Fighting Deindustrialisation Andy Clark,2022-09-15 In *Fighting Deindustrialisation* Andy Clark outlines and examines one of the most significant and under researched periods in modern Scottish labour history Over a fourteen month period in 1981 and 1982 as Scotland suffered the effects of the accelerated deindustrialisation of its economy three workforces refused to accept the loss of their jobs The predominantly women assembly workers at Lee Jeans Greenock Lovable Bra Cumbernauld and Plessey Capacitors Bathgate were informed that their multinational employers had taken the decisions to close their plants At each site a battle was fought against capital movement corporate greed and unfair jobloss The workers occupied their factories and refused to vacate until their demands were met and closure avoided At all sites this objective was achieved none of the factories completely closed following the women s occupations In this book these occupations are analysed together for the first time through a range of analytical frameworks from oral history memory studies industrial relations scholarship and deindustrialisation studies In his extensive examination Clark argues that the actions of 1981 82 should be considered as one of the most significant periods in Scotland s history of deindustrialisation However the public memory of 1981 82 is precarious *Fighting Deindustrialisation* begins the process of incorporating women s militant resistance within academic and popular understandings of working class activism in later 20th century Scotland **The**

Scottish State and European Migrants, 1885-1939 Terence McBride,2024-02-29 This book examines the efforts of the government in Scotland to manage the increase of migrants travelling to Britain at the end of the nineteenth century Focussing on the period between 1885 and 1939 the book explores how the Scottish machinery of government handled the administration of foreigners The author uses a comparative thematic approach to analyse migrant experiences identities and relationships with state institutions Drawing from state records held by the National Records of Scotland in Edinburgh the book argues that Scottish officials in semi autonomous boards began to recognise describe and enumerate the presence of the foreigner in the early twentieth century framing their handling of foreignness in accordance with the Aliens Act of 1905 The author goes on to explain that institutions operating in Scotland developed a distinctly Scottish approach to alien matters which continued up until the Second World War Therefore an increasing number of important decisions affecting migrants were taken by a distinctly Scottish machinery of government impacting on how Scottish officials understood foreignness and how those identified as foreigners understood their identity in relation to Scottishness Contributing significantly to current heated debates on migration and identity amongst researchers and the general public in Europe and beyond this book provides essential insights into the ways in which a sub state began to develop practices processes and attitudes towards migration which were not always in line with that of the central government Weather, Migration and the Scottish

Diaspora Graeme Morton,2020-10-28 Why did large numbers of Scots leave a temperate climate to live permanently in parts

of the world where greater temperature extreme was the norm The long nineteenth century was a period consistently cooler than now and Scotland remains the coldest of the British nations Nineteenth century meteorologists turned to environmental determinism to explain the persistence of agricultural shortage and to identify the atmospheric conditions that exacerbated the incidence of death and disease in the towns In these cases the logic of emigration and the benefits of an alternative climate were compelling Emigration agents portrayed their favoured climate in order to pull migrants in their direction The climate reasons pressures and incentives that resulted in the movement of people have been neither straightforward nor uniform There are known structural features that contextualize the migration experience chief among them being economic and demographic factors By building on the work of historical climatologists and the availability of long run climate data for the first time the emigration history of Scotland is examined through the lens of the nation s climate In significant per capita numbers the Scots left the cold country behind yet the homeland remained an unbreakable connection for the diaspora
