Blackwill, Albert Carnesale, 1993 Robert D Blackwill and Albert Carnesale along with eight other experts analyze the national security consequences for the United States if new nuclear weapon states emerge to threaten American interests *Weapons Proliferation and War in the Greater Middle East* Richard L. Russell, 2007-05-07

Hays, Brenda J. Vallance, Alan R. Van Tassell, 1997 defense policies reviewing excerpts from key defense policy statements and assessing the likely challenges for future policy makers Brent Scowcroft International Affairs **Countering the Proliferation of Weapons of Mass**

Destruction Thanos P Dokos, 2020-07-24 As counter proliferation is expected to become the central element in the new national security policy of the US such actions will constitute a central element of every major international conflict in the first decades of the 21st century One of the most important geostrategic phenomena of the past decade has been the extraordinary diffusion of war making capabilities from the developed North to the developing South In the eyes of some proliferant states possessing nuclear biological and chemical NBC weapons would not only add to their regional stature but would also offer an asymmetrical counter to the West s massive superiority in conventional forces In the Eastern Mediterranean and the Middle East a number of countries are assumed to possess varying levels of NBC weapons capabilities Reasons for concern include the fact that such weapons have been used in the past the region s geographic proximity to Europe and the vital interests of the West which is prepared under certain circumstances to use force to protect them the multiplicity of conflicts and other security problems and the general instability in the region including the spread of religious extremism This important and timely book assesses in detail the accuracy of predictions and perceptions about a possible military threat from the Southern Mediterranean Muslim world and their impact on NATO s political and military posture Thanos P Dokos presents an assessment of the Alliance s options for dealing with the problem This book represents an invaluable topical resource for researchers and policy makers *Presidential Decision Making and Military Intervention in the Post-Cold War Era* Dennis N. Ricci, 2019-07-08 Despite the end of the Cold War the frequency of U S military

intervention has increased While military intervention accelerated after 9 11 increasing intervention was demonstrably evident well before 2001 Presidential Decision Making and Military Intervention in the Post Cold War Era Go or No Go analyzes presidential decision making regarding military intervention through a focused structured comparison of go and no go decisions from the four successive administrations of Presidents George H W Bush Bill Clinton George W Bush and Barack Obama Dennis Ricci explores competing explanations for why a presidential administration will decide to intervene in one situation and not in another Since both the situations and decision makers vary across cases Ricci analyzes explanations for intervention by asking Why intervene Why use force or not Under what conditions or circumstances are intervention decisions made

Preventing the Use of Weapons of Mass Destruction Eric Herring, 2013-01-11 These studies concentrate on preventing the use of weapons of mass destruction A common argument runs through all of the papers that while complacency must be avoided much of the post Cold War focus among Western governments on the threat posed by weapons of mass destruction is alarmist

Smoke and Mirrors Frank P. Harvey, 2004-01-01 Frank P Harvey mounts a powerful case for American unilateralism He addresses the relationship between globalization terrorism and unilateralism and provides a systematic explanation for and defense of Washington's response to threats of terrorism and proliferation of weapons of mass destruction

Preventive War and American Democracy Scott Silverstone, 2012-07-26 This volume explores the preventive war option in American foreign policy from the early Cold War strategic problems created by the growth of Soviet and Chinese power to the post Cold War fears of a nuclear armed North Korea Iraq and Iran For several decades after the Second World War American politicians and citizens shared the belief that a war launched in the absence of a truly imminent threat or in response to another's attack was raw aggression Preventive war was seen as contrary to the American character and its traditions a violation of deeply held normative beliefs about the conditions that justify the use of military force This anti preventive war norm had a decisive restraining effect on how the US faced the shifting threat in this period But by the early 1990s the Clinton administration considered the preventive war option against North Korea and the Bush administration launched a preventive war against Iraq without a trace of the anti preventive war norm that was central to the security ethos of an earlier era While avoiding the sharp partisan and ideological tone of much of the recent discussion of preventive war Preventive War and American Democracy explains this change in beliefs and explores its implications for the future of American foreign policy

Forrest, 2011-03-28 Issues of defence politics and policy have long been at the forefront of political agendas and defining of international affairs However the dramatic changes to the global system that have taken place since the end of the Cold War and particularly since the terror attacks on the USA on 11 September 2001 have amplified the world's attention toward political and policy issues of national regional and global security The focus of this volume is on examining the fundamental causes of and defence policy responses to this new post 9 11 security environment Edited by Isaiah Ike Wilson III and James J F Forrest of

Maritime Counterproliferation Operations and the Rule of Law Craig H. Allen, 2007-06-30 Allen examines the maritime counterproliferation activities of nations participating in the Proliferation Security Initiative as set out in their Statement of Interdiction Principles He explains the framework for conducting maritime interception activities examines the importance of intelligence to PSI operations and assesses the legal issues raised by those operations The threat of WMD use by terrorist groups and rogue regimes has added new urgency to global security discussions Responses to the dangers posed by WMD include the nonproliferation regime safeguards for WMD materials while in transit export controls treaties on terrorism Security Council resolutions and the new Protocol to the Convention for the Suppression of Unlawful Acts Against the Safety of Maritime Navigation The existing nonproliferation regime will never by itself provide an adequate level of security As a result risk management strategies must include layered counterproliferation activities and consequence management Counterproliferation measures may include maritime interdictions The Proliferation Security Initiative a cooperative undertaking launched in 2003 provides a framework for those interdictions The framework was formalized in the Statement of Interdiction Principles After providing an overview of the threats posed by WMD proliferation this book surveys the nonproliferation regime and counterproliferation measures states have adopted to supplement it It next provides an overview of maritime interception operations and the intelligence issues surrounding them before turning to the laws governing such operations It then examines each of the actions described in the PSI Statement of Interdiction Principles to assess their compliance with applicable laws Finally it looks at the laws that establish the responsibility of states for taking unwarranted counterproliferation actions against vessels

The Weapons State David Mutimer, 2000 The proliferation of all kinds of weapons is a focal point for international security This work shows how both the language used to talk about weapons proliferation and the practices adopted to respond to it serve to define the problem in ways that promote policy responses doomed to failure

Nuclear Proliferation and International Security Sverre Lodgaard, Bremer Maerli, 2007-06-11 The Nuclear Non Proliferation Treaty has long been key in non proliferation and disarmament activities The Treaty is the major international legal obstacle for states seeking nuclear weapon capabilities In retrospect and despite setbacks the overall impact of the Nuclear Non Proliferation Treaty has been significant and gratifying Its continued success is by no means guaranteed As old nuclear dangers persist and new ones evolve policies to halt nuclear proliferation are more disparate than at any other time Nuclear weapons remain an essential part of the security policies of leading states and many developmental states maintain strong nuclear weapon ambitions while terrorists have actively been seeking nuclear capabilities In search of an overarching strategy that recognizes both the flaws of the existing non

proliferation regime and the value of some of the corrections proposed by regime critics this volume assesses contemporary efforts to stem nuclear proliferation In doing so Nuclear Proliferation and International Security examines a number of cases with a view to recommending better non proliferation tools and strategies The contributors comprise renowned international scholars who have been selected to obtain the best possible analyses of critically important issues related to international non proliferation dynamics and the future integrity of the Non Proliferation Treaty *The NPT and the Developing Countries* Jita Mishra,2008 *Strategic Warfare in Cyberspace* Gregory J. Rattray,2001 A comprehensive analysis of strategic information warfare waged via digital means as a distinct concern for the United States and its allies In the information age information systems may serve as both weapons and targets Although the media has paid a good deal of attention to information warfare most treatments so far are overly broad and without analytical foundations In this book Gregory Rattray offers a comprehensive analysis of strategic information warfare waged via digital means as a distinct concern for the United States and its allies Rattray begins by analyzing salient features of information infrastructures and distinguishing strategic information warfare from other types of information based competition such as financial crime and economic espionage He then establishes a conceptual framework for the successful conduct of strategic warfare in general and of strategic information warfare in particular Taking a historical perspective he examines U S efforts to develop air bombardment capabilities in the period between World Wars I and II and compares them to U S efforts in the 1990s to develop the capability to conduct strategic information warfare He concludes with recommendations for strengthening U S strategic information warfare defenses Twenty-First Century Weapons Proliferation James M. Ludes, Henry Sokolski,2014-01-14 Leading US security practitioners from the Ford Carter Reagan Bush and Clinton administrations plus other experts on proliferation clarify the weapons proliferation threats that the US and its allies will face and suggest what new policies their governments should consider *Prevailing in a Well-Armed World: Devising Competitive Strategies Against Weapons Proliferation* , *Catastrophic Consequences* Steven R. David,2008-08-15 Introduction a new kind of threat Saudi Arabia oil fields ablaze Pakistan loose nukes Mexico a flood of refugees China collapse of a great power Conclusions the coming storm **Nuclear Nonproliferation** Phillip Margulies,2008 History suggests that the existence of a weapon leads to its eventual use in war as illustrated by the dropping of the atomic bomb on the Japanese cities of Hiroshima and Nagasaki in 1945 At the opening of the atomic age scientists political analysts generals and politicians were haunted by the idea that nuclear wars could not be won both sides would be virtually destroyed The stakes of the game have only continued to rise as the club of nations currently possessing nuclear arms has become less and less exclusive the United States the Soviet Union Russia England France China Israel India Pakistan and North Korea Following a detailed analysis of this timely issue Nuclear Nonproliferation explores the threat of nuclear production and the potential for solutions in four regions of the world the United States South Asia India and Pakistan the Middle East Israel Iraq and Iran and East Asia

North Korea **The Oceans in the Nuclear Age** David D. Caron, Harry N. Scheiber, 2014-07-17 The advent of the nuclear age in 1945 fundamentally altered the course of human events The oceans are not the focus of the nuclear age but the affairs of the oceans are deeply woven into the history of that age Knowledge of what the nuclear age has meant for the oceans however is highly fragmented and there exists a surprising gap in research on the impact of the nuclear age on the oceans and on ocean law and policy Ranging from dumped wastes to transportation to security this study frames the complex multidimensional set of relationships between the oceans and the nuclear age and illuminates patterns of impact and response in ocean law This timely expanded edition includes a new chapter by Lt Todd Hutchins USN on Nuclear Risks in Coastal Areas Legal and Regulatory Responses It provides a full discussion of the 2011 coastal Fukushima Nuclear Power Plant disaster together with analysis more generally of the challenges to the environment and to the legal order globally that are posed by coastal siting of nuclear power plants **To Agree or Not to Agree** Lisa Baglione, 2010-08-04 Why were the leaders of the United States and the Soviet Union able to negotiate a series of arms control agreements despite the deep and important differences in their interests during the Cold War Lisa A Baglione considers a variety of explanations for the successes and failures of these negotiations drawn from international relations theories Focusing on the goals and strategies of individual leaders and their ability to make these the goals and strategies of their nation the author develops a nuanced understanding that better explains the outcome of these negotiations Baglione then tests her explanation in a consideration of negotiations surrounding the banning of above ground nuclear tests the Strategic Arms Limitation Talks of the 1970s the negotiations for the limitation of intermediate range nuclear forces in the 1980s and the last negotiations between the Americans and the disintegrating Soviet Union in 1990 and 1991 How these great rivals were able to negotiate significant arms control agreements not only will shed light on international relations during an important period of history but will help us understand how such agreements might develop in the post Cold War period when arms proliferation has become a serious problem This book will appeal to scholars of international relations and arms control as well as those interested in bargaining and international negotiations and contemporary military history Lisa A Baglione is Assistant Professor of Political Science St Joseph s University
