is a study of the history and consequences of the revolutionary campaign to transform culture and ritual in northern Vietnam Based on official documents and several years of field research it provides a detailed account of the nature of revolutionary cultural reform in Vietnam

Evolutionary Moral Realism Michael Stiglitz, John Collier, 2019-11-25 Against standard approaches to evolution and ethics this book develops the idea that moral values may find their origin in regularly recurring features in the cooperative environments of species of organisms that are social and intelligent Across a wide range of species that are social and intelligent possibilities arise for helping others responding empathetically to the needs of others and playing fairly The book identifies these underlying environmental regularities as biological natural kinds and as natural moral values As natural kinds moral values help to provide more complete explanations for the selection of traits that arise in response to them For example helping in an aquatic environment is quite different than helping in an arboreal environment and so we can expect the selection of traits for helping to reflect these underlying environmental differences With the human ability to name talk and reason about important features of our environment moral values become part of moral discourse and argument helping to produce coherent systems of moral thought Combining a naturalistic approach to morality with an equal emphasis on moral argument and truth this book will be of interest to philosophers and historians of biology theoretical biologists comparative psychologists and moral philosophers

The Cattell Controversy William H. Tucker, 2010-10-01 Raymond Cattell the father of personality trait measurement was one of the most influential psychologists in the twentieth century the author of fifty six books more than five hundred journal articles and book chapters and some thirty standardized instruments for assessing personality and intelligence in a professional career that spanned almost seventy years In August 1997 the American Psychological Association announced that Cattell had been selected the recipient of the American Psychological Foundation Gold Medal Award for Life Achievement in Psychological Science Then only two days before the scheduled ceremony the APF abruptly postponed the presentation of the award due to concerns involving Cattell s views on racial segregation and eugenics In addition to his mainstream research Cattell had also authored a series of publications that posited evolutionary progress as the ultimate goal of human existence and argued that scientifically measurable criteria should be used to distinguish successful from failing racial groups so that the latter might be gradually phased out by non violent methods such as regulation of birth control Derived from science Cattell s evolutionary philosophy was intended to be the basis of a full blown religion Although the earliest of these works had been published in the 1930s near the end of an era in which eugenically based policies for human improvement were much more acceptable Cattell promoted similar ideas well into the 1980s and 90s The Cattell Controversy describes Cattell s socio religious beliefs in detail and analyzes their relationship to his scientific contributions William H Tucker discusses the controversy that arose within the field in response to the award s postponement after which Cattell withdrew his name from consideration for the award but insisted that his position had been distorted by taking statements out of context Reflecting on these events Tucker concludes with a discussion of the complex question of whether and how a scientist s ideological views should ever be a relevant factor in determining the value of his or her contributions to the field

The Natural Moral Law Owen Anderson, 2012-04-30 This book studies beliefs about the good and how it is known and how such beliefs shape claims about the moral law

AQA Religious Ethics for AS and A2 Jill

Oliphant, 2011-03-17 Structured directly around the specification of the AQA this is the definitive textbook for students of Advanced Subsidiary or Advanced Level courses It covers all the necessary topics for Religious Ethics in an enjoyable student friendly fashion Each chapter includes a list of key issues AQA specification checklist explanations of key terminology helpful summaries self test review questions exam practice questions To maximise students chances of exam success the book contains a section dedicated to answering examination questions It comes complete with lively illustrations a comprehensive glossary full bibliography and a companion website

Decoding **New Morality**: Revealing the Captivating Potential of Verbal Expression

In a period characterized by interconnectedness and an insatiable thirst for knowledge, the captivating potential of verbal expression has emerged as a formidable force. Its power to evoke sentiments, stimulate introspection, and incite profound transformations is genuinely awe-inspiring. Within the pages of "**New Morality**," a mesmerizing literary creation penned by way of a celebrated wordsmith, readers attempt an enlightening odyssey, unraveling the intricate significance of language and its enduring impact on our lives. In this appraisal, we shall explore the book's central themes, evaluate its distinctive writing style, and gauge its pervasive influence on the hearts and minds of its readership.
