Grimes, 2023-11-06 A lot of hard won knowledge is laid out here in a brief but informative way Every topic is well referenced
with citations from both the primary literature and relevant resources from the internet Review of first edition from Nature
Chemical Biology Written by the founders of the SPARK program at Stanford University this book is a practical guide
designed for professors students and clinicians at academic research institutions who are interested in learning more about
the drug development process and how to start transforming their basic research discoveries into novel drugs Often many
potentially transformative basic science discoveries are not pursued because they are deemed too early to attract industry
interest This comprehensive book lays out simple relatively cost effective things that academic researchers can do to advance
their findings to the point that they can be tested in the clinic or attract more industry interest Each chapter broadly
discusses an important topic in drug development from discovery optimization and preclinical studies through clinical trial
design regulatory issues and marketing assessments After the practical overview provided here the reader is encouraged to
consult more detailed texts on specific topics of interest The SPARK model has been adopted in over 60 institutions on six
continents and the program has been honored with multiple awards including the 2020 Xconomy Award for Ecosystem
Development the 2020 Cures Within Reach Award for Patient Impact Research and the 2022 California Life Sciences
Pantheon Award for Academia Non Profits Research The new edition updates every chapter with the latest developments
