Iraq's Burdens Abbas Alnasrawi, 2002-11-30 Oil revenue has been an economic curse for Iraq In the second half of the 20th century the international oil sector shaped Iraq's economy forcing it to rely too heavily on revenue brought in by oil production and exports Iraq's failure to use copious oil rents to diversify the economy has proven disastrous for its people and economy Its over reliance on oil revenues coupled with the consequences of its war with Iran the Gulf War and the ensuing economic sanctions have led the country to economic destruction sanctions and enormous debt Iraq is a major oil producing country a founding member of OPEC and possesses the world's second highest amount of oil reserves Yet few studies exist on Iraq's oil industry and its impact on the economic and political fortunes of the country Alnasrawi remedies this by helping us understand this important Arab Middle Eastern oil exporting country that has been a constant focus of U S foreign policy since 1990 Alnasrawi concludes that the availability of capital is an insufficient condition for economic development and may in fact retard it as it did in this now reviled and wrecked country

The Modern/Colonial/Capitalist World-System in the Twentieth Century Ramón Grosfoguel, Ana Margarita Cervantes-Rodríguez, 2002-07-30 An important building block for further advancing world system theory this book considers the theory from the perspectives of global processes and antisystemic movements feminist theory and the aftermath of the colonial system The volume addresses three myths tied to Eurocentric forms of thinking objectivist and universalist knowledges the decolonization of the modern world and developmentalism All three myths the authors argue conceal the continued hierarchical and unequal relations of domination and exploitation between European and Euro American centers

and non European peripheral regions In this volume world system scholars address these and related aspects of the modern colonial capitalist world system Addressing the myth of universalist knowledge the volume reminds us that our knowledge is situated in the gender class racial and sexual hierarchies of a specific region in the world system while the colonality of power additionally situates our knowledge The volume further argues that the postcolonial era retains the hierarchy of colonialism and the possibility of national development without global structural changes is one of the greatest 20th century myths Taking these perspectives into consideration the contributors examine and help to refine classic world system theory

Hamilton Unbound Robert E. Wright, 2002-08-30 Modern financial theories enable us to look at old problems in early American Republic historiography from new perspectives Concepts such as information asymmetry portfolio choice and principal agent dilemmas open up new scholarly vistas Transcending the ongoing debates over the prevalence of either community or capitalism in early America Wright offers fresh and compelling arguments that illuminate motivations for individual and collective actions and brings agency back into the historical equation Wright argues that the Colonial rebellion was in part sparked by destabilizing British monetary policy that threatened many with financial insolvency that in areas without modern financial institutions and practices dueling was a rational means of protecting one's creditworthiness that the principle agent problem led to the institutionalization of the U S Constitution's system of checks and balances and that a lack of information and education induced women to shift from active business owners to passive investors Economists historians and political scientists alike will be interested in this strikingly novel and compelling recasting of our nation's formative decades

Albania towards a sustainable regional development Xhindi, Nevila, 2014-02-18 As Albania is accelerating its preparations towards candidate country status in the European Union EU numerous areas of public policy and practices are undergoing intensive development Regional development policy is a very new area of public policy in Albania and needs research and development This study examines the process of sustainable development in Albania by analysing and comparing the regional development of the regions Tirana Shkodra and Kukes With regards to methodology the study relies on a review of literature as well as an analytical review of and a comparative approach to the three case regions ensuring adequate quality through interviews and quantitative relevance through data collection The research is organised in five chapters The first chapter provides an overview over the research The second chapter outlines the theories and scientific framework underlying the sustainable development to regional development process and its links to geography The third chapter presents the overall picture of the regional development efforts in Albania analysing disparities and regional development in the light of EU requirements and NUTS division Chapter 4 continues this discourse by highlighting the regional development of the three regions Tirana driver for change Shkodra the North in development and Kukes the shrinking region Conclusions and recommendations are presented in chapter 5 This research comes to the conclusions that if growth in Albania is to be increased and sustained a regional development policy needs to be established

Development Paradigms: Environmental management, poverty reduction, and sustainable regional development

Asfaw Kumssa, T. G. McGee, 2001 Annotation Considers the incorporation of poverty alleviation and environmental management into regional development policy

New Regional Development Paradigms: Globalization and the new regional development Asfaw Kumssa, T. G. McGee, 2001 The era of globalization is creating profound changes in global relationships changes that are manifest at international regional national and sub national levels making traditional regional development policy obsolete and irrelevant Traditional policy needs to be redefined and reconstructed so it can capture and articulate emerging regional trends and issues The first of four volumes based mainly on Global Forum on Regional Development Policy organized by the United Nations Centre for Regional Development in Nagoya Japan this book presents a broad theoretical and trend analysis of globalization and its effects on the theory and practice of regional development The book lays out the major components that merit consideration if there is to be new regional planning in this millennium While contributors to the volume do not agree on the effects of globalization on economic growth there is a consensus in the volume that globalization presents a challenge to conventional development theories The challenge for regional planners is to examine the impact and implications of recent structural changes on regional development planning and come up with viable and pragmatic regional development strategies This volume begins to meet that challenge by laying out the major components that merit consideration The following volumes will present detailed case studies of current regional planning practices focusing largely on developing countries

Dialogues in Urban and Regional Planning Thomas L. Harper, Michael Hibbard, Heloisa Costa, Anthony Gar-On Yeh, 2010-12 This fourth volume of some of the best award winning writing from around the world's planning schools promotes further discussion and thought The international authors address a broad spectrum of planning issues including safety in urban spaces rebuilding post Katrina and planning and governance in urban Zimbabwe

Transforming the Rural Nonfarm Economy Steven Haggblade, Peter B. R. Hazell, Thomas Reardon, 2007-11-16 Contrary to conventional wisdom that equates rural economies with agriculture rural residents in developing countries often rely heavily on activities other than farming for their income Indeed nonfarm work accounts for between one third and one half of rural incomes in the developing world In recent years accelerating globalization increasing competition from large businesses expanding urban markets for rural goods and services and greater availability of information and communication technology have combined to expose rural nonfarm businesses to new opportunities as well as new risks By examining these rapid changes in the rural nonfarm economy international experts explore how the rural nonfarm economy can contribute to overall economic growth in developing countries and how the poor can participate in this rapidly evolving segment of the economy The authors review an array of recent studies of the rural nonfarm economy in order to summarize existing empirical evidence explore policy implications and identify future research priorities They examine the varied scale structure and composition of the rural nonfarm economy as well as its relationship with agricultural

and urban enterprises And they address key questions about the role of public intervention in the rural nonfarm economy and how the rural poor can participate in and navigate the rapid transition underway in rural areas The contributors offer new insights to specialists in rural development and to others interested in overall economic development **The**

Core-Periphery Divide in the European Union Rudy Weissenbacher,2020-01-29 This book revisits the forgotten history of the European Dependency School in the 1970s and 1980s explores core periphery relations in the European integration process and the crises of the contemporary European Union from a dependency perspective and draws lessons for alternative development paths Was disintegration of the European Union foretold With the benefit of hindsight the critical analysis of the European integration process by researchers from the European Dependency School is most timely The current framework of the European Union seems to be haunted by issues that had been very familiar to the researchers of the European Dependency School such as a lack of a common and balanced industrial policy How do the situations compare What lessons can be learnt for alternative development policies in contemporary Europe Weissenbacher tackles these issues which are of relevance to all interested in political economy political science development studies and regional development **The**
