Facilities Management Peter Barrett,David Baldry,2009-02-18 Facilities management has been one of the fastest growing professional disciplines for some years both in terms of volume and diversity of commercial activity However a widely accepted and implemented body of knowledge is still lacking This book contributes to that knowledge building by taking models and ideas from a wide range of sources and linking them to extensive case study material drawn from practising facilities managers The text is divided into three parts Current practice is illustrated with a second chapter looking at enhancing services Key facilities management issues are considered user needs evaluation outsourcing and computer based information systems Extensive advice is provided on managing people through change and on decision making The Second Edition features new material on user needs briefing and procurement strategy together with new public sector case studies This high quality book provides a comprehensive approach to the range of issues and the combination of case studies with theoretical perspectives and research has a strong practical emphasis Chartered Surveyor Monthly A thorough and very well researched book as a student text it is first class Construction Manager

The Machine at Work Keith Grint,Steve Woolgar,2013-06-28 This highly topical book is a concise and accessible account of the relationship between technology and work Firstly it reviews and critically assesses a variety of recent approaches to the social and cultural dimensions of technology Secondly it examines the implications of these new approaches for existing ideas about the nature of technology and work organization At the core of much thinking about technology is the assumption that the technical character and capacity of artefacts is given The enduring image of deus ex machina captures the idea that it is the essential capacity within a technology which in the end accounts for the way we organize ourselves our work and other life experiences Recent work in the sociology of technology by contrast sets out relativist and constructivist accounts of technology which begin to challenge this central assumption The Machine at Work includes a reinterpretation of the Luddites a review of the social processes of development in information technology a reassessment of theories of the role of technology in work and an analysis of the common limitations of some constructivist and feminist perspectives on technology The book argues that only a commitment to a particular conception of constructivism enables the kind of radical rethinking about technology and work relations that is needed This engaging and informative text will be of interest to students in a range of subject areas from sociology organizational theory and behaviour to industrial relations management and business studies

International Handbook of Educational Policy Nina Bascia,Alister Cumming,Amanda Datnow,Kenneth Leithwood,David Livingstone,2008-05-14 Nina Bascia Alister Cumming Amanda Datnow Kenneth Leithwood and David Livingstone This Handbook presents contemporary and emergent trends in educational policy research in over fty chapters written by nearly ninety leading researchers from a number of countries It is organized into ve broad sections which capture

many of the current dominant educational policy foci and at the same time situate current understandings historically in terms of both how they are conceptualized and in terms of past policy practice The chapters themselves are empirically grounded providing illustrations of the conceptual implications contained within them as well as allowing for comparisons across them The serendipity within chapters with respect to jurisdictional particularities and contexts allows readers to consider not only a range of approaches to policy analysis but also the ways in which policies and policy ideas play out in different times and places The sections move from a focus on prevailing policy tendencies through increasingly critical and outsider perspectives on policy They address in turn the contemporary strategic emphasis on large scale reform substantive emphases at several levels on leadership and governance improving teacher quality and conceptualizing learning in various domains around the notion of literacies and concluding finally with a contrasting topic workplace learning which has had less policy attention and thus allows readers to consider both the advantages and disadvantages of learning and teaching under the bright gaze of policy
