Ephesians Ernest Best, 1998-01-01 A major introduction translation and verse by verse commentary Professor Best provides an overall view of Ephesians which demonstrates the power and consistency of its author s work Among the many important elements in this commentary Ernest Best explores for example the relationship between the primarily theological aspects of Ephesians which concentrate on the nature of the church and the primarily ethical aspects which concentrate on the behaviour of members of Christian communities towards one another An indispensable reference for scholars students and clergy

Dynamic Personality Science. Integrating Between-Person Stability and Within-Person Change Nadin Beckmann, Robert E. Wood, 2017-12-28 Personality can be understood from at least two perspectives One focuses on stable between person differences or traits The other perspective focuses on within person differences and dynamics i e fluctuations in personality in response to situations and across time This Research Topic reflects recent developments in personality research to integrate both trait and dynamic perspectives An integrated view on personality recognizes both stability in between person differences and within person change Contributors are drawn from research teams across Europe North America and Australasia and from basic and applied fields including organizational educational and clinical The studies reported provide new evidence in support of an integrative approach highlight currently active areas of research and propose new directions of research Current streams of research include the study of contingent units of personality and within person processes underlying traits the comparisons of findings based on within vs between person data the conceptualisation and operationalization of perceived and objective change in

situation variables the malleability of personality and the potential for personality interventions Integrative approaches using within person designs provide new bottom up insights into general principles of personality that explain differences between people while reflecting the complexities of within person personality dynamics at the level of the individual *Harming Future Persons* Melinda A. Roberts, David T. Wasserman, 2009-07-31 Melinda A Roberts and David T Wasserman 1 Purpose of this Collection What are our obligations with respect to persons who have not yet and may not ever come into existence Few of us believe that we can wrong those whom we leave out of existence altogether that is merely possible persons We may think as well that the directive to be fruitful and multiply and replenish the earth 1 does not hold up to close scrutiny How can it be wrong to decline to bring ever more people into existence At the same time we think we are clearly obligated to treat future persons persons who don't yet but will exist in accordance with certain stringent standards Bringing a person into an existence that is truly awful not worth having can be wrong and so can bringing a person into an existence that is worth having when we had the alternative of bringing that same person into an existence that is substantially better We may think as well that our obligations with respect to future persons are triggered well before the point at which those persons commence their existence We think it would be wrong for example to choose today to turn the Earth of the future into a miserable place even if the victims of that choice do not yet exist *Kotlin from Scratch* Faisal Islam, 2025-01-14 Learn Kotlin Through 37 Projects Kotlin isn't just for building Android apps As you'll learn in Kotlin from Scratch it's also a general programming language for crafting both elegant and efficient code With the aid of 37 hands-on projects you'll move quickly through the language basics while building your problem solving skills even tackling advanced concepts like fractals dynamic systems and nature inspired algorithms You'll explore the way Kotlin handles variables control structures functions classes and data structures and you'll learn to create visualizations using Kotlin and the JavaFX graphics library Then you'll build increasingly sophisticated apps to practice what you've learned while tackling challenges from math and science to algorithms and optimization As you progress through the book you will Simulate physical systems like the intricate dance of binary stars Implement the classic Hill cipher for encryption and decryption Generate beautiful fractals with recursive algorithms Program classic computer science algorithms for sorting and searching Solve the infamous Berlin52 traveling salesman problem Expand your language repertoire and improve your computational thinking with Kotlin from Scratch
